AdvisorShares Trust (the “Trust”) is an investment company offering professionally managed investment portfolios. This Statement of Additional Information (the “SAI”) relates to shares of the following series (the “Fund”):

AdvisorShares Treedale Rising Rates ETF (NYSE Arca Ticker: HDGB)

This SAI is not a prospectus. It should be read in conjunction with the Fund’s prospectus dated November 1, 2018 (the “Prospectus”). Capitalized terms not defined herein are defined in the Prospectus. Copies of the Prospectus are available, without charge, upon request by contacting the Trust at the address or telephone number above. Shares of the Fund are subject to listing on NYSE Arca, Inc. (the “Exchange”) and will trade in the secondary market.

The date of this SAI is November 1, 2018.

GENERAL INFORMATION ABOUT THE TRUST

The Trust, an open-end management investment company, was organized as a Delaware statutory trust on July 30, 2007. The Trust is permitted to offer separate series (*i.e.*, funds) and additional series may be created from time to time. As of the date of this SAI, the Trust consists of 18 separate funds, not all of which are currently offered for sale. This SAI relates only to the Fund.

Each share issued by the Fund has a pro rata interest in the assets of the Fund. Shares have no preemptive, exchange, subscription or conversion rights and are freely transferable. Each share is entitled to participate equally in dividends and distributions declared by the Board of Trustees of the Trust (“Board”) with respect to the Fund, and in the net distributable assets of the Fund on liquidation. All payments received by the Trust for shares of the Fund belong to the Fund. The Fund has its own assets and liabilities.

The shares of the Fund are subject to approval for listing on the Exchange and, as described in the Fund’s Prospectus, will trade on the Exchange at market prices that may be below, at, or above net asset value (“NAV”) per share of the Fund.

The Fund offers and issues shares at NAV in aggregated lots of at least 25,000 (each, a “Creation Unit” or a “Creation Unit Aggregation”), generally in exchange for a specified amount of cash totaling the NAV of the Creation Unit(s). Shares are redeemable only in Creation Unit Aggregations and, generally, in exchange for a specified cash payment. The Trust reserves the right to offer an in-kind option for creations and redemptions of Creation Units for the Fund. See the “Creation and Redemption of Creation Units” section for detailed information.

INVESTMENT POLICIES, TECHNIQUES AND RISK FACTORS

General

AdvisorShares Investments, LLC (the “Advisor”) serves as the investment advisor to the Fund, which is a diversified open-end management investment company. The Fund’s investment objective and principal investment strategies, as well as other important information, are described in the Fund’s Prospectus, which should be read together with this SAI. The investment objective of the Fund is non-fundamental and may be changed without the approval of shareholders.

The day-to-day portfolio management of the Fund is provided by Treesdale Partners, LLC (the “Sub-Advisor”), the sub-advisor to the Fund, and is subject to the oversight of the Advisor and the Board.

The Sub-Advisor selects securities for the Fund’s investment pursuant to an “active” management strategy for security selection and portfolio construction.

The investment techniques and instruments described below and in the Fund’s Prospectus may, consistent with the Fund’s investment objective and investment policies, be used by the Fund if, in the opinion of the Advisor or the Sub-Advisor, such strategies will be advantageous to the Fund. The Fund may not invest in all of the instruments and techniques described below. In addition, the Fund is free to reduce or eliminate its activity with respect to any of the investment techniques described below without changing the Fund’s fundamental investment policies, and the Fund will periodically change the composition of its portfolio to best meet its investment objective. For more information about the Fund’s principal strategies and risks, please see the Fund’s Prospectus.

Borrowing

While the Fund does not anticipate doing so, the Fund may borrow money for investment purposes. Borrowing for investment purposes is one form of leverage. Leveraging investments, by purchasing securities with borrowed money, is a speculative technique that increases investment risk, but also increases investment opportunity. Because substantially all of the Fund's assets will fluctuate in value, whereas the interest obligations on borrowings may be fixed, the NAV per share of the Fund will increase more when the Fund's portfolio assets increase in value and decrease more when the Fund's portfolio assets decrease in value than would otherwise be the case. Moreover, interest costs on borrowings may fluctuate with changing market rates of interest and may partially offset or exceed the returns on the borrowed funds. Under adverse conditions, the Fund might have to sell portfolio securities to meet interest or principal payments at a time when investment considerations would not favor such sales. The Fund may use leverage during periods when its Sub-Advisor believes that the Fund's investment objective would be furthered.

The Fund may also borrow money to facilitate management of the Fund's portfolio by enabling the Fund to meet redemption requests when the liquidation of portfolio instruments would be inconvenient or disadvantageous. Such borrowing is not for investment purposes and will be repaid by the Fund promptly.

As required by the Investment Company Act of 1940, as amended (the "1940 Act"), the Fund must maintain continuous asset coverage (total assets, including assets acquired with borrowed funds, less liabilities exclusive of borrowings) of 300% of all amounts borrowed. If, at any time, the value of the Fund's assets should fail to meet this 300% coverage test, the Fund, within three days (not including Sundays and holidays), will reduce the amount of the Fund's borrowings to the extent necessary to meet this 300% coverage requirement. Maintenance of this percentage limitation may result in the sale of portfolio securities at a time when investment considerations otherwise indicate that it would be disadvantageous to do so.

In addition to the foregoing, the Fund is authorized to borrow money as a temporary measure for extraordinary or emergency purposes in amounts not in excess of 5% of the value of the Fund's total assets. Borrowings for extraordinary or emergency purposes are not subject to the foregoing 300% asset coverage requirement. The Fund is authorized to pledge portfolio securities the Sub-Advisor deems appropriate as may be necessary in connection with any borrowings for extraordinary or emergency purposes, in which event such pledging may not exceed 15% of the Fund's assets, valued at cost.

Currency Transactions

Foreign Currencies. The Fund may invest directly and indirectly in foreign currencies. The Fund may conduct foreign currency transactions on a spot (*i.e.*, cash) or forward basis (*i.e.*, by entering into forward contracts to purchase or sell foreign currencies). Currency transactions made on a spot basis are for cash at the spot rate prevailing in the currency exchange market for buying or selling currency. Although foreign exchange dealers generally do not charge a fee for such conversions, they do realize a profit based on the difference between the prices at which they are buying and selling various currencies. Thus, a dealer may offer to sell a foreign currency at one rate, while offering a lesser rate of exchange should the counterparty desire to resell that currency to the dealer. Forward contracts are customized transactions that require a specific amount of a currency to be delivered at a specific exchange rate on a specific date or range of dates in the future and can have substantial price volatility. Forward contracts are generally traded in an interbank market directly between currency traders (usually large commercial banks) and their customers. The parties to a forward contract may agree to offset or terminate the contract before its maturity, or may hold the contract to maturity and complete the contemplated currency exchange. At the discretion of the Advisor, a Fund may, but is not obligated to, enter into forward currency exchange contracts for hedging purposes to help reduce the risks and volatility caused by changes in foreign currency exchange rates, or to

gain exposure to certain currencies in an effort to achieve the Fund's investment objective. When used for hedging purposes, forward currency contracts tend to limit any potential gain that may be realized if the value of the Fund's foreign holdings increases because of currency fluctuations.

Investments in foreign currencies are subject to numerous risks, not the least of which is the fluctuation of foreign currency exchange rates with respect to the U.S. dollar. Exchange rates fluctuate for a number of reasons.

- Inflation. Exchange rates change to reflect changes in a currency's buying power. Different countries experience different inflation rates due to different monetary and fiscal policies, different product and labor market conditions, and a host of other factors.
- Trade Deficits. Countries with trade deficits tend to experience a depreciating currency. Inflation may be the cause of a trade deficit, making a country's goods more expensive and less competitive and so reducing demand for its currency.
- Interest Rates. High interest rates may raise currency values in the short term by making such currencies more attractive to investors. However, since high interest rates are often the result of high inflation long-term results may be the opposite.
- Budget Deficits and Low Savings Rates. Countries that run large budget deficits and save little of their national income tend to suffer a depreciating currency because they are forced to borrow abroad to finance their deficits. Payments of interest on this debt can inundate the currency markets with the currency of the debtor nation. Budget deficits also can indirectly contribute to currency depreciation if a government chooses inflationary measures to cope with its deficits and debts.
- Political Factors. Political instability in a country can cause a currency to depreciate. Demand for a certain currency may fall if a country appears a less desirable place in which to invest and do business.
- Government Control. Through their own buying and selling of currencies, the world's central banks sometimes manipulate exchange rate movements. In addition, governments occasionally issue statements to influence people's expectations about the direction of exchange rates, or they may instigate policies with an exchange rate target as the goal. The value of the Fund's investments is calculated in U.S. dollars each day that the New York Stock Exchange ("NYSE") is open for business. As a result, to the extent that the Fund's assets are invested in instruments denominated in foreign currencies and the currencies appreciate relative to the U.S. dollar, the Fund's NAV as expressed in U.S. dollars (and, therefore, the value of your investment) should increase. If the U.S. dollar appreciates relative to the other currencies, the opposite should occur. The currency-related gains and losses experienced by the Fund will be based on changes in the value of portfolio securities attributable to currency fluctuations only in relation to the original purchase price of such securities as stated in U.S. dollars. Gains or losses on shares of the Fund will be based on changes attributable to fluctuations in the NAV of such shares, expressed in U.S. dollars, in relation to the original U.S. dollar purchase price of the shares. The amount of appreciation or depreciation in the Fund's assets also will be affected by the net investment income generated by the money market instruments in which the Fund invest and by changes in the value of the securities that are unrelated to changes in currency exchange rates.

The Fund may incur currency exchange costs when it sells instruments denominated in one currency and buys instruments denominated in another.

Equity Securities

The Fund may invest in equity securities. Equity securities represent ownership interests in a company or partnership and consist of common stocks, preferred stocks, warrants to acquire common stock, securities convertible into common stock, and investments in master limited partnerships. Investments in equity securities in general are subject to market risks that may cause their prices to fluctuate over time. Fluctuations in the value of equity securities in which the Fund invests will cause the NAV per share of the Fund to fluctuate. The U.S. stock market tends to be cyclical, with periods when stock prices generally rise and periods when stock prices generally decline. The Fund may purchase equity securities traded in the U.S. on registered exchanges or the over-the-counter market. The Fund may invest in the types of equity securities described below:

- **Common Stock.** Common stock represents an equity or ownership interest in an issuer. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds and preferred stock take precedence over the claims of those who own common stock.
- **Preferred Stock.** Preferred stock represents an equity or ownership interest in an issuer that pays dividends at a specified rate and that has precedence over common stock in the payment of dividends. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds take precedence over the claims of those who own preferred and common stock.
- **Warrants.** Warrants are instruments that entitle the holder to buy an equity security at a specific price for a specific period of time. Changes in the value of a warrant do not necessarily correspond to changes in the value of its underlying security. The price of a warrant may be more volatile than the price of its underlying security, and a warrant may offer greater potential for capital appreciation as well as capital loss. Warrants do not entitle a holder to dividends or voting rights with respect to the underlying security and do not represent any rights in the assets of the issuing company. A warrant ceases to have value if it is not exercised prior to its expiration date. These factors can make warrants more speculative than other types of investments.
- **Convertible Securities.** Convertible securities are bonds, debentures, notes, preferred stocks or other securities that may be converted or exchanged (by the holder or by the issuer) into shares of the underlying common stock (or cash or securities of equivalent value) at a stated exchange ratio. A convertible security may also be called for redemption or conversion by the issuer after a particular date and under certain circumstances (including a specified price) established upon issue. If a convertible security held by the Fund is called for redemption or conversion, the Fund could be required to tender it for redemption, convert it into the underlying common stock, or sell it to a third party.

Convertible securities generally have less potential for gain or loss than common stocks. Convertible securities generally provide yields higher than the underlying common stocks, but generally lower than comparable non-convertible securities. Because of this higher yield, convertible securities generally sell at a price above their “conversion value,” which is the current market value of the stock to be received upon conversion. The difference between this conversion value and the price of convertible securities will vary over time depending on changes in the value of the underlying common stocks and interest rates. When the underlying common stocks decline in value, convertible securities will tend not to decline to the same extent because of the interest or dividend payments and the repayment of principal at maturity for certain types of convertible securities. However, securities that are convertible other than at the option of the holder generally do not limit the potential for loss to the same extent as

securities convertible at the option of the holder. When the underlying common stocks rise in value, the value of convertible securities may also be expected to increase. At the same time, however, the difference between the market value of convertible securities and their conversion value will narrow, which means that the value of convertible securities will generally not increase to the same extent as the value of the underlying common stocks. Because convertible securities may also be interest-rate sensitive, their value may increase as interest rates fall and decrease as interest rates rise. Convertible securities are also subject to credit risk, and are often lower-quality securities.

- **Master Limited Partnerships (“MLPs”).** MLPs are limited partnerships in which the ownership units are publicly traded. MLP units are registered with the U.S. Securities and Exchange Commission (the “SEC”) and are freely traded on a securities exchange or in the over-the-counter market. MLPs often own several properties or businesses (or own interests) that are related to real estate development and oil and gas industries, but they also may finance motion pictures, research and development and other projects. Generally, an MLP is operated under the supervision of one or more managing general partners. Limited partners are not involved in the day-to-day management of the partnership.

The risks of investing in an MLP are generally those involved in investing in a partnership as opposed to a corporation. For example, state law governing partnerships is often less restrictive than state law governing corporations. Accordingly, there may be fewer protections afforded investors in an MLP than investors in a corporation. Additional risks involved with investing in an MLP are risks associated with the specific industry or industries in which the partnership invests, such as the risks of investing in real estate, or the oil and gas industries.

- **Rights.** A right is a privilege granted to existing shareholders of a corporation to subscribe to shares of a new issue of common stock before it is issued. Rights normally have a short life of usually two to four weeks, are freely transferable and entitle the holder to buy the new common stock at a lower price than the public offering price. An investment in rights may entail greater risks than certain other types of investments. Generally, rights do not carry the right to receive dividends or exercise voting rights with respect to the underlying securities, and they do not represent any rights in the assets of the issuer. In addition, their value does not necessarily change with the value of the underlying securities, and they cease to have value if they are not exercised on or before their expiration date. Investing in rights increases the potential profit or loss to be realized from the investment as compared with investing the same amount in the underlying securities.

Exchange-Traded Notes (ETNs)

The Fund may invest in exchange-traded notes (“ETNs”). ETNs are senior, unsecured unsubordinated debt securities issued by an underwriting bank that are designed to provide returns that are linked to a particular benchmark less investor fees. ETNs have a maturity date and, generally, are backed only by the creditworthiness of the issuer. As a result, the value of an ETN may be influenced by time to maturity, level of supply and demand for the ETN, volatility and lack of liquidity in the underlying market (*e.g.*, the commodities market), changes in the applicable interest rates, and changes in the issuer’s credit rating and economic, legal, political or geographic events that affect the referenced market. ETNs also may be subject to credit risk.

It is expected that the issuer’s credit rating will be investment grade at the time of investment, however, the credit rating may be revised or withdrawn at any time and there is no assurance that a credit rating will remain in effect for any given time period. If a rating agency lowers the issuer’s credit rating or there is a decline in the perceived creditworthiness of the issuer, the value of the ETN will decline as a lower credit rating reflects a greater risk that the issuer will default on its obligation to ETN investors. The Fund must pay an investor fee when investing in an ETN, which will reduce the amount of return on investment at

maturity or upon redemption. There may be restrictions on the Fund's right to redeem its investment in an ETN, which is meant to be held until maturity. There are no periodic interest payments for ETNs, and principal typically is not protected. As is the case with other exchange-traded products, an investor could lose some of or the entire amount invested in ETNs. The Fund's decision to sell its ETN holdings may be limited by the availability of a secondary market.

Fixed Income Securities

The Fund intends to invest in fixed income securities. The market value of fixed income investments will change in response to interest rate changes and other factors. During periods of falling interest rates, the values of outstanding fixed income securities generally rise. Conversely, during periods of rising interest rates, the values of such securities generally decline. Moreover, while securities with longer maturities tend to produce higher yields, the prices of longer maturity securities are also subject to greater market fluctuations as a result of changes in interest rates. Changes by recognized agencies in the rating of any fixed income security and in the ability of an issuer to make payments of interest and principal also affect the value of these investments. Changes in the value of these securities will not necessarily affect cash income derived from these securities but will affect the Fund's NAV. Additional information regarding fixed income securities is described below:

- **Duration.** Duration is a measure of the expected change in value of a fixed income security for a given change in interest rates. For example, if interest rates changed by one percent, the value of a security having an effective duration of two years generally would vary by two percent. Duration takes the length of the time intervals between the present time and time that the interest and principal payments are scheduled, or in the case of a callable bond, expected to be received, and weighs them by the present values of the cash to be received at each future point in time.
- **Creditor Liability and Participation on Creditors' Committees.** Generally, when a fund holds bonds or other similar fixed income securities of an issuer, the fund becomes a creditor of the issuer. If the Fund is a creditor of an issuer it may be subject to challenges related to the securities that it holds, either in connection with the bankruptcy of the issuer or in connection with another action brought by other creditors of the issuer, shareholders of the issuer or the issuer itself. The Fund may from time to time participate on committees formed by creditors to negotiate with the management of financially troubled issuers of securities held by the Fund. Such participation may subject the Fund to expenses such as legal fees and may make the Fund an "insider" of the issuer for purposes of the federal securities laws, and therefore may restrict the Fund's ability to trade in or acquire additional positions in a particular security when it might otherwise desire to do so. Participation by the Fund on such committees also may expose the Fund to potential liabilities under the federal bankruptcy laws or other laws governing the rights of creditors and debtors. The Fund will participate on such committees only when the Sub-Advisor believes that such participation is necessary or desirable to enforce the Fund's rights as a creditor or to protect the value of securities held by the Fund. Further, the Sub-Advisor has the authority to represent the Trust, or the Fund, on creditors committees or similar committees and generally with respect to challenges related to the securities held by the Fund relating to the bankruptcy of an issuer or in connection with another action brought by other creditors of the issuer, shareholders of the issuer or the issuer itself.
- **Variable and Floating Rate Securities.** Variable and floating rate instruments involve certain obligations that may carry variable or floating rates of interest, and may involve a conditional or unconditional demand feature. Such instruments bear interest at rates which are not fixed, but which vary with changes in specified market rates or indices. The interest rates on these securities may be reset daily, weekly, quarterly, or some other reset period, and may have a set floor or ceiling on interest rate changes. There is a risk that the current interest rate on such obligations may not

accurately reflect existing market interest rates. A demand instrument with a demand notice exceeding seven days may be considered illiquid if there is no secondary market for such security.

- **Bank Obligations.** Bank obligations may include certificates of deposit, bankers' acceptances, and fixed time deposits. Certificates of deposit are negotiable certificates issued against funds deposited in a commercial bank for a definite period of time and earning a specified return. Bankers' acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are "accepted" by a bank, meaning, in effect, that the bank unconditionally agrees to pay the face value of the instrument on maturity. Fixed time deposits are bank obligations payable at a stated maturity date and bearing interest at a fixed rate. Fixed time deposits may be withdrawn on demand by the investor, but may be subject to early withdrawal penalties which vary depending upon market conditions and the remaining maturity of the obligation. There are no contractual restrictions on the right to transfer a beneficial interest in a fixed time deposit to a third party, although there is no market for such deposits. The Fund will not invest in fixed time deposits which: (1) are not subject to prepayment; or (2) provide for withdrawal penalties upon prepayment (other than overnight deposits) if, in the aggregate, more than 15% of its net assets would be invested in such deposits, repurchase agreements with remaining maturities of more than seven days and other illiquid assets. Subject to the Trust's limitation on concentration as described in the "Investment Restrictions" section below, there is no limitation on the amount of the Fund's assets which may be invested in obligations of foreign banks which meet the conditions set forth herein.

Obligations of foreign banks involve somewhat different investment risks than those affecting obligations of U.S. banks, including the possibilities that their liquidity could be impaired because of future political and economic developments, that their obligations may be less marketable than comparable obligations of U.S. banks, that a foreign jurisdiction might impose withholding taxes on interest income payable on those obligations, that foreign deposits may be seized or nationalized, that foreign governmental restrictions such as exchange controls may be adopted which might adversely affect the payment of principal and interest on those obligations and that the selection of those obligations may be more difficult because there may be less publicly available information concerning foreign banks or the accounting, auditing and financial reporting standards, practices and requirements applicable to foreign banks may differ from those applicable to United States banks. Foreign banks are not generally subject to examination by any United States Government agency or instrumentality.

Debt Securities. Fixed income securities are debt securities. A debt security is a security consisting of a certificate or other evidence of a debt (secured or unsecured) on which the issuing company or governmental body promises to pay the holder thereof a fixed, variable, or floating rate of interest for a specified length of time, and to repay the debt on the specified maturity date, as discussed above. Some debt securities, such as zero coupon bonds, do not make regular interest payments but are issued at a discount to their principal or maturity value. Debt securities include a variety of fixed income obligations, including, but not limited to, corporate debt securities, government securities, municipal securities, convertible securities, and mortgage-backed securities. Debt securities include investment-grade securities, non investment-grade securities, and unrated securities. Debt securities are subject to a variety of risks, such as interest rate risk, income risk, call/prepayment risk, inflation risk, credit risk, and currency risk.

- **Corporate Debt Securities.** The Fund may seek to invest in corporate debt securities representative of one or more high yield bond or credit derivative indices, which may change from time to time. Selection will generally be dependent on independent credit analysis or fundamental analysis performed by the Sub-Advisor. The Fund may invest in all grades of corporate debt securities including below investment-grade securities, as discussed below. See Appendix A for a description of corporate bond ratings. The Fund also may invest in unrated securities.

Corporate debt securities are typically fixed-income securities issued by businesses to finance their operations. Notes, bonds, debentures and commercial paper are the most common types of corporate debt securities. The primary differences between the different types of corporate debt securities are their maturities and secured or unsecured status. Commercial paper has the shortest term and is usually unsecured. The broad category of corporate debt securities includes debt issued by domestic or foreign companies of all kinds, including those with small-, mid- and large-capitalizations. Corporate debt may be rated investment grade or below investment grade and may carry variable or floating rates of interest.

Because of the wide range of types, and maturities, of corporate debt securities, as well as the range of creditworthiness of its issuers, corporate debt securities have widely varying potentials for return and risk profiles. For example, commercial paper issued by a large established domestic corporation that is rated investment-grade may have a modest return on principal, but carries relatively limited risk. On the other hand, a long-term corporate note issued by a small foreign corporation from an emerging market country that has not been rated may have the potential for relatively large returns on principal, but carries a relatively high degree of risk.

Corporate debt securities carry both credit risk and interest rate risk. Credit risk is the risk that a fund could lose money if the issuer of a corporate debt security is unable to pay interest or repay principal when it is due. Some corporate debt securities that are rated below investment-grade are generally considered speculative because they present a greater risk of loss, including default, than higher quality debt securities. The credit risk of a particular issuer's debt security may vary based on its priority for repayment. For example, higher ranking (senior) debt securities have a higher priority than lower ranking (subordinated) securities. This means that the issuer might not make payments on subordinated securities while continuing to make payments on senior securities. In addition, in the event of bankruptcy, holders of higher-ranking senior securities may receive amounts otherwise payable to the holders of more junior securities. Interest rate risk is the risk that the value of certain corporate debt securities will tend to fall when interest rates rise. In general, corporate debt securities with longer terms tend to fall more in value when interest rates rise than corporate debt securities with shorter terms.

- **Below Investment Grade Debt Securities.** The Fund may invest in below investment-grade securities. Non-investment-grade securities, also referred to as "high yield securities" or "junk bonds," are debt securities that are rated lower than the four highest rating categories by a nationally recognized statistical rating organization (for example, lower than Baa3 by Moody's Investors Service, Inc. ("Moody's") or lower than BBB- by Standard & Poor's Ratings Services ("S&P")) or are determined to be of comparable quality by the Fund's Sub-Advisor. These securities are generally considered to be, on balance, predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation and will generally involve more credit risk than securities in the investment-grade categories. Investment in these securities generally provides greater income and increased opportunity for capital appreciation than investments in higher quality securities, but they also typically entail greater price volatility and principal and income risk.

Analysis of the creditworthiness of issuers of high yield securities may be more complex than for issuers of investment-grade securities. Thus, reliance on credit ratings in making investment decisions entails greater risks for high yield securities than for investment-grade debt securities. The success of a fund's advisor in managing high yield securities is more dependent upon its own credit analysis than is the case with investment-grade securities.

Some high yield securities are issued by smaller, less-seasoned companies, while others are issued as part of a corporate restructuring, such as an acquisition, merger, or leveraged buyout. Companies that

issue high yield securities are often highly leveraged and may not have available to them more traditional methods of financing. Therefore, the risk associated with acquiring the securities of such issuers generally is greater than is the case with investment-grade securities. Some high yield securities were once rated as investment grade but have been downgraded to junk bond status because of financial difficulties experienced by their issuers.

The market values of high yield securities tend to reflect individual issuer developments to a greater extent than do investment-grade securities, which in general react to fluctuations in the general level of interest rates. High yield securities also tend to be more sensitive to economic conditions than are investment-grade securities. A projection of an economic downturn or of a period of rising interest rates, for example, could cause a decline in junk bond prices because the advent of a recession could lessen the ability of a highly leveraged company to make principal and interest payments on its debt securities. If an issuer of high yield securities defaults, in addition to risking payment of all or a portion of interest and principal, a fund investing in such securities may incur additional expenses to seek recovery.

The secondary market on which high yield securities are traded may be less liquid than the market for investment-grade securities. Less liquidity in the secondary trading market could adversely affect the ability of a fund to sell a high yield security or the price at which a fund could sell a high yield security, and could adversely affect the daily NAV of fund shares. When secondary markets for high yield securities are less liquid than the market for investment-grade securities, it may be more difficult to value the securities because such valuation may require more research, and elements of judgment may play a greater role in the valuation because there is less reliable, objective data available.

The Fund will not necessarily dispose of a security if a credit-rating agency downgrades the rating of the security below its rating at the time of purchase. However, the Sub-Advisor will monitor the investment to determine whether continued investment in the security is in the best interest of shareholders.

- **Unrated Debt Securities.** The Fund may invest in unrated debt securities. Unrated debt, while not necessarily lower in quality than rated securities, may not have as broad a market. Because of the size and perceived demand for the issue, among other factors, certain issuers may decide not to pay the cost of getting a rating for their bonds. The creditworthiness of the issuer, as well as any financial institution or other party responsible for payments on the security, will be analyzed to determine whether to purchase unrated bonds.
- **Asset-Backed Securities (“ABSs”).** ABSs are created from many types of assets, including auto loans, credit card receivables, home equity loans, and student loans. ABSs are issued through special purpose vehicles that are bankruptcy remote from the issuer of the collateral. The credit quality of an ABS transaction depends on the performance of the underlying assets. To protect ABS investors from the possibility that some borrowers could miss payments or even default on their loans, ABSs include various forms of credit enhancement.

Some ABSs, particularly home equity loan transactions, are subject to interest-rate risk and prepayment risk. A change in interest rates can affect the pace of payments on the underlying loans, which in turn, affects total return on the securities. ABSs also carry credit or default risk. If many borrowers on the underlying loans default, losses could exceed the credit enhancement level and result in losses to investors in an ABS transaction. Finally, ABSs have structure risk due to a unique characteristic known as early amortization, or early payout, risk. Built into the structure of most ABSs are triggers for early payout, designed to protect investors from losses. These triggers are unique to each transaction and can include: a big rise in defaults on the underlying loans, a sharp drop in the

credit enhancement level, or even the bankruptcy of the originator. Once early amortization begins, all incoming loan payments (after expenses are paid) are used to pay investors as quickly as possible based upon a predetermined priority of payment. Consistent with the Fund's investment objectives and policies, the Sub-Advisor also may invest in other types of asset-backed securities.

- **Mortgage-Related Securities.** The Fund may invest in mortgage-related securities. Mortgage-related securities are interests in pools of residential or commercial mortgage loans, including mortgage loans made by savings and loan institutions, mortgage bankers, commercial banks and others. Pools of mortgage loans are assembled as securities for sale to investors by various governmental, government-related and private organizations. The Fund also may invest in debt securities which are secured with collateral consisting of mortgage-related securities.

The recent financial downturn, particularly the increase in delinquencies and defaults on residential mortgages, falling home prices, and unemployment, has adversely affected the market for mortgage-related securities. In addition, various market and governmental actions may impair the ability to foreclose on or exercise other remedies against underlying mortgage holders, or may reduce the amount received upon foreclosure. These factors have caused certain mortgage-related securities to experience lower valuations and reduced liquidity. There is also no assurance that the U.S. government will take further action to support the mortgage-related securities industry, as it has in the past, should the economic downturn continue or the economy experience another downturn. Further, recent legislative action and any future government actions may significantly alter the manner in which the mortgage-related securities market functions. Each of these factors could ultimately increase the risk that the Fund could realize losses on mortgage-related securities.

- **Commercial Paper.** The Fund may invest in commercial paper. Commercial paper is a short-term obligation with a maturity ranging from one to 270 days issued by banks, corporations and other borrowers. Such investments are unsecured and usually discounted. The Fund may invest in commercial paper rated A-1 or A-2 by S&P or Prime-1 or Prime-2 by Moody's.
- **Inflation-Indexed Bonds.** The Fund may invest in inflation-indexed bonds, which are fixed income securities whose principal value is periodically adjusted according to the rate of inflation. Two structures are common. The U.S. Treasury and some other issuers use a structure that accrues inflation into the principal value of the bond. Most other issuers pay out the Consumer Price Index ("CPI") accruals as part of a semiannual coupon.

Inflation-indexed securities issued by the U.S. Treasury have maturities of five, ten or thirty years, although it is possible that securities with other maturities will be issued in the future. U.S. Treasury securities pay interest on a semi-annual basis, equal to a fixed percentage of the inflation-adjusted principal amount. For example, if the Fund purchased an inflation-indexed bond with a par value of \$1,000 and a 3% real rate of return coupon (payable 1.5% semi-annually), and inflation over the first six months was 1%, the mid-year par value of the bond would be \$1,010 and the first semi-annual interest payment would be \$15.15 (\$1,010 times 1.5%). If inflation during the second half of the year resulted in the whole year's inflation equaling 3%, the end-of-year par value of the bond would be \$1,030 and the second semi-annual interest payment would be \$15.45 (\$1,030 times 1.5%).

If the periodic adjustment rate measuring inflation falls, the principal value of inflation-indexed bonds will be adjusted downward, and consequently the interest payable on these securities (calculated with respect to a smaller principal amount) will be reduced. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds, even during a period of deflation. However, the current market value of the bonds is not guaranteed,

and will fluctuate. The Fund also may invest in other inflation related bonds which may or may not provide a similar guarantee. If a guarantee of principal is not provided, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

The value of inflation-indexed bonds is expected to change in response to changes in real interest rates. Real interest rates are tied to the relationship between nominal interest rates and the rate of inflation. Therefore, if inflation were to rise at a faster rate than nominal interest rates, real interest rates might decline, leading to an increase in value of inflation-indexed bonds. In contrast, if nominal interest rates increased at a faster rate than inflation, real interest rates might rise, leading to a decrease in value of inflation-indexed bonds.

While these securities are expected to be protected from long-term inflationary trends, short-term increases in inflation may lead to a decline in value. If interest rates rise due to reasons other than inflation (for example, due to changes in currency exchange rates), investors in these securities may not be protected to the extent that the increase is not reflected in the bond's inflation measure.

The periodic adjustment of U.S. inflation-indexed bonds is tied to the Consumer Price Index for All Urban Consumers ("CPI-U"), which is calculated monthly by the U.S. Bureau of Labor Statistics. The CPI-U is a measurement of changes in the cost of living, made up of components such as housing, food, transportation and energy. Inflation-indexed bonds issued by a foreign government are generally adjusted to reflect a comparable inflation index, calculated by that government. There can be no assurance that the CPI-U or any foreign inflation index will accurately measure the real rate of inflation in the prices of goods and services. Moreover, there can be no assurance that the rate of inflation in a foreign country will be correlated to the rate of inflation in the United States.

Any increase in the principal amount of an inflation-indexed bond will be considered taxable ordinary income, even though investors do not receive their principal until maturity.

Foreign Issuers

The Fund may invest in issuers located outside the United States directly, or in financial instruments, exchange-traded funds ("ETFs"), or other exchange-traded products (collectively, with ETFs, "ETPs") that are indirectly linked to the performance of foreign issuers. Other examples of such financial instruments include ADRs, Global Depositary Receipts ("GDRs"), European Depositary Receipts ("EDRs"), International Depositary Receipts ("IDRs"), "ordinary shares," and "New York shares" issued and traded in the U.S. ADRs are U.S. dollar denominated receipts typically issued by U.S. banks and trust companies that evidence ownership of underlying securities issued by a foreign issuer. The underlying securities may not necessarily be denominated in the same currency as the securities into which they may be converted. The underlying securities are held in trust by a custodian bank or similar financial institution in the issuer's home country. The depositary bank may not have physical custody of the underlying securities at all times and may charge fees for various services, including forwarding dividends and interest and corporate actions. Generally, ADRs in registered form are designed for use in domestic securities markets and are traded on exchanges or over-the-counter in the U.S. GDRs, EDRs, and IDRs are similar to ADRs in that they are certificates evidencing ownership of shares of a foreign issuer, however, GDRs, EDRs, and IDRs may be issued in bearer form and denominated in other currencies, and are generally designed for use in specific or multiple securities markets outside the U.S. EDRs, for example, are designed for use in European securities markets while GDRs are designed for use throughout the world. Ordinary shares are shares of foreign issuers that are traded abroad and on a U.S. exchange. New York shares are shares that a foreign issuer has allocated for trading in the U.S. ADRs, ordinary shares, and New York shares all may be purchased with and sold for U.S. dollars, which protects the Fund from the foreign settlement risks described below.

Depository receipts may be sponsored or unsponsored. Although the two types of depository receipt facilities (unsponsored or sponsored) are similar, there are differences regarding a holder's rights and obligations and the practices of market participants. A depository may establish an unsponsored facility without participation by (or acquiescence of) the underlying issuer; typically, however, the depository requests a letter of non-objection from the underlying issuer prior to establishing the facility. Holders of unsponsored depository receipts generally bear all the costs of the facility. The depository usually charges fees upon the deposit and withdrawal of the underlying securities, the conversion of dividends into U.S. dollars or other currency, the disposition of non-cash distributions, and the performance of other services. The depository of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the underlying issuer or to pass through voting rights to depository receipt holders with respect to the underlying securities.

Sponsored depository receipt facilities are created in generally the same manner as unsponsored facilities, except that sponsored depository receipts are established jointly by a depository and the underlying issuer through a deposit agreement. The deposit agreement sets out the rights and responsibilities of the underlying issuer, the depository, and the depository receipt holders. With sponsored facilities, the underlying issuer typically bears some of the costs of the depository receipts (such as dividend payment fees of the depository), although most sponsored depository receipts holders may bear costs such as deposit and withdrawal fees. Depositories of most sponsored depository receipts agree to distribute notices of shareholder meetings, voting instructions, and other shareholder communications and information to the depository receipt holders at the underlying issuer's request.

Investing in foreign issuers may involve risks not typically associated with investing in issuers domiciled in the U.S. The value of securities denominated in foreign currencies, and of dividends from such securities, can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar. Foreign securities markets generally have less trading volume and less liquidity than U.S. markets, and prices in some foreign markets can be very volatile. Many foreign countries lack uniform accounting and disclosure standards comparable to those that apply to U.S. companies, and it may be more difficult to obtain reliable information regarding a foreign issuer's financial condition and operations. In addition, the costs of foreign investing, including withholding taxes, brokerage commissions, and custodial fees, generally are higher than for U.S. investments.

Investing in companies located abroad also carries political and economic risks distinct from those associated with investing in the U.S. Foreign investment may be affected by actions of foreign governments adverse to the interests of U.S. investors, including the possibility of seizure, expropriation or nationalization of assets, including foreign deposits, confiscatory taxation, restrictions on U.S. investment, or on the ability to repatriate assets or to convert currency into U.S. dollars. There may be a greater possibility of default by foreign governments or foreign-government sponsored enterprises. Investments in foreign countries also involve a risk of local political, economic, or social instability, military action or unrest, or adverse diplomatic developments.

Futures and Options Transactions

Futures and Options on Futures. The Fund may buy and sell futures contracts, which provide for the future sale by one party and purchase by another party of a specified amount of a specific security at a specified future time and at a specified price. An option on a futures contract gives the purchaser the right, in exchange for a premium, to assume a position in a futures contract at a specified exercise price during the term of the option. The Fund will reduce the risk that it will be unable to close out a futures contract by only entering into futures contracts that are traded on a national futures exchange regulated by the Commodities Futures Trading Commission ("CFTC"). The Fund may use futures contracts and related

options for *bona fide* hedging; attempting to offset changes in the value of securities held or expected to be acquired or be disposed of; attempting to gain exposure to a particular market, index or instrument; or other risk management purposes. To the extent the Fund invests in futures, options on futures or other instruments subject to regulation by the CFTC, it will do so in reliance on and in accordance with CFTC Regulation 4.5. The Trust, on behalf of certain of its series, has filed a notice of eligibility for exclusion from the definition of the term “commodity pool operator” in accordance with CFTC Regulation 4.5. Therefore, the Fund is not deemed to be a “commodity pool”, and the Advisor is not deemed to be a “commodity pool operator” with respect to the Fund, under the Commodity Exchange Act (“CEA”) and they are not subject to registration or regulation as such under the CEA. The Fund reserves the right to engage in transactions involving futures, options thereon and swaps to the extent allowed by CFTC regulations in effect from time to time and in accordance with the Fund’s policies.

The Fund may buy and sell index futures contracts with respect to any index that is traded on a recognized exchange or board of trade. An index futures contract is a bilateral agreement pursuant to which two parties agree to take or make delivery of an amount of cash equal to a specified dollar amount times the difference between the index value at the close of trading of the contract and the price at which the futures contract is originally struck. No physical delivery of the securities comprising the index is made. Instead, settlement in cash must occur upon the termination of the contract, with the settlement being the difference between the contract price, and the actual level of the stock index at the expiration of the contract. Generally, contracts are closed out prior to the expiration date of the contract.

When the Fund purchases or sells a futures contract, or sells an option thereon, the Fund is required to “cover” its position in order to limit leveraging and related risks. To cover its position, the Fund may maintain with its custodian bank (and marked-to-market on a daily basis), a segregated account consisting of cash or liquid securities that, when added to any amounts deposited with a futures commission merchant as margin, are equal to the market value of the futures contract or otherwise “cover” its position in a manner consistent with the 1940 Act or the rules and SEC interpretations thereunder. If the Fund continues to engage in the described securities trading practices and properly segregates assets, the segregated account will function as a practical limit on the amount of leverage which the Fund may undertake and on the potential increase in the speculative character of the Fund’s outstanding portfolio securities. Additionally, such segregated accounts will generally assure the availability of adequate funds to meet the obligations of the fund arising from such investment activities.

The Fund may also cover its long position in a futures contract by purchasing a put option on the same futures contract with a strike price (*i.e.*, an exercise price) as high or higher than the price of the futures contract. In the alternative, if the strike price of the put is less than the price of the futures contract, the Fund will maintain, in a segregated account, cash or liquid securities equal in value to the difference between the strike price of the put and the price of the futures contract. The Fund may also cover its long position in a futures contract by taking a short position in the instruments underlying the futures contract, or by taking positions in instruments with prices which are expected to move relatively consistently with the futures contract. The Fund may cover its short position in a futures contract by taking a long position in the instruments underlying the futures contracts, or by taking positions in instruments with prices which are expected to move relatively consistently with the futures contract.

The Fund may cover its sale of a call option on a futures contract by taking a long position in the underlying futures contract at a price less than or equal to the strike price of the call option. In the alternative, if the long position in the underlying futures contract is established at a price greater than the strike price of the written (sold) call, the Fund will maintain, in a segregated account, cash or liquid securities equal in value to the difference between the strike price of the call and the price of the futures contract. The Fund may also cover its sale of a call option by taking positions in instruments with prices which are expected to move relatively consistently with the call option. The Fund may cover its sale of a

put option on a futures contract by taking a short position in the underlying futures contract at a price greater than or equal to the strike price of the put option, or, if the short position in the underlying futures contract is established at a price less than the strike price of the written put, the Fund will maintain, in a segregated account, cash or liquid securities equal in value to the difference between the strike price of the put and the price of the futures contract. The Fund may also cover its sale of a put option by taking positions in instruments with prices which are expected to move relatively consistently with the put option.

There are significant risks associated with the Fund's use of futures contracts and related options, including the following: (1) the success of a hedging strategy may depend on the Sub-Advisor's ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) there may be an imperfect or no correlation between the changes in market value of the securities held by the Fund and the prices of futures and options on futures; (3) there may not be a liquid secondary market for a futures contract or option; (4) trading restrictions or limitations may be imposed by an exchange; and (5) government regulations may restrict trading in futures contracts and options on futures. In addition, some strategies reduce the Fund's exposure to price fluctuations, while others tend to increase its market exposure.

Other Options. The Fund may write (sell) and purchase put and call options on indices and enter into related closing transactions. A put option on a security gives the purchaser of the option the right to sell, and the writer of the option the obligation to buy, the underlying security at any time during the option period. A call option on a security gives the purchaser of the option the right to buy, and the writer of the option the obligation to sell, the underlying security at any time during the option period. The premium paid to the writer is the consideration for undertaking the obligations under the option contract.

Put and call options on indices are similar to options on securities except that options on an index give the holder the right to receive, upon exercise of the option, an amount of cash if the closing level of the underlying index is greater than (or less than, in the case of puts) the exercise price of the option. This amount of cash is equal to the difference between the closing price of the index and the exercise price of the option, expressed in dollars multiplied by a specified number. Thus, unlike options on individual securities, all settlements are in cash, and gain or loss depends on price movements in the particular market represented by the index generally, rather than the price movements in individual securities.

All options written on indices or securities must be covered. The SEC staff has indicated that a written call option on a security may be covered if a fund (1) owns the security underlying the call until the option is exercised or expires, (2) holds an American-style call on the same security as the call written with an exercise price (i) no greater than the exercise price of the call written or (ii) greater than the exercise price of the call written if the difference is maintained by the fund in cash or other liquid assets designated on the fund's records or placed in a segregated account with the fund's custodian, (3) has an absolute and immediate right to acquire the security without additional cost (or if additional consideration is required, cash or other liquid assets in such amount have been segregated), or (4) segregates cash or other liquid assets on the fund's records or with the custodian in an amount equal to (when added to any margin on deposit) the current market value of the call option, but not less than the exercise price, marked to market daily. If the call option is exercised by the purchaser during the option period, the seller is required to deliver the underlying security against payment of the exercise price or pay the difference. The seller's obligation terminates upon expiration of the option period or when the seller executes a closing purchase transaction with respect to such option.

All put options written by the Fund will be covered by: (1) segregating cash, cash equivalents, such as U.S. Treasury securities or overnight repurchase agreements, or other liquid assets on the Fund's records or with the custodian having a value at least equal to exercise price of the option (less cash received, if any); or (2) holding a put option on the same security as the option written where the exercise price of the

written put option is (i) equal to or higher than the exercise price of the option written or (ii) less than the exercise price of the option written provided the Fund segregates cash or other liquid assets in the amount of the difference.

The Fund may trade put and call options on securities, securities indices and currencies, as the Sub-Advisor determines is appropriate in seeking the Fund's investment objective, and except as restricted by the Fund's investment limitations.

The initial purchase (sale) of an option contract is an "opening transaction." In order to close out an option position, the Fund may enter into a "closing transaction," which is simply the purchase of an option contract on the same security with the same exercise price and expiration date as the option contract originally opened. If the Fund is unable to effect a closing purchase transaction with respect to an option it has written, it will not be able to sell the underlying security until the option expires or the Fund delivers the security upon exercise.

The Fund may purchase put and call options on securities to protect against a decline in the market value of the securities in its portfolio or to anticipate an increase in the market value of securities that the Fund may seek to purchase in the future. The Fund purchasing put and call options pays a premium; therefore, if price movements in the underlying securities are such that exercise of the options would not be profitable for the Fund, loss of the premium paid may be offset by an increase in the value of the Fund's securities or by a decrease in the cost of acquisition of securities by the Fund.

The Fund may write covered call options on securities as a means of increasing the yield on its assets and as a means of providing limited protection against decreases in its market value. When the Fund writes an option, if the underlying securities do not increase or decrease to a price level that would make the exercise of the option profitable to the holder thereof, the option generally will expire without being exercised and the Fund will realize as profit the premium received for such option. When a call option of which the Fund is the writer is exercised, the Fund will be required to sell the underlying securities to the option holder at the strike price, and will not participate in any increase in the price of such securities above the strike price. When a put option of which the Fund is the writer is exercised, the Fund will be required to purchase the underlying securities at a price in excess of the market value of such securities.

The Fund may purchase and write options on an exchange or over-the-counter. OTC options differ from exchange traded options in several respects. They are transacted directly with dealers and not with a clearing corporation, and therefore entail the risk of non-performance by the dealer. OTC options are available for a greater variety of securities and for a wider range of expiration dates and exercise prices than are available for exchange traded options. Because OTC options are not traded on an exchange, pricing is done normally by reference to information from a market maker. It is the SEC's position that OTC options are generally illiquid.

The market value of an option generally reflects the market price of an underlying security. Other principal factors affecting market value include supply and demand, interest rates, the pricing volatility of the underlying security and the time remaining until the expiration date.

Risks associated with options transactions include: (1) the success of a hedging strategy may depend on an ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) there may be an imperfect correlation between the movement in prices of options and the securities underlying them; (3) there may not be a liquid secondary market for options; and (4) while the Fund will receive a premium when it writes covered call options, it may not participate fully in a rise in the market value of the underlying security.

Hybrid Instruments

The Fund may invest in hybrid instruments. A hybrid instrument is a type of potentially high-risk derivative that combines a traditional stock, bond, or commodity with an option or forward contract. Generally, the principal amount, amount payable upon maturity or redemption, or interest rate of a hybrid is tied (positively or negatively) to the price of some security, commodity, currency or securities index or another interest rate or some other economic factor (each a “benchmark”). The interest rate or (unlike most fixed income securities) the principal amount payable at maturity of a hybrid security may be increased or decreased, depending on changes in the value of the benchmark. An example of a hybrid instrument could be a bond issued by an oil company that pays a small base level of interest with additional interest that accrues in correlation with the extent to which oil prices exceed a certain predetermined level. Such a hybrid instrument would be a combination of a bond and a call option on oil.

Hybrid instruments can be used as an efficient means of pursuing a variety of investment goals, including currency hedging, and increased total return. Hybrid instruments may not bear interest or pay dividends. The value of a hybrid instrument or its interest rate may be a multiple of a benchmark and, as a result, may be leveraged and move (up or down) more steeply and rapidly than the benchmark. These benchmarks may be sensitive to economic and political events, such as commodity shortages and currency devaluations, which cannot be readily foreseen by the purchaser of a hybrid instrument. Under certain conditions, the redemption value of a hybrid instrument could be zero. Thus, an investment in a hybrid instrument may entail significant market risks that are not associated with a similar investment in a traditional, U.S. dollar-denominated bond that has a fixed principal amount and pays a fixed rate or floating rate of interest. The purchase of a hybrid instrument also exposes the Fund to the credit risk of the issuer of the hybrid instrument. These risks may cause significant fluctuations in the NAV of a Fund.

Certain hybrid instruments may provide exposure to the commodities markets. These are derivative securities with one or more commodity-linked components that have payment features similar to commodity futures contracts, commodity options, or similar instruments. Commodity-linked hybrid instruments may be either equity or debt securities, and are considered hybrid instruments because they have both security and commodity-like characteristics. A portion of the value of these instruments may be derived from the value of a commodity, futures contract, index or other economic variable. The Fund will only invest in commodity-linked hybrid instruments that qualify, under applicable rules of the CFTC, for an exemption from the provisions of the CEA.

Certain issuers of structured products, such as hybrid instruments, may be deemed to be investment companies as defined in the 1940 Act. As a result, the Fund’s investments in these products may be subject to limits applicable to investments in investment companies and may be subject to restrictions contained in the 1940 Act.

Structured Notes. The Fund may invest in structured notes, which are debt obligations that also contain an embedded derivative component with characteristics that adjust the obligation’s risk/return profile. Generally, the performance of a structured note will track that of the underlying debt obligation and the derivative embedded within it. The Fund have the right to receive periodic interest payments from the issuer of the structured notes at an agreed-upon interest rate and a return of the principal at the maturity date.

Structured notes are typically privately negotiated transactions between two or more parties. The Fund bears the risk that the issuer of the structured note will default or become bankrupt which may result in the loss of principal investment and periodic interest payments expected to be received for the duration of its investment in the structured notes.

In the case of structured notes on credit default swaps, the Fund is also subject to the credit risk of the corporate credits underlying the credit default swaps. If one of the underlying corporate credits defaults, the Fund may receive the security that has defaulted, or alternatively a cash settlement may occur, and the Fund's principal investment in the structured note would be reduced by the corresponding face value of the defaulted security.

The market for structured notes may be, or suddenly can become, illiquid. The other parties to the transaction may be the only investors with sufficient understanding of the derivative to be interested in bidding for it. Changes in liquidity may result in significant, rapid, and unpredictable changes in the prices for structured notes. In certain cases, a market price for a credit-linked security may not be available. The collateral for a structured note may be one or more credit default swaps, which are subject to additional risks. See "Swap Agreements" for a description of additional risks associated with credit default swaps.

Illiquid Securities

The Fund may invest up to an aggregate amount of 15% of its net assets in illiquid securities (calculated at the time of investment), including Rule 144A securities. The Fund will monitor its portfolio liquidity on an ongoing basis to determine whether, in light of current circumstances, an adequate level of liquidity is being maintained, and will consider taking appropriate steps in order to maintain adequate liquidity if, through a change in values, net assets, or other circumstances, more than 15% of the Fund's net assets are invested in illiquid securities. Illiquid securities include securities subject to contractual or other restrictions on resale and other instruments that lack readily available markets as determined in accordance with SEC guidance.

A portfolio security is illiquid if it cannot be disposed of in the ordinary course of business within seven days at approximately the value ascribed to it by the Fund. Under the current guidelines of the staff of the SEC, illiquid securities also are considered to include, among other securities, purchased OTC options, certain cover for OTC options, repurchase agreements with maturities in excess of seven days, and certain securities whose disposition is restricted under the federal securities laws. The Fund may not be able to sell illiquid securities when the Sub-Advisor considers it desirable to do so or may have to sell such securities at a price that is lower than the price that could be obtained if the securities were more liquid. In addition, the sale of illiquid securities also may require more time and may result in higher dealer discounts and other selling expenses than does the sale of securities that are not illiquid. Illiquid securities also may be more difficult to value due to the unavailability of reliable market quotations for such securities, and investment in illiquid securities may have an adverse impact on NAV.

Investments in Other Investment Companies

The Fund may invest in the securities of other investment companies to the extent that such an investment would be consistent with the requirements of Section 12(d)(1) of the 1940 Act, or any rule, regulation or order of the SEC or interpretation thereof. Generally, a fund may invest in the securities of another investment company (the "acquired company") provided that the fund, immediately after such purchase or acquisition, does not own in the aggregate (i) more than 3% of the total outstanding voting stock of the acquired company, (ii) securities issued by the acquired company having an aggregate value in excess of 5% of the value of the total assets of the fund, or (iii) securities issued by the acquired company and all other investment companies (other than U.S. Treasury stock of the fund) having an aggregate value in excess of 10% of the value of the total assets of the fund. A fund also may invest in the securities of other investment companies if the fund is part of a "master-feeder" structure or operates as a fund of funds in compliance with Section 12(d)(1)(E), (F) and (G) and the rules thereunder. Section 12(d)(1)(B) prohibits another investment company from selling its shares to the fund if, after the sale (i) the fund owns more than 3% of the other investment company's voting stock or (ii) the fund and other investment companies, and companies controlled by them, own more than 10% of the voting stock of such other investment company. The Trust has entered into agreements with several unaffiliated ETFs that permit, pursuant to an

SEC order, the Fund to purchase shares of those ETFs beyond the Section 12(d)(1) limits described above. The Fund will only make such investments in conformity with the requirements of Subchapter M of the Internal Revenue Code of 1986, as amended (the “Internal Revenue Code”).

If the Fund invests in, and thus, is a shareholder of, another investment company, the Fund’s shareholders will indirectly bear the Fund’s proportionate share of the fees and expenses paid by such other investment company, including advisory fees, in addition to both the management fees payable directly by the Fund to the Fund’s own investment advisor and the other expenses that the Fund bears directly in connection with the Fund’s own operations.

Consistent with the restrictions discussed above, the Fund may invest in several different types of investment companies from time to time, including mutual funds, ETFs, closed-end funds, and business development companies (“BDCs”), when the Advisor or Sub-Advisor believes such an investment is in the best interests of the Fund and its shareholders. For example, the Fund may elect to invest in another investment company when such an investment presents a more efficient investment option than buying securities individually. The Fund also may invest in investment companies that are included as components of an index, such as BDCs, to seek to track the performance of that index. A BDC is a less common type of closed-end investment company that more closely resembles an operating company than a typical investment company. BDCs generally focus on investing in, and providing managerial assistance to, small, developing, financially troubled, private companies or other companies that may have value that can be realized over time and with management assistance. Similar to an operating company, a BDC’s total annual operating expense ratio typically reflects all of the operating expenses incurred by the BDC, and is generally greater than the total annual operating expense ratio of a mutual fund that does not bear the same types of operating expenses. However, as a shareholder of a BDC, the Fund does not directly pay for a portion of all of the operating expenses of the BDC, just as a shareholder of computer manufacturer does not directly pay for the cost of labor associated with producing such computers. As a result, when the Fund invests in a BDC, its Total Annual Fund Operating Expenses will be effectively overstated by an amount equal to the Acquired Fund Fees and Expenses. Acquired Fund Fees and Expenses are not included as an operating expense of the Fund in the Fund’s financial statements, which more accurately reflect the Fund’s actual operating expenses.

Investment companies may include index-based investments, such as ETFs that hold substantially all of their assets in securities representing a specific index. The main risk of investing in index-based investments is the same as investing in a portfolio of equity securities comprising the index. The market prices of index-based investments will fluctuate in accordance with both changes in the market value of their underlying portfolio securities and due to supply and demand for the instruments on the exchanges on which they are traded (which may result in their trading at a discount or premium to their NAVs). Index-based investments may not replicate exactly the performance of their specific index because of transaction costs and the temporary unavailability of certain component securities of the index.

The Fund may invest in index-based ETFs as well as ETFs that are actively managed.

The Fund may invest in closed-end funds. Closed-end funds are pooled investment vehicles that are registered under the 1940 Act and whose shares are listed and traded on U.S. national securities exchanges. Like any stock, a closed-end fund’s share price will fluctuate in response to market conditions and other factors. Secondary market trading prices of closed-end funds should be expected to fluctuate and such prices may be higher (*i.e.*, at a premium) or lower (*i.e.*, at a discount) than the net asset value of a closed-end fund’s portfolio holdings. Closed-end fund shares frequently trade at persistent and ongoing discounts to the net asset value of the closed-end fund’s portfolio investments. There can be no guarantee that shares of a closed-end fund held by the Fund will not trade at a persistent and ongoing discount. Nor can there be any guarantee that an active market in shares of the closed-end funds held by the Fund will exist. The Fund

may not be able to sell closed-end fund shares at a price equal to the net asset value of the closed-end fund. While the Fund seeks to take advantage of differences between the net asset value of closed-end fund shares and any secondary market premiums or discounts, the Fund may not be able to do so. In addition, there can be no assurance that any closed-end fund will achieve its stated investment objective. While the Fund, when investing in closed-end funds, attempts to diversify its exposure to such investments, lackluster performance of a single closed-end fund can have a negative impact on the performance of the Fund as a whole. The Fund may lose money on its investment in any closed-end fund which, in turn, may cause investors to lose money on an investment in the Fund.

Lending of Portfolio Securities

The Fund may lend portfolio securities to brokers, dealers and other financial organizations that meet capital and other credit requirements or other criteria established by the Fund's Board. These loans, if and when made, may not exceed 33¹/₃% of the total asset value of the Fund (including the loan collateral). The Fund will not lend portfolio securities to the Advisor, Sub-Advisor, or their affiliates, unless it has applied for and received specific authority to do so from the SEC. Loans of portfolio securities will be fully collateralized by cash, letters of credit or U.S. government securities, and the collateral will be maintained in an amount equal to at least 100% of the current market value of the loaned securities by marking to market daily. Any gain or loss in the market price of the securities loaned that might occur during the term of the loan would be for the account of the Fund. The Fund may pay a part of the interest earned from the investment of collateral, or other fee, to an unaffiliated third-party for acting as the Fund's securities lending agent. By lending its securities, the Fund may increase its income by receiving payments from the borrower that reflect the amount of any interest or any dividends payable on the loaned securities, as well as by either investing cash collateral received from the borrower in short-term instruments or obtaining a fee from the borrower when U.S. government securities or letters of credit are used as collateral.

The Fund will adhere to the following conditions whenever its portfolio securities are loaned: (i) the Fund must receive at least 100% cash collateral or equivalent securities of the type discussed in the preceding paragraph from the borrower; (ii) the borrower must increase such collateral whenever the market value of the securities rises above the level of such collateral; (iii) the Fund must be able to terminate the loan on demand; (iv) the Fund must receive reasonable interest on the loan, as well as any dividends, interest or other distributions on the loaned securities and any increase in market value; (v) the Fund may pay only reasonable fees in connection with the loan (which fees may include fees payable to the lending agent, the borrower, the Fund's administrator and the custodian); and (vi) voting rights on the loaned securities may pass to the borrower, provided, however, that if a material event adversely affecting the investment occurs, the Fund must terminate the loan and regain the right to vote the securities. The Fund's securities lending arrangements are subject to Board approval. In addition, to the extent the Fund engages in securities lending, the Board has adopted procedures that are reasonably designed to ensure that the foregoing criteria will be met. Loan agreements involve certain risks in the event of default or insolvency of the borrower, including possible delays or restrictions upon the Fund's ability to recover the loaned securities or dispose of the collateral for the loan, which could give rise to loss because of adverse market action, expenses and/or delays in connection with the disposition of the underlying securities.

Pooled Investment Vehicles

The Fund may invest in the securities of pooled vehicles that are not investment companies and, thus, not required to comply with the provisions of the 1940 Act. As a result, as a shareholder of such pooled vehicles, the Fund will not have all of the investor protections afforded by the 1940 Act. Such pooled vehicles may, however, be required to comply with the provisions of other federal securities laws, such as the Securities Act. These pooled vehicles typically hold commodities, such as gold or oil, currency, or other property that is itself not a security. If the Fund invests in, and thus, is a shareholder of, a pooled vehicle, the Fund's shareholders will indirectly bear the Fund's proportionate share of the fees and

expenses paid by the pooled vehicle, including any applicable management fees, in addition to both the management fees payable directly by the Fund to the Advisor and the other expenses that the Fund bears directly in connection with its own operations.

The Fund may invest in certain ETFs or other ETPs that are not taxable as regulated investment companies (“RICs”). These non-RIC ETPs may produce non-qualifying income for purposes of the “90% Test” (as defined below), which must be met in order for the Fund to maintain its status as a RIC under the Internal Revenue Code. If one or more of these non-RIC ETPs generates more non-qualifying income for purposes of the 90% Test than the Fund’s portfolio management expects, this non-qualifying income may be attributed to the Fund and could cause the Fund to inadvertently fail the 90% Test, thereby causing the Fund to inadvertently fail to qualify as a RIC under the Internal Revenue Code.

Portfolio Turnover

Portfolio turnover may vary from year to year, as well as within a year. Generally, the higher the Fund’s rate of portfolio turnover, the higher the transaction costs borne by the Fund and its long-term shareholders. In addition, the Fund’s portfolio turnover level may adversely affect the ability of the Fund to achieve its investment objective. Because the Fund’s portfolio turnover rate, to a great extent, will depend on the creation and redemption activity of investors, it is difficult to estimate what the Fund’s actual portfolio turnover rate will be in the future.

“Portfolio Turnover Rate” is defined under the rules of the SEC as the lesser of the value of the securities purchased or of the securities sold, excluding all securities whose maturities at the time of acquisition were one-year or less, divided by the average monthly value of such securities owned during the year. Based on this definition, instruments with a remaining maturity of less than one-year are excluded from the calculation of the portfolio turnover rate. Instruments excluded from the calculation of portfolio turnover generally would include the futures contracts and options contracts in which the Fund invests since such contracts generally have a remaining maturity of less than one year.

Real Estate Investment Trusts (REITs)

The Fund may invest in shares of REITs. REITs are pooled investment vehicles which invest primarily in real estate or real estate related loans. REITs are generally classified as equity REITs, mortgage REITs or a combination of equity and mortgage REITs. Equity REITs invest the majority of their assets directly in real property and derive income primarily from the collection of rents. Equity REITs can also realize capital gains by selling properties that have appreciated in value. Mortgage REITs invest the majority of their assets in real estate mortgages and derive income from the collection of interest payments. Like RICs such as the Fund, REITs are not taxed on income distributed to shareholders provided they comply with certain requirements under the Internal Revenue Code. The Fund will indirectly bear its proportionate share of any expenses paid by REITs in which the Fund invests in addition to the expenses paid by the Fund. Investing in REITs involves certain unique risks. Equity REITs may be affected by changes in the value of the underlying property owned by such REITs, while mortgage REITs may be affected by the quality of any credit extended. REITs are dependent upon management skills, are not diversified (except to the extent the Internal Revenue Code requires), and are subject to the risks of financing projects. REITs are subject to heavy cash flow dependency, default by borrowers, self-liquidation, and the possibilities of failing to qualify for the exemption from tax for distributed income under the Internal Revenue Code and failing to maintain their exemptions from registration under the 1940 Act. REITs (especially mortgage REITs) are also subject to interest rate risks.

Investing in foreign real estate companies makes the Fund more susceptible to risks associated with the ownership of real estate and with the real estate industry in general. In addition, foreign real estate companies depend upon specialized management skills, may not be diversified, may have less trading

volume, and may be subject to more abrupt or erratic price movements than the overall securities markets. Foreign real estate companies have their own expenses, and the Fund will bear a proportionate share of those expenses.

Repurchase Agreements

The Fund may enter into repurchase agreements with financial institutions, which may be deemed to be loans. The Fund follows certain procedures designed to minimize the risks inherent in such agreements. These procedures include effecting repurchase transactions only with large, well-capitalized and well-established financial institutions whose condition will be continually monitored by the Sub-Advisor. In addition, the value of the collateral underlying the repurchase agreement will always be at least equal to the repurchase price, including any accrued interest earned on the repurchase agreement. In the event of a default or bankruptcy by a selling financial institution, the Fund will seek to liquidate such collateral. However, the exercising of the Fund's right to liquidate such collateral could involve certain costs or delays and, to the extent that proceeds from any sale upon a default of the obligation to repurchase were less than the repurchase price, the Fund could suffer a loss. It is the current policy of the Fund not to invest in repurchase agreements that do not mature within seven days if any such investment, together with any other illiquid assets held by the Fund, amounts to more than 15% of the Fund's net assets. The investments of the Fund in repurchase agreements, at times, may be substantial when, in the view of the Sub-Advisor, liquidity or other considerations so warrant.

Reverse Repurchase Agreements

The Fund may enter into reverse repurchase agreements without limit as part of the Fund's investment strategy. However, the Fund does not expect to engage, under normal circumstances, in reverse repurchase agreements with respect to more than 33 ¹/₃% of its assets. Reverse repurchase agreements involve sales of portfolio assets by the Fund concurrently with an agreement by the Fund to repurchase the same assets at a later date at a fixed price. Generally, the effect of such a transaction is that the Fund can recover all or most of the cash invested in the portfolio securities involved during the term of the reverse repurchase agreement, while the Fund will be able to keep the interest income associated with those portfolio securities. Such transactions are advantageous only if the interest cost to the Fund of the reverse repurchase transaction is less than the cost of obtaining the cash otherwise. Opportunities to achieve this advantage may not always be available, and the Fund intends to use the reverse repurchase technique only when it will be advantageous to the Fund. The Fund will establish a segregated account with the Trust's custodian bank in which the Fund will maintain cash, cash equivalents or other portfolio securities equal in value to the Fund's obligations in respect of reverse repurchase agreements. Such reverse repurchase agreements could be deemed to be a borrowing, but are not senior securities.

Short Sales

The Fund may engage in short sales transactions in which the Fund sells a security it does not own. To complete such a transaction, the Fund must borrow or otherwise obtain the security to make delivery to the buyer. The Fund then is obligated to replace the security borrowed by purchasing the security at the market price at the time of replacement. The price at such time may be more or less than the price at which the security was sold by the Fund. Until the security is replaced, the Fund is required to pay to the lender amounts equal to any dividends or interest, which accrue during the period of the loan. To borrow the security, the Fund also may be required to pay a premium, which would increase the cost of the security sold. The Fund may also use repurchase agreements to satisfy delivery obligations in short sales transactions. The proceeds of the short sale will be retained by the broker, to the extent necessary to meet the margin requirements, until the short position is closed out.

Until the Fund closes its short position or replaces the borrowed security, the Fund will: (a) maintain a segregated account containing cash or liquid securities at such a level that (i) the amount deposited in the account plus the amount deposited with the broker as collateral will equal the current value of the security sold short and (ii) the amount deposited in the segregated account plus the amount deposited with the broker as collateral will not be less than the market value of the security at the time the security was sold short; or (b) otherwise cover the Fund's short position. The Fund may use up to 100% of its portfolio to engage in short sales transactions and collateralize its open short positions.

Swap Agreements

The Fund may enter into swap agreements, including, but not limited to, total return swaps, index swaps, and interest rate swaps. The Fund may utilize swap agreements in an attempt to gain exposure to the securities in a market without actually purchasing those securities, or to hedge a position. Swap agreements are two-party contracts entered into primarily by institutional investors for periods ranging from a day to more than one-year. In a standard "swap" transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments. The gross returns to be exchanged or "swapped" between the parties are calculated with respect to a "notional amount," *i.e.*, the return on or increase in value of a particular dollar amount invested in a "basket" of securities representing a particular index.

Forms of swap agreements include interest rate caps, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates exceed a specified rate, or "cap," interest rate floors, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates fall below a specified level, or "floor;" and interest rate collars, under which a party sells a cap and purchases a floor or vice versa in an attempt to protect itself against interest rate movements exceeding given minimum or maximum levels.

The Fund's obligations under a swap agreement will be accrued daily (offset against any amounts owing to the Fund) and any accrued but unpaid net amounts owed to a swap counterparty will be covered by segregating assets determined to be liquid. Obligations under swap agreements so covered will not be construed to be "senior securities" for purposes of the Fund's investment restriction concerning senior securities. Because they are two-party contracts which may have terms of greater than seven days, swap agreements may be considered to be illiquid for purposes of the Fund's illiquid investment limitations. The Fund will not enter into any swap agreement unless the Advisor believes that the other party to the transaction is creditworthy. The Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty.

The Fund may enter into swap agreements to invest in a market without owning or taking physical custody of the underlying securities in circumstances in which direct investment is restricted for legal reasons or is otherwise impracticable. The counterparty to any swap agreement will typically be a bank, investment banking firm or broker/dealer. The counterparty will generally agree to pay the Fund the amount, if any, by which the notional amount of the swap agreement would have increased in value had it been invested in the particular stocks, plus the dividends that would have been received on those stocks. The Fund will agree to pay to the counterparty a floating rate of interest on the notional amount of the swap agreement plus the amount, if any, by which the notional amount would have decreased in value had it been invested in such stocks. Therefore, the return to the Fund on any swap agreement should be the gain or loss on the notional amount plus dividends on the stocks less the interest paid by the Fund on the notional amount.

Swap agreements typically are settled on a net basis, which means that the two payment streams are netted out, with the Fund receiving or paying, as the case may be, only the net amount of the two payments. Payments may be made at the conclusion of a swap agreement or periodically during its term.

Other swap agreements, may require initial premium (discount) payments as well as periodic payments (receipts) related to the interest leg of the swap or to the default of a reference obligation. The Fund will earmark and reserve assets necessary to meet any accrued payment obligations when it is the buyer of a credit default swap.

Swap agreements do not involve the delivery of securities or other underlying assets. Accordingly, the risk of loss with respect to swap agreements is limited to the net amount of payments that the Fund is contractually obligated to make. If a swap counterparty defaults, the Fund's risk of loss consists of the net amount of payments the Fund is contractually entitled to receive, if any. The net amount of the excess, if any, of the Fund's obligations over its entitlements with respect to each equity swap will be accrued on a daily basis and an amount of cash or liquid assets, having an aggregate NAV at least equal to such accrued excess will be maintained in a segregated account by the Fund's custodian. Inasmuch as these transactions are entered into for hedging purposes or are offset by segregated cash or liquid assets, as permitted by applicable law, the Fund and the Advisor believe that these transactions do not constitute senior securities under the 1940 Act and, accordingly, will not treat them as being subject to the Fund's borrowing restrictions.

The swap market has grown substantially in recent years with a large number of banks and investment banking firms acting both as principals and as agents utilizing standardized swap documentation. As a result, the swap market has become relatively liquid in comparison with the markets for other similar instruments, which are traded in the OTC market. The Advisor, under the supervision of the Board, is responsible for determining and monitoring the liquidity of Fund transactions in swap agreements.

The use of swap agreements is a highly specialized activity which involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. If a counterparty's creditworthiness declines, the value of the swap would likely decline. Moreover, there is no guarantee that a Fund could eliminate its exposure under an outstanding swap agreement by entering into an offsetting swap agreement with the same or another party.

U.S. Government Securities

The Fund may invest in U.S. government securities. Securities issued or guaranteed by the U.S. government or its agencies or instrumentalities include U.S. Treasury securities, which are backed by the full faith and credit of the U.S. Treasury and which differ only in their interest rates, maturities, and times of issuance. U.S. Treasury bills have initial maturities of one year or less; U.S. Treasury notes have initial maturities of one to ten years; and U.S. Treasury bonds generally have initial maturities of greater than ten years. Certain U.S. government securities are issued or guaranteed by agencies or instrumentalities of the U.S. government including, but not limited to, obligations of U.S. government agencies or instrumentalities such as the Federal National Mortgage Association ("Fannie Mae"), Federal Home Loan Mortgage Corporation ("Freddie Mac"), Government National Mortgage Association ("Ginnie Mae"), Small Business Administration, Federal Farm Credit Administration, Federal Home Loan Banks, Banks for Cooperatives (including the Central Bank for Cooperatives), Federal Land Banks, Federal Intermediate Credit Banks, Tennessee Valley Authority, Export-Import Bank of the United States, Commodity Credit Corporation, Federal Financing Bank, National Credit Union Administration and the Federal Agricultural Mortgage Corporation ("Farmer Mac").

Some obligations issued or guaranteed by U.S. government agencies and instrumentalities, including, for example, Ginnie Mae pass-through certificates, are supported by the full faith and credit of the U.S. Treasury. Other obligations issued by or guaranteed by federal agencies, such as those securities issued by Fannie Mae, are supported by the discretionary authority of the U.S. government to purchase certain obligations of the federal agency, while other obligations issued by or guaranteed by federal agencies, such

as those of the Federal Home Loan Banks, are supported by the right of the issuer to borrow from the U.S. Treasury, while the U.S. government provides financial support to such U.S. government-sponsored federal agencies, no assurance can be given that the U.S. government will always do so, since the U.S. government is not so obligated by law. U.S. Treasury notes and bonds typically pay coupon interest semi-annually and repay the principal at maturity.

In September 2008, the U.S. Treasury announced a federal takeover of Fannie Mae and Freddie Mac, placing the two federal instrumentalities in conservatorship. Under the terms of the takeover, the U.S. Treasury agreed to acquire \$1 billion of senior preferred stock of each instrumentality and obtained warrants for the purchase of common stock of each instrumentality. Under these Senior Preferred Stock Purchase Agreements (“SPAs”), the U.S. Treasury has pledged to provide a limited amount of capital per instrumentality as needed, including the contribution of cash capital to the instrumentalities in the event their liabilities exceed their assets. In May 2009, the U.S. Treasury increased its maximum commitment to each instrumentality under the SPAs from \$100 billion to \$200 billion per instrumentality. In December 2009, the U.S. Treasury amended the SPAs to provide Fannie Mae and Freddie Mac with some additional flexibility to meet the requirement to reduce their mortgage portfolios. Also in December 2009, the U.S. Treasury further amended the SPAs to allow the cap on the U.S. Treasury’s funding commitment to increase as necessary to accommodate any cumulative reduction in Fannie Mae’s and Freddie Mac’s net worth through the end of 2012. On August 17, 2012, the U.S. Treasury announced that it was again amending the Agreement to terminate the requirement that Fannie Mae and Freddie Mac each pay a 10% dividend annually on all amounts received under the funding commitment. Instead, they are now required to transfer to the U.S. Treasury on a quarterly basis all profits earned during a quarter that exceed a certain capital reserve amount. The U.S. Treasury stated that the purpose of the change was to wind down Freddie Mac and Fannie Mae and to benefit taxpayers. However, shareholders of Freddie Mac and Fannie Mae have since sued the U.S. Government over the profit sweep, contending that it was a breach of contract and an improper taking of private property without just compensation. Although the suits have been unsuccessful so far, both of these legal arguments continue to move forward through various courts and could influence the U.S. Government’s policy towards the mortgage financial system. In addition, new initiatives from the Trump administration, such as proposed reductions to corporate tax rates, could affect the value of certain assets held by Freddie Mac and Fannie Mae.

Until further action is taken, the actions of the U.S. Treasury are intended to ensure that Fannie Mae and Freddie Mac maintain a positive net worth and meet their financial obligations, preventing mandatory triggering of receivership. No assurance can be given that the U.S. Treasury initiatives will be successful. Other U.S. government securities the Fund may invest in include (but are not limited to) securities issued or guaranteed by the Federal Housing Administration, Farmers Home Loan Administration, Export-Import Bank of the U.S., Small Business Administration, General Services Administration, Central Bank for Cooperatives, Federal Farm Credit Banks, Federal Intermediate Credit Banks, Federal Land Banks, Maritime Administration, Tennessee Valley Authority and District of Columbia Armory Board. Because the U.S. government is not obligated by law to provide support to an instrumentality it sponsors, the Fund will invest in obligations issued by such an instrumentality only if the Sub-Advisor determines that the credit risk with respect to the instrumentality does not make its securities unsuitable for investment by the Fund.

The Fund may also invest in separately traded principal and interest components of securities guaranteed or issued by the U.S. government or its agencies, instrumentalities or sponsored enterprises if such components trade independently under the Separate Trading of Registered Interest and Principal of Securities program (“STRIPS”) or any similar program sponsored by the U.S. government. STRIPS may be sold as zero coupon securities. See “Zero Coupon Bonds” for additional information.

When-Issued, Delayed-Delivery and Forward Commitment Securities

The Fund, from time to time, in the ordinary course of business, may purchase securities on a when-issued, delayed-delivery or forward commitment basis (*i.e.*, delivery and payment can take place between a month and 120 days after the date of the transaction). These securities are subject to market fluctuation and no interest accrues to the purchaser during this period. At the time the Fund makes the commitment to purchase securities on a when-issued, delayed-delivery or forward commitment basis, the Fund will record the transaction and thereafter reflect the value of the securities, each day, in determining the Fund's NAV. The Fund will not purchase securities on a when-issued, delayed-delivery or forward commitment basis if, as a result, more than 15% of the Fund's net assets would be so invested. At the time of delivery of the securities, the value of the securities may be more or less than the purchase price. The Fund will also establish a segregated account with the Fund's custodian bank in which the Fund will maintain cash or liquid securities equal to or greater in value than the Fund's purchase commitments for such when-issued, delayed-delivery or forward commitment securities. The Trust does not believe that the Fund's NAV or income will be adversely affected by the Fund's purchase of securities on a when-issued, delayed-delivery or forward commitment basis.

Zero Coupon Bonds

The Fund may invest in U.S. Treasury zero-coupon bonds. These securities are U.S. Treasury bonds which have been stripped of their un-matured interest coupons, the coupons themselves, and receipts or certificates representing interests in such stripped debt obligations and coupons. Interest is not paid in cash during the term of these securities, but is accrued and paid at maturity. Such obligations have greater price volatility than coupon obligations and other normal interest-paying securities, and the value of zero coupon securities reacts more quickly to changes in interest rates than do coupon bonds. Because dividend income is accrued throughout the term of the zero coupon obligation, but is not actually received until maturity, the Fund may have to sell other securities to pay said accrued dividends prior to maturity of the zero coupon obligation. Unlike regular U.S. Treasury bonds which pay semi-annual interest, U.S. Treasury zero coupon bonds do not generate semi-annual coupon payments. Instead, zero coupon bonds are purchased at a substantial discount from the maturity value of such securities, the discount reflecting the current value of the deferred interest; this discount is amortized as interest income over the life of the security, and is taxable even though there is no cash return until maturity. Zero coupon U.S. Treasury issues originally were created by government bond dealers who bought U.S. Treasury bonds and issued receipts representing an ownership interest in the interest coupons or in the principal portion of the bonds. Subsequently, the U.S. Treasury began directly issuing zero coupon bonds with the introduction of STRIPS. While zero coupon bonds eliminate the reinvestment risk of regular coupon issues, that is, the risk of subsequently investing the periodic interest payments at a lower rate than that of the security held, zero coupon bonds fluctuate much more sharply than regular coupon-bearing bonds. Thus, when interest rates rise, the value of zero coupon bonds will decrease to a greater extent than will the value of regular bonds having the same interest rate.

Cybersecurity

With the increased use of technologies such as the Internet and the dependence on computer systems to perform business and operational functions, investment companies (such as the Fund) and their service providers (including the Advisor and Sub-Advisor) may be prone to operational and information security risks resulting from cyber-attacks and/or technological malfunctions. In general, cyber-attacks are deliberate, but unintentional events may have similar effects. Cyber-attacks include, among others, stealing or corrupting data maintained online or digitally, preventing legitimate users from accessing information or services on a website, releasing confidential information without authorization, and causing operational disruption. Successful cyber-attacks against, or security breakdowns of, the Fund, the Advisor, the Sub-Advisor, or a custodian, transfer agent, or other affiliated or third-party service provider may adversely affect the Fund or its shareholders. For instance, cyber-attacks may interfere with the processing of shareholder transactions, affect the Fund's ability to calculate its NAV, cause the release of private

shareholder information or confidential Fund information, impede trading, cause reputational damage, and subject the Fund to regulatory fines, penalties or financial losses, reimbursement or other compensation costs, and additional compliance costs. Cyber-attacks may render records of Fund assets and transactions, shareholder ownership of Fund shares, and other data integral to the functioning of the Fund inaccessible or inaccurate or incomplete. The Fund may also incur substantial costs for cybersecurity risk management in order to prevent cyber incidents in the future. The Fund and its shareholders could be negatively impacted as a result. While the Advisor has established business continuity plans and systems designed to minimize the risk of cyber-attacks through the use of technology, processes and controls, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified given the evolving nature of this threat. The Fund relies on third-party service providers for many of its day-to-day operations, and will be subject to the risk that the protections and protocols implemented by those service providers will be ineffective to protect the Fund from cyber-attack. Similar types of cybersecurity risks also are present for issuers of securities in which the Fund invests, which could result in material adverse consequences for such issuers, and may cause the Fund's investment in such securities to lose value.

INVESTMENT RESTRICTIONS

Except with respect to the Fund's fundamental policy relating to borrowing and non-fundamental policy relating to illiquid securities, if a percentage limitation in a policy below is adhered to at the time of investment, a later increase or decrease in percentage resulting from a change in value will not result in a violation of such restriction.

Fundamental Policies of the Fund

The investment limitations listed below are fundamental policies of the Fund, and cannot be changed with respect to the Fund without the vote of a majority of the outstanding voting securities of the Fund. Under the 1940 Act, a "vote of a majority of the outstanding voting securities" of a fund means the affirmative vote of the lesser of (1) more than 50% of the outstanding shares of the Fund or (2) 67% or more of the shares present at a shareholders meeting if more than 50% of the outstanding shares are represented at the meeting in person or by proxy.

The Fund may not:

1. Borrow money, except to the extent permitted by the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief. The 1940 Act presently allows a fund to (1) borrow from any bank (including pledging, mortgaging or hypothecating assets) in an amount up to 33 1/3% of its total assets, (2) borrow money for temporary purposes in an amount not exceeding 5% of the value of the Fund's total assets at the time of the loan, and (3) enter into reverse repurchase agreements.
2. Purchase or sell commodities or commodity contracts unless acquired as a result of ownership of securities or other instruments issued by persons that purchase or sell commodities or commodities contracts; but this shall not prevent the Fund from purchasing, selling and entering into financial futures contracts (including futures contracts on indices of securities, interest rates and currencies), options on financial futures contracts (including futures contracts on indices of securities, interest rates and currencies), warrants, swaps, forward contracts, foreign currency spot and forward contracts or other derivative instruments that are not related to physical commodities.
3. With respect to 75% of its total assets, (i) purchase securities of any issuer (except securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities or shares of investment

companies) if, as a result, more than 5% of its total assets would be invested in the securities of such issuer, or (ii) acquire more than 10% of the outstanding voting securities of any one issuer.*

4. Invest 25% or more of its total assets in the securities of one or more issuers conducting their principal business activities in the same industry or group of industries. (The limitation against industry concentration does not apply to investments in securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities, or to shares of investment companies; however, the Fund will not invest 25% or more of its total assets in any investment company that so concentrates.)*
5. Make loans, except as permitted under the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.
6. Purchase or sell real estate, except that, to the extent permitted by applicable law, the Fund may (a) invest in securities or other instruments directly or indirectly secured by real estate and (b) invest in securities or other instruments issued by issuers that invest in real estate.
7. Issue senior securities, except to the extent permitted by the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.
8. Underwrite securities issued by others, except to the extent that the Fund may be considered an underwriter within the meaning of the Securities Act in the disposition of restricted securities or in connection with investments in other investment companies.

Non-Fundamental Policies of the Fund

In addition to the investment objective of the Fund, the investment limitation listed below is a non-fundamental policy of the Fund and may be changed with respect to the Fund by the Board.

The Fund may not purchase or hold illiquid securities if, in the aggregate, more than 15% of its net assets would be invested in illiquid securities.

CONTINUOUS OFFERING

The method by which Creation Units are created and sold may raise certain issues under applicable securities laws. Because new Creation Units of shares are issued and sold by the Fund on an ongoing basis, at any point a “distribution,” as such term is used in the Securities Act, may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus-delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with Foreside Fund Services, LLC (the “Distributor”), breaks them down into constituent shares, and sells such shares directly to customers, or if it chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary market demand for shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the

* For purposes of this policy, the issuer of the underlying security will be deemed to be the issuer of any respective depositary receipt.

particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a categorization as an underwriter.

Broker-dealer firms should also note that dealers who are not “underwriters,” but are effecting transactions in shares, whether or not participating in the distribution of shares, are generally required to deliver a prospectus. This is because the prospectus-delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. Firms that incur a prospectus-delivery obligation with respect to shares are reminded that, under Rule 153 of the Securities Act, a prospectus-delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on an exchange is satisfied by the fact that the prospectus is available at the exchange upon request. The prospectus-delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

The Advisor may purchase Creation Unit Aggregations through a broker-dealer to “seed” the Fund as it is launched (which is anticipated to be an aggregate of at least 25,000 shares), or may purchase shares from other broker-dealers that have previously provided “seed” for the Fund when it was launched or otherwise in secondary market transactions, and because the Advisor may be deemed an affiliate of the Fund, the shares are being registered to permit the resale of these shares from time to time after purchase. The Fund will not receive any of the proceeds from the resale by the Advisor of these shares.

The Advisor intends to sell all or a portion of the shares owned by it and offered hereby from time to time directly or through one or more broker-dealers. The shares may be sold on any national securities exchange on which the shares may be listed or quoted at the time of sale, in the over-the-counter market or in transactions other than on these exchanges or systems at fixed prices, at prevailing market prices at the time of the sale, at varying prices determined at the time of sale, or at negotiated prices. These sales may be effected in transactions, which may involve crosses or block transactions. The Advisor may use any one or more of the following methods when selling shares:

- ordinary brokerage transactions through brokers or dealers (who may act as agents or principals) or directly to one or more purchasers;
- privately negotiated transactions;
- through the writing or settlement of options or other hedging transactions, whether such options are listed on an options exchange or otherwise; and
- any other method permitted pursuant to applicable law.

The Advisor may also loan or pledge shares to broker-dealers that in turn may sell such shares, to the extent permitted by applicable law. The Advisor may also enter into options or other transactions with broker-dealers or other financial institutions or the creation of one or more derivative securities which require the delivery to such broker-dealer or other financial institution of shares, which shares such broker-dealer or other financial institution may resell.

The Advisor and any broker-dealer or agents participating in the distribution of shares may be deemed to be “underwriters” within the meaning of Section 2(11) of the Securities Act in connection with such sales. In such event, any commissions paid to any such broker-dealer or agent and any profit on the resale of the shares purchased by them may be deemed to be underwriting commissions or discounts under the Securities Act. The Advisor who may be deemed an “underwriter” within the meaning of Section 2(11) of the Securities Act will be subject to the applicable prospectus delivery requirements of the Securities Act.

The Advisor has informed the Fund that it is not a registered broker-dealer and does not have any written or oral agreement or understanding, directly or indirectly, with any person to distribute the shares. Upon

the Fund being notified in writing by the Advisor that any material arrangement has been entered into with a broker-dealer for the sale of shares through a block trade, special offering, exchange distribution or secondary distribution or a purchase by a broker or dealer, a supplement to this SAI will be filed, if required, pursuant to Rule 497 under the Securities Act, disclosing (i) the name of the Advisor and the name(s) of the participating broker-dealer(s), (ii) the number of shares involved, (iii) the price at which such shares were sold, (iv) the commissions paid or discounts or concessions allowed to such broker-dealer(s), where applicable, (v) that such broker-dealer(s) did not conduct any investigation to verify the information set out or incorporated by reference in the Fund's Prospectus and SAI, and (vi) other facts material to the transaction.

The Advisor and any other person participating in such distribution will be subject to applicable provisions of the Securities Exchange Act of 1934 (the "Exchange Act") and the rules and regulations thereunder, including, without limitation, to the extent applicable, Regulation M. To the extent applicable, Regulation M may also restrict the ability of any person engaged in the distribution of the shares to engage in market-making activities with respect to the shares. All of the foregoing may affect the marketability of the shares and the ability of any person or entity to engage in market-making activities with respect to the shares. There is a risk that the Advisor may redeem its investments in the Fund or otherwise sell its shares to a third party that may redeem. As with redemptions by other large shareholders, such redemptions could have a significant negative impact on the Fund and its shares.

EXCHANGE LISTING AND TRADING

A discussion of exchange listing and trading matters associated with an investment in the Fund is contained in the Fund's Prospectus. The discussion below supplements, and should be read in conjunction with, the Fund's Prospectus.

Shares of the Fund are listed and traded on the Exchange. The shares of the Fund will trade on the Exchange at prices that may differ to some degree from the Fund's NAV. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of shares will continue to be met.

As in the case of other stocks traded on the Exchange, broker's commissions on purchases or sales of shares in market transactions will be based on negotiated commission rates at customary levels.

The Trust reserves the right to adjust the price levels of shares in the future to help maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of the Fund.

PORTFOLIO TRANSACTIONS AND BROKERAGE

Brokerage Transactions. Generally, equity securities are bought and sold through brokerage transactions for which commissions are payable. Purchases from underwriters will include the underwriting commission or concession, and purchases from dealers serving as market makers will include a dealer's mark-up or reflect a dealer's mark-down. Money market securities and other debt securities are usually bought and sold directly from the issuer or an underwriter or market maker for the securities. Generally, the Fund will not pay brokerage commissions for such purchases. When a debt security is bought from an underwriter, the purchase price will usually include an underwriting commission or concession. The purchase price for securities bought from dealers serving as market makers will similarly include the dealer's mark up or reflect a dealer's mark down. When the Fund executes transactions in the over-the-counter market, it will generally deal with primary market makers unless prices that are more favorable are otherwise obtainable.

In addition, the Sub-Advisor may place a combined order, often referred to as “bunching,” for two or more accounts it manages, including the Fund, engaged in the purchase or sale of the same security or other instrument if, in its judgment, joint execution is in the best interest of each participant and will result in best price and execution. Transactions involving commingled orders are allocated in a manner deemed equitable to each account or Fund. Although it is recognized that, in some cases, the joint execution of orders could adversely affect the price or volume of the security that a particular account or the Fund may obtain, it is the opinion of the Sub-Advisor, Advisor, and Board that the advantages of combined orders outweigh the possible disadvantages of separate transactions. In addition, in some instances, the Fund effecting the larger portion of a combined order may not benefit to the same extent as participants effecting smaller portions of the combined order. Nonetheless, the Advisor believes that the ability of the Fund to participate in higher volume transactions generally will be beneficial to the Fund.

Brokerage Selection. The Trust does not expect to use one particular broker-dealer to effect the Trust’s portfolio transactions. When one or more broker-dealer is believed capable of providing the best combination of price and execution, the Sub-Advisor is not required to select a broker-dealer based on the lowest commission rate available for a particular transaction. In such cases, the Sub-Advisor may pay a higher commission than otherwise obtainable from other brokers in return for brokerage research services provided to the Sub-Advisor consistent with Section 28(e) of the Exchange Act. Section 28(e) provides that a sub-advisor may cause a fund to pay a broker-dealer a commission for effecting a transaction in excess of the amount of commission another broker or dealer would have charged as long as the sub-advisor makes a good faith determination that the amount of commission is reasonable in relation to the value of the brokerage and research services provided by the broker-dealer. To the extent the Sub-Advisor obtains brokerage and research services that it otherwise would acquire at its own expense, the Sub-Advisor may have an incentive to place a greater volume of transactions or pay higher commissions than would otherwise be the case.

The Sub-Advisor will only obtain brokerage and research services from broker-dealers in arrangements that are consistent with Section 28(e) of the Exchange Act. The types of products and services that the Sub-Advisor may obtain from broker-dealers through such arrangements will include research reports and other information on the economy, industries, sectors, groups of securities, individual companies, statistical information, political developments, technical market action, pricing and appraisal services, credit analysis, risk measurement analysis, performance and other analysis. The Sub-Advisor may use products and services provided by brokers in servicing all of its client accounts and not all such products and services may necessarily be used in connection with the account that paid commissions to the broker-dealer providing such products and services. Any advisory or other fees paid to the Sub-Advisor are not reduced as a result of the receipt of brokerage and research services.

In some cases, the Sub-Advisor may receive a product or service from a broker that has both a “research” and a “non-research” use. When this occurs, the Sub-Advisor will make a good faith allocation between the research and non-research uses of the product or service. The percentage of the service that is used for research purposes may be paid for with brokerage commissions, while the Sub-Advisor will use its own funds to pay for the percentage of the service that is used for non-research purposes. In making this good faith allocation, the Sub-Advisor faces a potential conflict of interest, but the Sub-Advisor believes that its allocation procedures are reasonably designed to appropriately allocate the anticipated use of such products and services to research and non-research uses.

Brokerage with Fund Affiliates. The Fund may execute brokerage or other agency transactions through registered broker-dealer affiliates of the Fund, the Advisor, the Fund’s Sub-Advisor, or the Distributor for a commission in conformity with the 1940 Act, the Exchange Act and rules promulgated by the SEC. Under the 1940 Act and the Exchange Act, affiliated broker-dealers are permitted to receive and retain compensation for effecting portfolio transactions for the Fund on an exchange if a written contract is in

effect between the affiliate and the Fund expressly permitting the affiliate to receive and retain such compensation. These rules further require that commissions paid to the affiliate by the Fund for exchange transactions not exceed “usual and customary” brokerage commissions. The rules define “usual and customary” commissions to include amounts which are “reasonable and fair compared to the commission, fee or other remuneration received or to be received by other brokers in connection with comparable transactions involving similar securities being purchased or sold on a securities exchange during a comparable period of time.” The Board, including those trustees who are not “interested persons” of the Fund, has adopted procedures for evaluating the reasonableness of commissions paid to affiliates and reviews these procedures periodically.

Securities of “Regular Broker-Dealers.” The Fund is required to identify any securities of its “regular brokers and dealers” (as such term is defined in the 1940 Act) which the Fund may hold at the close of its most recent fiscal year. “Regular brokers or dealers” of the Trust are the ten brokers or dealers that, during the most recent fiscal year: (i) received the greatest dollar amounts of brokerage commissions from the Trust’s portfolio transactions; (ii) engaged as principal in the largest dollar amounts of portfolio transactions of the Trust; or (iii) sold the largest dollar amounts of the Trust’s shares.

Because the Fund is new, as of the date of this SAI, the Fund did not hold any securities of its “regular brokers and dealers.”

MANAGEMENT OF THE TRUST

Board of Trustees

Board Responsibilities. The Board of Trustees is responsible for overseeing the management and affairs of the Fund and each of the Trust’s other funds, which are not described in this SAI. The Board has considered and approved contracts, as described herein, under which certain companies provide essential management and administrative services to the Trust. Like most funds, the day-to-day business of the Trust, including the day-to-day management of risk, is performed by third-party service providers, such as the Advisor, the Fund’s Sub-Advisor, Distributor and Administrator. The Board is responsible for overseeing the Trust’s service providers and, thus, has oversight responsibility with respect to the risk management performed by those service providers. Risk management seeks to identify and eliminate or mitigate the potential effects of risks, *i.e.*, events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the Trust or funds. Under the overall supervision of the Board and the Audit Committee (discussed in more detail below), the service providers to the Fund employ a variety of processes, procedures and controls to identify risks relevant to the operations of the Trust and the Fund to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Each service provider is responsible for one or more discrete aspects of the Trust’s business (*e.g.*, the Sub-Advisor is responsible for the day-to-day management of the Fund’s portfolio investments) and, consequently, for managing the risks associated with that activity. The Board has emphasized to the Fund’s service providers the importance of maintaining vigorous risk management.

The Board’s role in risk management oversight begins before the inception of a fund, at which time the fund’s primary service providers present the Board with information concerning the investment objectives, strategies and risks of the fund as well as proposed investment limitations for the fund. Additionally, the Advisor provides the Board with an overview of, among other things, its investment philosophy, brokerage practices and compliance infrastructure. Thereafter, the Board oversees the risk management of the fund’s operations, in part, by requesting periodic reports from and otherwise communicating with various personnel of the fund and its service providers, including in particular the Trust’s Chief Compliance Officer and the fund’s independent accountants. The Board and, with respect to identified risks that relate

to its scope of expertise, the Audit Committee oversee efforts by management and service providers to manage risks to which the fund may be exposed.

The Board is responsible for overseeing the nature, extent and quality of the services provided to the Fund by the Advisor and the Sub-Advisor and receives information about those services at its regular meetings. In addition, on an annual basis, in connection with its consideration of whether to renew the Advisory Agreement and the Sub-Advisory Agreement with the Advisor and the Sub-Advisor, respectively, the Board meets with the Advisor and Sub-Advisor to review such services. Among other things, the Board regularly considers the Advisor's and the Sub-Advisor's adherence to the Fund's investment restrictions and compliance with various Fund policies and procedures and with applicable securities regulations. The Board also reviews information about the Fund's investments, including, for example, portfolio holdings schedules and reports on the Advisor's or the Sub-Advisor's use of higher-risk financial instruments in managing the Fund, if any, as well as reports on the Fund's investments in other investment companies, if any.

The Trust's Chief Compliance Officer reports regularly to the Board to review and discuss compliance issues and Fund, Advisor, and Sub-Advisor risk assessments. At least annually, the Trust's Chief Compliance Officer provides the Board with a report reviewing the adequacy and effectiveness of the Trust's policies and procedures and those of its service providers, including the Advisor and the Sub-Advisor. The report addresses the operation of the policies and procedures of the Trust and each service provider since the date of the last report; any material changes to the policies and procedures since the date of the last report; any recommendations for material changes to the policies and procedures; and any material compliance matters since the date of the last report.

The Board receives reports from the Fund's service providers regarding operational risks and risks related to the valuation and liquidity of portfolio securities. The Administrator makes regular reports to the Board concerning investments for which market quotations are not readily available. Annually, the independent registered public accounting firm reviews with the Audit Committee its audit of the Fund's financial statements, focusing on major areas of risk encountered by the Fund and noting any significant deficiencies or material weaknesses in the Fund's internal controls. Additionally, in connection with its oversight function, the Board oversees Fund management's implementation of disclosure controls and procedures, which are designed to ensure that information required to be disclosed by the Trust in its periodic reports with the SEC are recorded, processed, summarized, and reported within the required time periods. The Board also oversees the Trust's internal controls over financial reporting, which comprise policies and procedures designed to provide reasonable assurance regarding the reliability of the Trust's financial reporting and the preparation of the Trust's financial statements.

From their review of these reports and discussions with the Advisor, Sub-Advisor, Chief Compliance Officer, independent registered public accounting firm, and other service providers, the Board and the Audit Committee review in detail any material risks of the Fund, thereby facilitating a dialogue about how management and service providers identify and mitigate those risks.

The Board recognizes that not all risks that may affect the Fund can be identified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the Fund's goals, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, despite the periodic reports the Board receives, it may not be made aware of all of the relevant information of a particular risk. Most of the Fund's investment management and business affairs are carried out by or through the Advisor, Sub-Advisor, and other service providers. Each of these parties has an independent interest in risk management, but its policies and the methods by which one or more risk management functions are carried out may differ from that of the Fund and the other parties in the setting of priorities,

the resources available or the effectiveness of relevant controls. As a result of the foregoing and other factors, the Board’s risk management oversight is subject to substantial limitations.

Members of the Board and Officers of the Trust. Set forth below are the names, ages, position with the Trust, term of office, and the principal occupations for a minimum of the last five years of each of the persons currently serving as members of the Board and as officers of the Trust. Also included below is the term of office for each of the officers of the Trust. The members of the Board serve as Trustees for the life of the Trust or until retirement, removal, or their office is terminated pursuant to the Trust’s Declaration of Trust.

The Chairman of the Board, Noah Hamman, is an interested person of the Trust as that term is defined in the 1940 Act. No Independent Trustee (defined below) serves as a lead independent trustee. The Trust has determined its leadership structure is appropriate given the specific characteristics the Trust and its operations. The Trust made this determination in consideration of, among other things, the fact that the Trustees who are not interested persons of the Fund (*i.e.*, “Independent Trustees”) constitute sixty-six percent (66%) of the Board, the fact that the Audit Committee is composed of the Independent Trustees, the amount of assets under management in the Trust, and the number of funds (and classes of shares) overseen by the Board. The Board also believes that its leadership structure facilitates the orderly and efficient flow of information to the Independent Trustees from Fund management.

Name, Address and Date of Birth of Trustee/Officer	Position(s) Held with the Trust, Term of Office and Length of Time Served	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Trustee	Other Directorships Held by Trustee During Past 5 Years

(2011 - present).	N/A	N/A

* Mr. Hamman is an “interested” person of the Trust, as that term is defined in the 1940 Act, by virtue of his ownership and controlling interest in the Advisor.

Board Standing Committee. The Board has established the following standing committee:

Audit Committee. The Board has a standing Audit Committee that is composed of each of the Independent Trustees. The Audit Committee operates under a written charter approved by the Board. The principal responsibilities of the Audit Committee include: (i) recommending which firm to engage as the Trust’s independent registered public accounting firm and whether to terminate this relationship; (ii) reviewing the independent registered public accounting firm’s compensation, the proposed scope and terms of its engagement, and the firm’s independence; (iii) serving as a channel of communication between the independent registered public accounting firm and the Board; (iv) reviewing the results of each external audit, including any qualifications in the independent registered public accounting firm’s opinion, any related management letter, management’s responses to recommendations made by the independent registered public accounting firm in connection with the audit, if any, reports submitted to the Committee by the Trust’s service providers that are material to the Trust as a whole, and management’s responses to any such reports; (v) reviewing the Trust’s audited financial statements and considering any significant disputes between the Trust’s management and the independent registered public accounting firm that arose

in connection with the preparation of those financial statements; (vi) considering, in consultation with the independent registered public accounting firm and the Trust’s senior internal accounting executive, the independent registered public accounting firm’s report on the adequacy of the Trust’s internal financial controls; (vii) reviewing, in consultation with the Trust’s independent registered public accounting firm, major changes regarding auditing and accounting principles and practices to be followed when preparing the Trust’s financial statements; and (viii) other audit related matters. The Audit Committee also serves as the Trust’s Qualified Legal Compliance Committee, which provides a mechanism for reporting legal violations. The Audit Committee met 4 times during the most recently completed fiscal year.

Individual Trustee Qualifications. The Board has concluded that each of the Trustees should serve on the Board because of his or her ability to review and understand information about the Trust and the Fund provided by management, to identify and request other information he or she may deem relevant to the performance of his or her duties, to question management and other service providers regarding material factors bearing on the management and administration of the Fund, and to exercise his or her business judgment in a manner that serves the best interests of the Fund and its shareholders. The Board has concluded that each of the Trustees should serve as a Trustee based on his or her experience, qualifications, attributes and skills, as described below.

The Board has concluded that Mr. Hamman should serve as Trustee because of his extensive experience with mutual fund company business development, and the development of exchange-traded funds in particular, as well as his knowledge of and experience in the financial services industry in general.

The Board has concluded that Ms. Piper/Bach should serve as Trustee because of her extensive experience in and knowledge of public company accounting and auditing, the financial services industry, and fiduciary and banking law.

The Board has concluded that Mr. McVay should serve as Trustee because of his extensive experience in providing investment advice and business consulting services to financial institutions, endowments, foundations, corporations and pension funds.

Fund Shares Owned by Board Members. The following table shows the dollar amount range of each Trustee’s “beneficial ownership” of shares of the Fund and all series of the Trust as of the end of the most recently completed calendar year. Dollar amount ranges disclosed are established by the SEC. “Beneficial ownership” is determined in accordance with Rule 16a-1(a)(2) under the Exchange Act. As of September 30, 2018, the Trustees and officers of the Trust owned less than 1% of the outstanding shares of the Trust.

Trustee Name	Fund Name	Dollar Range of Fund Shares	Aggregate Dollar Range of Shares in All Registered Investment Companies Overseen by Trustee in Family of Investment Companies
Interested Trustee			
Noah Hamman	AdvisorShares Treesdale Rising Rates ETF	None	Over \$100,000
Independent Trustees			
Elizabeth Piper/Bach	AdvisorShares Treesdale Rising

William G. McVay	\$40,000	N/A	N/A	\$40,000

*The Trust is the only registered investment company in the Fund Complex.

Control Persons and Principal Holders of Securities

Because the Fund is new, as of the date of this SAI, there were no owners of the Fund's shares.

Codes of Ethics

The Board, on behalf of the Trust, has adopted a code of ethics pursuant to Rule 17j-1 under the 1940 Act. In addition, the Advisor and Sub-Advisor each has adopted a code of ethics pursuant to Rule 17j-1. These codes of ethics (each, a "Code of Ethics" and collectively, the "Codes of Ethics") apply to the personal investing activities of trustees, directors, officers and certain employees ("access persons"). Rule 17j-1 and the Codes of Ethics are designed to prevent unlawful practices in connection with the purchase or sale of securities by access persons. Under each Code of Ethics, access persons are permitted to engage in personal securities transactions, but are required to report their personal securities transactions for monitoring purposes. In addition, certain access persons are required to obtain approval before investing in private placements and are prohibited from investing in IPOs. Copies of the Codes of Ethics are on file with the SEC and are available to the public.

Proxy Voting

The Board has delegated responsibility for decisions regarding proxy voting for securities held by the Fund to the Sub-Advisor. The Sub-Advisor will vote such proxies in accordance with its proxy policies and

procedures, which are included in Appendix B to this SAI. The Board will periodically review the Fund's proxy voting record.

The Trust will annually disclose its complete proxy voting record on Form N-PX. The Trust's most recent Form N-PX will be available without charge, upon request by calling 877.843.3831 or by writing to the Trust at 4800 Montgomery Lane, Suite 150, Bethesda, Maryland 20814. The Trust's Form N-PX will also be available on the SEC's website at www.sec.gov.

The Advisor and the Advisory Agreement

The Advisor, a registered investment advisor under the Investment Advisers Act of 1940, as amended (the "Advisers Act"), is located at 4800 Montgomery Lane, Suite 150, Bethesda, Maryland 20814. The Advisor is a Delaware limited liability company organized on October 12, 2006. The membership units are owned and controlled by Wilson Lane Group, LLC, which is controlled by Noah Hamman, Chief Executive Officer of the Advisor.

Pursuant to an investment advisory agreement with the Trust (the "Advisory Agreement"), the Advisor serves as the investment advisor for the Trust and provides investment advice to the Fund and oversees the day-to-day operations of the Fund, subject to the general supervision and oversight of the Board and the officers of the Trust. In addition to maintaining its overall responsibility to manage the Fund, the Advisor oversees the investment and reinvestment of the assets of the Fund by the Sub-Advisor, in accordance with the investment objective, policies, and limitations of the Fund.

The Advisor bears all costs associated with providing these advisory services and the expenses of the members of the Board who are affiliated with or interested persons of the Advisor. The Advisor, from its own resources, including profits from advisory fees received from the Fund, provided such fees are legitimate and not excessive, may make payments to broker-dealers and other financial institutions for their expenses in connection with the distribution of Fund shares, and otherwise currently pay all distribution costs for Fund shares. The Advisor may from time to time reimburse certain expenses of the Fund in order to limit the Fund's operating expenses as described in the Fund's Prospectus.

For its investment management services, the Advisor is entitled to a fee, which is calculated daily and paid monthly, at the annual rates listed below based on the average daily net assets of the Fund. With respect to the Fund, the Advisor has contractually agreed to waive its fees and/or reimburse expenses in order to keep net expenses (excluding amounts payable pursuant to any plan adopted in accordance with Rule 12b-1, interest expense, taxes, brokerage commissions, acquired fund fees and expenses, other expenditures which are capitalized in accordance with generally accepted accounting principles, and extraordinary expenses) from exceeding the Maximum Annual Operating Expense Limit (listed below) of the Fund's average daily net assets for at least one year from the date of the Prospectus. The expense limitation agreement may be terminated without payment of any penalty (i) by the Trust for any reason and at any time and (ii) by the Advisor, for any reason, upon ninety (90) days' prior written notice to the Trust, such termination by the Advisor to be effective as of the close of business on the last day of the then-current one year period. If at any point it becomes unnecessary for the Advisor to waive fees or make expense reimbursements, the Board may permit the Advisor to retain the difference between the Fund's total annual operating expenses and the Fund's Maximum Annual Operating Expense Limit currently in effect, or, if lower, the expense limitation that was in effect at the time of the waiver and/or reimbursement, to recapture all or a portion of its prior fee reductions or expense reimbursements made during the immediately preceding three-year period.

Fund	Advisory Fee as a % of Average Daily Net Assets		Maximum Annual Operating Expense Limit
	Fee	Assets Under Management	
AdvisorShares Treesdale Rising Rates ETF	1.15%	First \$250,000,000	1.25%
	1.05%	Next \$750,000,000	
	0.95%	\$1,000,000,000	

Pursuant to a fund services agreement between the Trust and the Advisor, the Advisor seeks to enter into arrangements with broker-dealers and other intermediaries to (1) obtain information about the nature of shareholders who own shares of the Trust through the intermediary and (2) permit certain share transactions through the intermediary without the imposition of a sales, transaction, or trade charge. The Advisor is entitled to reimbursement of a portion of expenditures that it makes relating to shareholder services of up to the lesser of 50% of the expenditures made by the Advisor on behalf of the Fund or an annual fee of 0.03% of the Fund's average daily net assets.

The Advisor, pursuant to an exemptive order granted by the SEC and subject to certain conditions, including Board approval, may, without shareholder approval, hire one or more new unaffiliated sub-advisors for the Fund, materially amend the terms of an agreement with an unaffiliated sub-advisor, or continue the employment of an unaffiliated sub-advisor after events that would otherwise cause an automatic termination of a sub-advisory agreement. Consequently, under the exemptive order, the Advisor has the right to hire or replace a sub-advisor when the Board and the Advisor feel that a change would benefit the Fund. Within 90 days of retaining a new sub-advisor, shareholders of the Fund will receive notification of the change. This "manager of managers" arrangement enables the Fund to operate with greater efficiency and without incurring the expense and delays associated with obtaining shareholder approval of sub-advisory agreements. The arrangement does not permit the Advisor's investment advisory fee paid by the Fund to be increased or change the Advisor's obligations under the Advisory Agreement, including the Advisor's responsibility to monitor and oversee sub-advisory services furnished to the Fund, without shareholder approval.

The Sub-Advisor and the Sub-Advisory Agreement

Under a sub-advisory agreement, Treesdale Partners, LLC serves as the investment sub-advisor to the Fund, makes the investment decisions for the Fund, and continuously reviews, supervises and administers the investment program of the Fund, subject to the supervision and oversight of, and policies established by, the Advisor and the Board. Yung Lim, who serves as portfolio manager of the Fund, is an owner and control person of the Sub-Advisor.

Sub-Advisory Fees Paid to the Sub-Advisor. For its services under the Sub-Advisory Agreement, the Sub-Advisor is entitled to a fee, which is calculated daily and paid monthly, by the Advisor, at an annual rate based on the average daily net assets of the Fund as follows:

Fund	Sub-Advisor	Sub-Advisory Fee
------	-------------	------------------

Fund	Sub-Advisor	Sub-Advisory Fee	
		Fee	Assets Under Management
AdvisorShares Treesdale Rising Rates ETF	Treesdale Partners, LLC	0.65%	First \$250,000,000
		0.59%	Next \$750,000,000
		0.54%	\$1,000,000,000

A discussion regarding the basis for the Board’s initial approval of the Fund’s Sub-Advisory Agreement will be available in the Trust’s first Annual or Semi-Annual Report to Shareholders following the Fund’s commencement of operations.

Portfolio Manager

This section includes information about the Fund’s portfolio manager, including information about other accounts he manages, the dollar range of Fund shares he owns, and how he is compensated. The tables reflecting the dollar range of the portfolio manager’s “beneficial ownership” of shares of the Fund use dollar amount ranges established by the SEC. “Beneficial ownership” is determined in accordance with Rule 16a-1(a)(2) under the Exchange Act.

Portfolio Manager Compensation. The portfolio manager is compensated by the Sub-Advisor and does not receive any compensation directly from the Fund or the Advisor. The portfolio manager receives his compensation in the form of net revenue sharing based on the advisory fee revenue generated from the Fund and other specified assets of the firm’s assets under management. Thus, portfolio manager compensation is aligned with the interests of the firm’s clients, including the Fund and its investors. The portfolio manager’s overall compensation is tied to the profitability of the Sub-Advisor.

Fund Shares Owned by Portfolio Manager. As of the date of this SAI, the portfolio manager did not own any shares of the Fund.

Other Accounts Managed by Portfolio Manager. As of June 30, 2018, the portfolio manager is responsible for the day-to-day management of other accounts as follows:

Name	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
Yung Lim	0	\$0	0	\$0	0	\$0

Conflicts of Interest

The portfolio manager’s management of “other accounts” may give rise to potential conflicts of interest in connection with his management of the Fund’s investments, on the one hand, and the investments of the other accounts, on the other. The other accounts may have the same investment objective as the Fund he manages. Therefore, a potential conflict of interest may arise as a result of the identical investment objectives, whereby the portfolio manager could favor one account over another. Another potential conflict could include the portfolio manager’s knowledge about the size, timing and possible market impact of Fund trades, whereby the portfolio manager could use this information to the advantage of other accounts and to the disadvantage of the Fund he manages. However, the Sub-Advisor has established policies and

procedures to ensure that the purchase and sale of securities among all accounts the Sub-Advisor manages are fairly and equitably allocated.

Administration, Custody and Transfer Agency Agreements

The Bank of New York Mellon (the “Administrator”) serves as administrator, custodian and transfer agent for the Fund. The principal address of the Administrator is 101 Barclay Street, New York, New York 10286. Under the Fund’s Administration and Accounting Agreement with the Trust, the Administrator provides necessary administrative and accounting services for the maintenance and operations of the Trust and the Fund. In addition, the Administrator makes available the office space, equipment, personnel and facilities required to provide such services. Under the Fund’s Custodian Agreement with the Trust, the Administrator maintains in separate accounts cash, securities and other assets of the Trust and the Fund, keeps all necessary accounts and records, and provides other services. The Administrator is required, upon the order of the Trust, to deliver securities held by it and to make payments for securities purchased by the Fund. Pursuant to the Fund’s Transfer Agency and Service Agreement with the Trust, the Administrator acts as a transfer agent for the Fund’s authorized and issued shares of beneficial interest, and as dividend disbursing agent of the Fund.

In consideration for its administrative services, the Administrator is entitled to a fee, which is calculated daily and paid monthly, at an annual rate of 0.025% on the first \$1 billion on the gross adjusted assets of the Fund and 0.02% on the gross adjusted assets of the Fund exceeding \$1 billion.

Distribution

Distributor. Foreside Fund Services, LLC (the “Distributor”) serves as the principal underwriter and distributor of shares of the Fund. The principal address of the Distributor is Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor has entered into an agreement with the Trust pursuant to which it distributes shares of the Fund (the “Distribution Agreement”). The Distributor continually distributes shares of the Fund on a best effort basis. The Distributor has no obligation to sell any specific quantity of Fund shares. The Distribution Agreement will continue for two years from its effective date and is renewable annually. Shares are continuously offered for sale by the Fund through the Distributor only in Creation Units, as described in the Fund’s Prospectus and this SAI. Shares amounting to less than a Creation Unit are not distributed by the Distributor. The Distributor is a broker-dealer registered under the Exchange Act and a member of the Financial Industry Regulatory Authority, Inc. (“FINRA”). The Distributor, its affiliates and officers have no role in determining the investment policies or which securities are to be purchased or sold by the Fund. The Distributor is not affiliated with the Trust, the Advisor, the Sub-Advisor, or any stock exchange.

The Distribution Agreement for the Fund provides that it may be terminated at any time, without the payment of any penalty, on at least 60 days’ prior written notice to the other party (i) by vote of a majority of the Independent Trustees or (ii) by vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund. The Distribution Agreement will terminate automatically in the event of its “assignment,” as that term is defined in the 1940 Act.

Distribution Plan. The Fund has adopted a distribution plan pursuant to Rule 12b-1 under the 1940 Act (the “Distribution Plan”). Under the Distribution Plan, the Distributor, or designated service providers, may receive up to 0.25% of the Fund’s assets attributable to shares as compensation for distribution services. Distribution services may include, but are not limited to: (i) services in connection with distribution assistance or (ii) payments to financial institutions and other financial intermediaries, such as broker-dealers, mutual fund “supermarkets” and the Distributor’s affiliates and subsidiaries, as compensation for services or reimbursement of expenses incurred in connection with distribution assistance.

No distribution fees are currently charged to the Fund; there are no plans to impose distribution fees, and no distribution fees will be charged for at least a year from the date of this SAI. However, in the event that distribution fees are charged in the future, because the Fund will pay these fees out of assets on an ongoing basis, over time distribution fees may cost you more than other types of sales charges and will increase the cost of your investment in the Fund.

Costs and Expenses. The Fund bears all expenses of its operation other than those assumed by the Advisor, which are discussed in detail above under “The Advisor and the Advisory Agreement.”

Payments to Broker-Dealers and Other Financial Intermediaries. The Advisor and Sub-Advisor (the “Advisor Entities”) may pay certain broker-dealers, banks and other financial intermediaries (“Intermediaries”) for certain activities related to the Fund and other series of the Trust. The Advisor Entities make these payments from their own assets and not from the assets of the Fund. Although a portion of the Advisor Entities’ revenue comes directly or indirectly in part from fees paid by the Fund and other series of the Trust, these payments do not increase the price paid by investors for the purchase of shares of, or the cost of owning, the Fund or other series of the Trust. The Advisor Entities make payments for Intermediaries’ participation in activities that are designed to make registered representatives, other professionals and individual investors more knowledgeable about exchange-traded products, including the Fund, or for other activities, such as participation in marketing activities and presentations, educational training programs, conferences, the development of technology platforms and reporting systems (“Education Costs”). The Advisor Entities also make payments to Intermediaries for certain printing, publishing and mailing costs associated with the Fund or materials relating to ETPs in general (“Publishing Costs”). In addition, the Advisor Entities make payments to Intermediaries that make shares of the Fund and certain other series of the Trust available to their clients, develop new products that feature the Advisor or otherwise promote the Fund and other series of the Trust. The Advisor Entities may also reimburse expenses or make payments from their own assets to Intermediaries or other persons in consideration of services or other activities that the Advisor Entities believe may benefit the Advisor’s business or facilitate investment in the Funds or other series of the Trust. Payments of the type described above are sometimes referred to as revenue-sharing payments.

Payments to an Intermediary may be significant to the Intermediary, and amounts that Intermediaries pay to your salesperson or other investment professional may also be significant for your salesperson or other investment professional. Because an Intermediary may make decisions about which investment options it will recommend or make available to its clients or what services to provide for various products based on payments it receives or is eligible to receive, such payments may create conflicts of interest between the Intermediary and its clients and these financial incentives may cause the Intermediary to recommend the Fund and other series of the Trust over other investments. The same conflict of interest and financial incentive exist with respect to your salesperson or other investment professional if he or she receives similar payments from his or her Intermediary firm.

The Advisor has contractual arrangements to make payments (in addition to payments for Education Costs or Publishing Costs) to one Intermediary, Raymond James Financial Services (“RJFS”). Pursuant to this special, long-term and significant arrangement (the “Marketing Program”), RJFS and certain of its affiliates have agreed, among other things, to actively promote the Fund and other series of the Trust to customers and investment professionals and in advertising campaigns as the preferred ETF, to offer the Fund and certain other series of the Trust in certain RJFS platforms and investment programs, in some cases at a reduced commission rate or commission free, and to provide marketing data to the Advisor. The Advisor has agreed to facilitate the Marketing Program by, among other things, making certain payments to RJFS for marketing and implementing certain brokerage and investment programs. Upon termination of the arrangement, the Advisor will make additional payments to RJFS based upon a number of criteria,

including the overall success of the Marketing Program and the level of services provided by RJFS during the wind-down period.

In addition, as of November 1, 2014, the Advisor is participating in a program offered by RJFS that will provide the Advisor with information about shareholder ownership of the Fund and assist with developing opportunities to provide shareholders with lower transaction costs. The Fund has agreed to reimburse the Advisor for a portion of its payments to participate in the program.

Any additions, modifications, or deletions to Intermediaries listed above that have occurred since the date of this SAI are not included in the list. Further, the Advisor Entities make Education Costs and Publishing Costs payments to other Intermediaries that are not listed above. The Advisor Entities may determine to make such payments based on any number of metrics. For example, the Advisor Entities may make payments at year-end or other intervals in a fixed amount, an amount based upon an Intermediary's services at defined levels or an amount based on the Intermediary's net sales of one or more series of the Trust in a year or other period, any of which arrangements may include an agreed-upon minimum or maximum payment, or any combination of the foregoing. As of the date of this SAI, the Advisor anticipates that the payments paid by the Advisor Entities in connection with the Fund and other series of the Trust will be immaterial to the Advisor Entities in the aggregate for the next year. Please contact your salesperson or other investment professional for more information regarding any such payments his or her Intermediary firm may receive. Any payments made by the Advisor Entities to an Intermediary may create the incentive for an Intermediary to encourage customers to buy shares of the Fund and/or other series of the Trust.

BOOK-ENTRY ONLY SYSTEM

The following information supplements and should be read in conjunction with the section in the Fund's Prospectus entitled "Shareholder Information."

Depository Trust Company ("DTC") acts as securities depository for the Fund's shares. Shares of the Fund are represented by securities registered in the name of DTC or its nominee, Cede & Co., and deposited with, or on behalf of, DTC.

DTC, a limited-purpose trust company, was created to hold securities of its participants (the "DTC Participants") and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities' certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC. More specifically, DTC is owned by a number of its DTC Participants and by the NYSE and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (the "Indirect Participants").

Beneficial ownership of shares is limited to DTC Participants, Indirect Participants and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in shares (owners of such beneficial interests are referred to herein as "Beneficial Owners") is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of shares.

Conveyance of all notices, statements and other communications to Beneficial Owners is effected as follows. Pursuant to the Depositary Agreement between the Trust and DTC, DTC is required to make available to the Trust upon request and for a fee to be charged to the Trust a listing of the shares of the Fund held by each DTC Participant. The Trust shall inquire of each such DTC Participant as to the number of Beneficial Owners holding shares, directly or indirectly, through such DTC Participant. The Trust shall provide each such DTC Participant with copies of such notice, statement or other communication, in such form, number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Trust shall pay to each such DTC Participants a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Share distributions shall be made to DTC or its nominee, Cede & Co., as the registered holder of all shares. DTC or its nominee, upon receipt of any such distributions, shall credit immediately DTC Participants' accounts with payments in amounts proportionate to their respective beneficial interests in shares of the Fund as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a "street name," and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspect of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in such shares, or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests, or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants.

DTC may decide to discontinue providing its service with respect to shares at any time by giving reasonable notice to the Trust and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Trust shall take action to find a replacement for DTC to perform its functions at a comparable cost. The DTC Participants' rules and policies are made publicly available through its website at www.dtcc.com.

CREATION AND REDEMPTION OF CREATION UNITS

Creation

The Trust issues and sells shares of the Fund only in Creation Units on a continuous basis through the Distributor, at their NAV next determined after receipt, on any Business Day (as defined below), of an order received in proper form.

A "Business Day" with respect to the Fund is any day on which the Exchange is open for business. As of the date of this SAI, the Exchange observes the following holidays: New Year's Day, Martin Luther King, Jr. Day, President's Day (Washington's Birthday), Good Friday, Memorial Day (observed), Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

Cash Purchase. Unlike many other ETFs, Creation Units of the Fund are sold only for cash ("Cash Purchase Amount"). Creation Units are sold at the net asset value next computed, plus a transaction fee, as described below. The Trust reserves the right to offer an in-kind option for creations of Creation Units for the Fund.

Procedures for Creation of Creation Units. To be eligible to place orders with the Distributor to create a Creation Unit of the Fund, an entity must be (i) a “Participating Party,” *i.e.*, a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the NSCC (the “Clearing Process”), a clearing agency that is registered with the SEC; or (ii) a DTC Participant (see “Book Entry Only System”), and, in each case, must have executed an agreement with the Trust, the Distributor and the Administrator with respect to creations and redemptions of Creation Units (“Participant Agreement”) (discussed below). A Participating Party and DTC Participant are collectively referred to as an “Authorized Participant.” Investors should contact the Distributor for the names of Authorized Participants that have signed a Participant Agreement with the Fund. All shares of the Fund, however created, will be entered on the records of DTC in the name of Cede & Co. for the account of a DTC Participant.

All orders to create Creation Units must be placed for one or more Creation Unit size aggregations of at least 25,000 shares. All orders to create Creation Units, whether through the Clearing Process (through a Participating Party) or outside the Clearing Process (through a DTC Participant), must be received by the Distributor no later than 3:00 p.m., Eastern Time, an hour earlier than the close of the regular trading session on the Exchange (ordinarily 4:00 p.m., Eastern Time), in each case on the date such order is placed in order for the creation of Creation Units to be effected based on the NAV of shares of the Fund as next determined on such date after receipt of the order in proper form. The date on which an order to create Creation Units (or an order to redeem Creation Units as discussed below) is placed is referred to as the “Transmittal Date.” Orders must be transmitted by an Authorized Participant by telephone or other transmission method acceptable to the Distributor pursuant to procedures set forth in the Participant Agreement, as described below (see “Placement of Creation Orders”). Severe economic or market disruptions or changes, or telephone or other communication failure, may impede the ability to reach the Distributor or an Authorized Participant.

Orders to create Creation Units of the Fund shall be placed with an Authorized Participant, as applicable, in the form required by such Authorized Participant. In addition, the Authorized Participant may request the investor to make certain representations or enter into agreements with respect to the order, *i.e.*, to provide for payments of cash, when required. Investors should be aware that their particular broker may not have executed a Participant Agreement and, therefore, orders to create Creation Units of the Fund have to be placed by the investor’s broker through an Authorized Participant that has executed a Participant Agreement. At any given time, there may be only a limited number of broker-dealers that have executed a Participant Agreement. Those placing orders for Creation Units through the Clearing Process should afford sufficient time to permit proper submission of the order to the Distributor prior to 3:00 p.m., Eastern Time, on the Transmittal Date.

Orders for creation that are effected outside the Clearing Process are likely to require transmittal by the DTC Participant earlier on the Transmittal Date than orders effected using the Clearing Process. Those persons placing orders outside the Clearing Process should ascertain the deadlines applicable to DTC and the Federal Reserve Bank wire system by contacting the operations department of the broker or depository institution effecting such transfer of the Cash Purchase Amount.

Placement of Creation Orders. All purchases of the Fund will be effected through a transfer of cash directly through DTC. Those persons placing purchase orders should ascertain the deadlines applicable to DTC and the Federal Reserve Bank wire system by contacting the operations department of the broker or depository institution effectuating such transfer of the Cash Purchase Amount together with the applicable transaction fee.

Acceptance of Orders for Creation Units. The Trust reserves the absolute right to reject a creation order transmitted to it by the Distributor in respect of the Fund if (a) the order is not in proper form; (b) the

investor(s), upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares of the Fund; (c) acceptance of the Cash Purchase Amount would have certain adverse tax consequences to the Fund; (d) acceptance of the Cash Purchase Amount would, in the opinion of counsel, be unlawful; (e) acceptance of the Cash Purchase Amount would otherwise, in the discretion of the Trust or the Advisor, have an adverse effect on the Trust or the rights of beneficial owners; or (f) in the event that circumstances outside the control of the Trust, the Distributor and the Advisor make it for all practical purposes impossible to process creation orders. Examples of such circumstances include acts of God or public service or utility problems such as fires, floods, extreme weather conditions and power outages resulting in telephone, telecopy and computer failures; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the Trust, the Advisor, the Distributor, DTC, NSCC or any other participant in the creation process, and similar extraordinary events. The Distributor shall notify a prospective creator of a Creation Unit and/or the Authorized Participant acting on behalf of the creator of a Creation Unit of its rejection of the order of such person. The Trust, the Administrator and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of the Cash Purchase Amount nor shall any of them incur any liability for the failure to give any such notification.

Creation Transaction Fee. To compensate the Trust for transfer and other transaction costs involved in creation transactions through the Clearing Process, investors will be required to pay a minimum creation transaction fee, assessed per transaction, as follows:

Fund	Creation Transaction Fee
AdvisorShares Treedale Rising Rates ETF	\$500

The Fund, subject to approval by the Board, may adjust the fee from time to time based upon actual experience. Investors who use the services of a broker or other such intermediary in addition to an Authorized Participant to effect a creation of a Creation Unit may be charged a fee for such services.

Redemption

Shares may be redeemed only in Creation Units at their NAV next determined after receipt of a redemption request in proper form by the Fund through the Administrator and only on a Business Day. The Trust will not redeem shares in amounts less than Creation Units. Beneficial Owners must accumulate enough shares in the secondary market to constitute a Creation Unit in order to have such shares redeemed by the Trust. There can be no assurance, however, that there will be sufficient liquidity in the public trading market at any time to permit assembly of a Creation Unit. Investors should expect to incur brokerage and other costs in connection with assembling a sufficient number of shares to constitute a redeemable Creation Unit.

Cash Redemption Amount. The redemption proceeds for a Creation Unit of the Fund will consist solely of cash in an amount equal to the NAV of the shares being redeemed, as next determined after receipt of a request in proper form, less a redemption transaction fee described below (the “Cash Redemption Amount”). The Trust reserves the right to offer an in-kind option for redemptions of Creation Units for the Fund.

Placement of Redemption Orders Using Clearing Process. Orders to redeem Creation Units through the Clearing Process must be delivered through a Participating Party that has executed the Participant Agreement. An order to redeem Creation Units using the Clearing Process is deemed received on the Transmittal Date if (i) such order is received by the Administrator not later than 3:00 p.m., Eastern Time on such Transmittal Date; and (ii) all other procedures set forth in the Participant Agreement are properly followed; such order will be effected based on the NAV of the Fund as next determined. An order to redeem Creation Units using the Clearing Process made in proper form but received by the Fund after 3:00

p.m., Eastern Time will be deemed received on the next Business Day immediately following the Transmittal Date and will be effected at the NAV next determined on such Business Day. The requisite Cash Redemption Amount will be transferred by the third (3rd) NSCC Business Day following the date on which such request for redemption is deemed received.

Placement of Redemption Orders Outside Clearing Process. Orders to redeem Creation Units outside the Clearing Process must be delivered through a DTC Participant that has executed the Participant Agreement. A DTC Participant who wishes to place an order for redemption of Creation Units to be effected outside the Clearing Process need not be a Participating Party, but such orders must state that the DTC Participant is not using the Clearing Process and that redemption of Creation Units will instead be effected through transfer of shares directly through DTC. An order to redeem Creation Units outside the Clearing Process is deemed received by the Administrator on the Transmittal Date if (i) such order is received by the Administrator not later than 3:00 p.m., Eastern Time on such Transmittal Date; (ii) such order is accompanied or preceded by the requisite number of shares of the Fund and/or the Cash Redemption Amount specified in such order, which delivery must be made through DTC to the Administrator no later than 11:00 a.m. and 2:00 p.m., respectively, Eastern Time, on the next Business Day following such Transmittal Date (the “DTC Cut-Off-Time”); and (iii) all other procedures set forth in the Participant Agreement are properly followed.

After the Administrator has deemed an order for redemption outside the Clearing Process received, the Administrator will initiate procedures to transfer the requisite Cash Redemption Amount to the Authorized Participant by the third Business Day following the Transmittal Date on which such redemption order is deemed received by the Administrator.

The right of redemption may be suspended or the date of payment postponed with respect to the Fund (1) for any period during which the Exchange is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the Exchange is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of the shares of the Fund or determination of the shares’ NAV is not reasonably practicable; or (4) in such other circumstance as is permitted by the SEC.

Redemption Transaction Fee. To compensate the Trust for transfer and other transaction costs involved in redemption transactions through the Clearing Process, investors will be required to pay a minimum redemption transaction fee, assessed per transaction as follows:

Fund	Redemption Transaction Fee
AdvisorShares Treesdale Rising Rates ETF	\$500

The Fund, subject to approval by the Board, may adjust the fee from time to time based upon actual experience. Investors who use the services of a broker or other such intermediary in addition to an Authorized Participant to effect a redemption of a Creation Unit may be charged a fee for such services.

DETERMINATION OF NET ASSET VALUE

The following information supplements and should be read in conjunction with the section in the Fund’s Prospectus entitled “Calculating Net Asset Value.”

The NAV per share of the Fund is computed by dividing the value of the net assets of the Fund (*i.e.*, the value of its total assets less total liabilities) by the total number of shares of the Fund outstanding, rounded to the nearest cent. Expenses and fees, including without limitation, the management, administration and distribution fees, are accrued daily and taken into account for purposes of determining NAV per share. The

NAV per share for the Fund is calculated by the Administrator and determined as of the regularly scheduled close of normal trading on the NYSE (normally 4:00 p.m. Eastern Time) on each day that the NYSE is open.

In computing the Fund's NAV, the Fund's securities holdings are valued based on their last readily available market price. Price information on listed securities, including ETFs in which the Fund invests, is taken from the exchange where the security is primarily traded. Other portfolio securities and assets for which market quotations are not readily available or determined to not represent the current fair value are valued based on fair value as determined in good faith by the Fund's Sub-Advisor in accordance with procedures adopted by the Board.

DIVIDENDS, DISTRIBUTIONS, AND TAXES

Dividends and Distributions

The following information supplements and should be read in conjunction with the section in the Prospectus entitled "Shareholder Information."

General Policies. Dividends from net investment income, if any, are declared and paid at least annually by the Fund. Distributions of net realized securities gains, if any, generally are declared and paid once a year, but the Fund may make distributions on a more frequent basis for the Fund to comply with the distribution requirements of the Internal Revenue Code, in all events in a manner consistent with the provisions of the 1940 Act.

Dividends and other distributions on shares are distributed, as described below, on a pro rata basis to Beneficial Owners of such shares. Dividend payments are made through DTC Participants and Indirect Participants to Beneficial Owners then of record with proceeds received from the Fund.

The Fund may make additional distributions to the extent necessary (i) to distribute the entire annual taxable income of the Fund, plus any net capital gains and (ii) to avoid imposition of the excise tax imposed by Section 4982 of the Internal Revenue Code. Management of the Trust reserves the right to declare special dividends for the Fund if, in its reasonable discretion, such action is necessary or advisable to preserve the status of the Fund as a RIC or to avoid imposition of income or excise taxes on undistributed income.

Dividend Reinvestment Service. No reinvestment service is provided by the Trust. Broker-dealers may make available the DTC book-entry Dividend Reinvestment Service for use by Beneficial Owners of the Fund for reinvestment of their dividend distributions. Beneficial Owners should contact their broker to determine the availability and costs of the service and the details of participation therein. Brokers may require Beneficial Owners to adhere to specific procedures and timetables. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole shares of the Fund purchased in the secondary market.

Federal Income Taxes

The following is a summary of certain additional U.S. federal income tax considerations generally affecting the Fund and its shareholders that supplements the summary in the Prospectus. No attempt is made to present a comprehensive explanation of the federal, state, local or foreign tax treatment of the Fund or its shareholders, and the discussion here and in the Prospectus is not intended to be a substitute for careful tax planning.

Recently enacted tax legislation commonly referred to as the Tax Cuts and Jobs Act (the “Tax Act”) makes significant changes to the U.S. federal income tax rules for taxation of individuals and corporations, generally effective for taxable years beginning after December 31, 2017. Many of the changes applicable to individuals are temporary and would apply only to taxable years beginning after December 31, 2017 and before January 1, 2026. There are only minor changes with respect to the specific rules only applicable to a RIC, such as the Fund. The Tax Act, however, makes numerous other changes to the tax rules that may affect shareholders and the Fund. You are urged to consult with your own tax advisor regarding how the Tax Act affects your investment in the Fund.

The following general discussion of certain federal income tax consequences is based on provisions of the Internal Revenue Code and the regulations issued thereunder as in effect on the date of this SAI. New legislation, as well as administrative changes or court decisions, may significantly change the conclusions expressed herein, and may have a retroactive effect with respect to the transactions contemplated herein.

Shareholders are urged to consult their own tax advisors regarding the application of the provisions of tax law described in this SAI in light of the particular tax situations of the shareholders and regarding specific questions as to federal, state, or local taxes.

Regulated Investment Company (RIC) Status

The Fund will seek to qualify for treatment as a RIC under the Internal Revenue Code. Provided that for each tax year the Fund: (i) meets the requirements to be treated as a RIC (as discussed below); and (ii) distributes at least an amount equal to the sum of 90% of the Fund’s net investment income for such year (including, for this purpose, the excess of net realized short-term capital gains over net long-term capital losses) and 90% of its net tax-exempt interest income (the “Distribution Requirement”), the Fund itself will not be subject to federal income taxes to the extent the Fund’s net investment income and the Fund’s net realized capital gains, if any, are timely distributed to the Fund’s shareholders. One of several requirements for RIC qualification is that the Fund must receive at least 90% of the Fund’s gross income each year from dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, or other income derived with respect to the Fund’s business of investing in stock, securities, foreign currencies and net income from an interest in a qualified publicly traded partnership (the “90% Test”). A second requirement for qualification as a RIC is that the Fund must diversify its holdings so that, at the end of each quarter of the Fund’s taxable year: (a) at least 50% of the market value of the Fund’s total assets is represented by cash and cash items, U.S. government securities, securities of other RICs, and other securities, with these other securities limited, in respect to any one issuer, to an amount not greater than 5% of the value of the Fund’s total assets or 10% of the outstanding voting securities of such issuer; and (b) not more than 25% of the value of its total assets are invested, including through corporations in which the Fund owns a 20% or more voting stock interest, in the securities (other than U.S. government securities or securities of other RICs) of any one issuer, the securities (other than securities of other RICs) of two or more issuers which the Fund controls and which are engaged in the same, similar, or related trades or businesses, or the securities of one or more qualified publicly traded partnerships (the “Asset Test”).

If the Fund fails to satisfy the 90% Test or the Asset Test, the Fund may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain *de minimis* failures of the Asset Test. In order to qualify for relief provisions for a failure to meet the Asset Test, the Fund may be required to dispose of certain assets. If the Fund fails to qualify for treatment as a RIC for any year, and the relief provisions are not available, all of its taxable income will be subject to federal income tax at regular corporate rates without any deduction for distributions to shareholders. In such case, its shareholders would be taxed as if they received ordinary dividends, although the dividends could be

eligible for the dividends received deduction for corporate shareholders and the dividends may be eligible for the lower tax rates available to noncorporate shareholders on qualified dividend income. To requalify for treatment as a RIC in a subsequent taxable year, the Fund would be required to satisfy the RIC qualification requirements for that year and to distribute any earnings and profits from any year in which the Fund failed to qualify for tax treatment as a RIC. If the Fund failed to qualify as a RIC for a period greater than two taxable years, it would generally be required to pay a Fund-level tax on certain net built-in gains recognized with respect to certain of its assets upon a disposition of such assets within five years of qualifying as a RIC in a subsequent year. The Board reserves the right not to maintain the qualification of the Fund for treatment as a RIC if it determines such course of action to be beneficial to shareholders. If the Fund determines that it will not qualify for treatment as a RIC under Subchapter M of the Internal Revenue Code, the Fund will establish procedures to reflect the anticipated tax liability in the Fund's NAV.

The Fund may elect to treat part or all of any "qualified late year loss" as if it had been incurred in the succeeding taxable year in determining the Fund's taxable income, net capital gain, net short-term capital gain, and earnings and profits. A "qualified late year loss" generally includes net capital loss, net long-term capital loss, or net short-term capital loss incurred after October 31 of the current taxable year, and certain other late-year losses.

The treatment of capital loss carryovers for the Fund is similar to the rules that apply to capital loss carryovers of individuals, which provide that such losses are carried over indefinitely. If the Fund has a "net capital loss" (that is, capital losses in excess of capital gains) for a taxable year, the excess of the Fund's net short-term capital losses over its net long-term capital gains is treated as a short-term capital loss arising on the first day of the Fund's next taxable year, and the excess (if any) of the Fund's net long-term capital losses over its net short-term capital gains is treated as a long-term capital loss arising on the first day of the Fund's next taxable year. The carryover of capital losses may be limited under the general loss limitation rules if the Fund experiences an ownership change as defined in the Internal Revenue Code.

Notwithstanding the Distribution Requirement described above, which generally requires the Fund to distribute at least 90% of its annual investment company taxable income and the excess of its exempt-interest income (but does not require any minimum distribution of net capital gain), the Fund will generally be subject to a nondeductible 4% federal excise tax to the extent it fails to distribute by the end of any calendar year at least the sum of 98% of its ordinary income for the year and 98.2% of its capital gain net income (the excess of short- and long-term capital gains over short- and long-term capital losses) for the one-year period ending on October 31 of that year (including any retained amount from the prior calendar year on which the Fund paid no federal income tax). The Fund intends to make sufficient distributions, or deemed distributions, to avoid imposition of the excise tax, but can make no assurances that all such tax liability will be eliminated. The Fund may in certain circumstances be required to liquidate Fund investments in order to make sufficient distributions to avoid federal excise tax liability at a time when the investment adviser might not otherwise have chosen to do so, and liquidation of investments in such circumstances may affect the ability of the Fund to satisfy the requirement for qualification as a RIC.

Fund Distributions

The Fund receives income generally in the form of interest on investments. This income, plus net short-term capital gains, if any, less expenses incurred in the operation of the Fund, constitutes the Fund's net investment income from which dividends may be paid to you. Any distributions by the Fund from such income will be taxable to you as ordinary income or at the lower capital gains rates that apply to individuals receiving qualified dividend income, whether you take them in cash or in additional shares.

Distributions reported to Fund shareholders as capital gain dividends will be taxable at the rates applicable to long-term capital gains, regardless of how long the shareholder has owned the shares. Since the Fund's income is derived primarily from investments other than the stock of corporations, the Fund does not expect a significant portion of its distributions to qualify to be reported as qualified dividend income (which is taxable to noncorporate shareholders at reduced maximum tax rates) or to qualify for the dividends-received deduction for shareholders that are corporations.

Shareholders who have not held Fund shares for a full year should be aware that the Fund may report and distribute, as ordinary dividends or capital gain dividends, a percentage of income that is not equal to the percentage of the Fund's ordinary income or net capital gain, respectively, actually earned during the period of investment in the Fund.

If the Fund's distributions for a taxable year exceed its taxable income and capital gains realized during a taxable year, all or a portion of the distributions made for the taxable year may be recharacterized as a return of capital to shareholders. A return of capital distribution will generally not be taxable, but will reduce each shareholder's cost basis in the Fund and generally result in a higher reported capital gain or lower reported capital loss when those shares on which the distribution was received are sold.

A dividend or distribution received shortly after the purchase of shares reduces the net asset value of the shares by the amount of the dividend or distribution and, although in effect a return of capital, will be taxable to the shareholder. If the net asset value of shares were reduced below the shareholder's cost by dividends or distributions representing gains realized on sales of securities, such dividends or distributions would be a return of investment though taxable to the shareholder in the same manner as other dividends or distributions.

The Fund (or its administrative agent) will inform you of the amount of your ordinary income dividends, qualified dividend income and capital gain distributions, if any, and will advise you of their tax status for federal income tax purposes shortly after the close of each calendar year. If you have not held your shares for a full year, the Fund may designate and distribute to you, as ordinary income, qualified dividend income or capital gain, a percentage of income that is not equal to the actual amount of such income earned during the period of your investment in the Fund.

Dividends declared to shareholders of record in October, November or December and actually paid in January of the following year will be treated as having been received by shareholders on December 31 of the calendar year in which declared. Under this rule, therefore, a shareholder may be taxed in one year on dividends or distributions actually received in January of the following year.

To the extent that the Fund makes a distribution of income received by the Fund in lieu of dividends (a "substitute payment") with respect to securities on loan pursuant to a securities lending transaction, such income will not constitute qualified dividend income to individual shareholders and will not be eligible for the dividends received deduction for corporate shareholders.

Medicare Tax

U.S. individuals with adjusted gross income exceeding certain thresholds (\$250,000 if married filing jointly or if considered a "surviving spouse" for federal income tax purposes, \$125,000 if married filing separately, and \$200,000 in other cases) are subject to a 3.8% Medicare contribution tax on all or a portion of their "net investment income," including interest, dividends, and capital gains (including capital gains realized on the sale or exchange of shares). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

Sale, Exchange or Redemption of Shares

Sales, exchanges and redemptions of Fund shares are generally taxable transactions for federal income tax purposes. In general, if you hold your shares as a capital asset, gain or loss realized will be capital in nature and will be classified as long-term capital gain or loss if the shares have been held for more than 12 months and otherwise will be treated as a short-term capital gain or loss.

However, if shares on which a shareholder has received a net capital gain distribution are subsequently sold, exchanged, or redeemed and such shares have been held for six months or less, any loss recognized will be treated as a long-term capital loss to the extent of the net capital gain distribution. In addition, the loss realized on a sale or other disposition of shares will be disallowed to the extent a shareholder repurchases (or enters into a contract or option to repurchase) shares within a period of 61 days (beginning 30 days before and ending 30 days after the disposition of the shares). This loss disallowance rule will apply to shares received through the reinvestment of dividends during the 61-day period.

Cost Basis Reporting

The cost basis of shares acquired by purchase will generally be based on the amount paid for the shares and then may be subsequently adjusted for other applicable transactions as required by the Internal Revenue Code. The difference between the selling price and the cost basis of shares generally determines the amount of the capital gain or loss realized on the sale or exchange of shares. Contact the broker through whom you purchased your shares to obtain information with respect to the available cost basis reporting methods and elections for your account.

Foreign Taxes

The Fund may be subject to foreign withholding taxes on income it may earn from investing in foreign securities which may reduce the return on such investments. Tax conventions between certain countries and the U.S. may reduce or eliminate such taxes in some cases. The Fund's investments in foreign securities or foreign currencies may increase or accelerate the Fund's recognition of ordinary income and may affect the timing or amount of the Fund's distributions. If more than 50% of the value of the Fund's assets at taxable year-end is represented by debt and equity securities of foreign corporations, the Fund may elect to permit shareholders who are U.S. citizens, resident aliens or U.S. corporations to claim a foreign tax credit or deduction (but not both) on their U.S. income tax returns for their pro rata portion of qualified taxes paid by the Fund to foreign countries in respect of foreign securities the Fund has held for at least the minimum period specified in the Internal Revenue Code. Certain limitations imposed by the Internal Revenue Code may prevent shareholders from receiving a full foreign tax credit or deduction for their allocable amount of such taxes. If the Fund makes the election, the Fund (or its administrative agent) will report annually to its shareholders the respective amounts per share of the Fund's income from sources within, and taxes paid to, foreign countries and U.S. possessions.

Options, Swaps and Other Complex Securities

The Fund and the ETPs in which the Fund invests may invest in complex securities such as equity options, index options, repurchase agreements, foreign currency contracts, hedges and swaps, transactions treated as straddles for U.S. federal income tax purposes, and futures contracts. These investments may be subject to numerous special and complex tax rules. These rules could affect the Fund's or the ETPs' ability to qualify as a RIC, affect whether gains and losses recognized by the Fund or the ETPs are treated as ordinary income or capital gain, accelerate the recognition of income to the Fund and/or defer the Fund's or the ETPs' ability to recognize losses. In turn, those rules may affect the amount, timing or character of the income distributed by the Fund. In particular, the Fund's investments in certain rate-linked derivative instruments may generate income that is not qualifying

income under the 90% Test and such investments may not be treated as investments in “securities” for purposes of the Asset Test.

With respect to any investments in STRIPS, Treasury Receipts, and other zero coupon securities which are sold at original issue discount and thus do not make periodic cash interest payments, the Fund may be required to include as part of its current income the imputed interest on such obligations even though it may not have received any interest payments on such obligations during that period. Because the Fund intends to distribute all of its net investment income to its shareholders, the Fund may have to sell Fund securities to distribute such imputed income which may occur at a time when the Adviser would not have chosen to sell such securities and which may result in taxable gain or loss and may affect the amount and timing of distributions from the Fund.

Any market discount recognized on a bond is taxable as ordinary income. A market discount bond is a bond acquired in the secondary market at a price below redemption value or adjusted issue price if issued with original issue discount. Absent an election by the Fund (or otherwise required) to include the market discount in income as it accrues, gain on the Fund’s disposition of such an obligation will be treated as ordinary income rather than capital gain to the extent of the accrued market discount.

The Fund may be required for federal income tax purposes to mark to market and recognize as income for each taxable year its net unrealized gains and losses on certain futures contracts and options as of the end of the year as well as those actually realized during the year. Options on “broad based” securities indices are classified as “non-equity options” under the Internal Revenue Code. Gains and losses resulting from the expiration, exercise, or closing of such non-equity options, as well as gains and losses resulting from futures contract transactions, will be treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss (hereinafter, “blended gain or loss”). In addition, any non-equity option and futures contract held by the Fund on the last day of a fiscal year will be treated as sold for market value on that date, and gain or loss recognized as a result of such deemed sale will be blended gain or loss. The Fund may be required to defer the recognition of losses on futures contracts, options contracts and swaps to the extent of any unrecognized gains on offsetting positions held by the Fund. These provisions may also require the Fund to mark-to-market certain types of positions in its portfolio (i.e., treat them as if they were closed out), which may cause the Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the Distribution Requirement and for avoiding the excise tax discussed above. Accordingly, in order to avoid certain income and excise taxes, the Fund may be required to liquidate its investments at a time when the investment adviser might not otherwise have chosen to do so.

The Fund may invest in REITs. Investments in REIT equity securities may require the Fund to accrue and distribute income not yet received. To generate sufficient cash to make the requisite distributions, the Fund may be required to sell securities in its portfolio (including when it is not advantageous to do so) that it otherwise would have continued to hold. The Fund’s investments in REIT equity securities may at other times result in the Fund’s receipt of cash in excess of the REIT’s earnings; if the Fund distributes these amounts, these distributions could constitute a return of capital to such Fund’s shareholders for federal income tax purposes. Dividends paid by a REIT, other than capital gain distributions, will be taxable as ordinary income up to the amount of the REIT’s current and accumulated earnings and profits. Capital gain dividends paid by a REIT to the Fund will be treated as long-term capital gains by the Fund and, in turn, may be distributed by the Fund to its shareholders as a capital gain distribution. Dividends received by the Fund from a REIT generally will not constitute qualified dividend income or qualify for the dividends received deduction. If a REIT is operated in a manner such that it fails to qualify as a REIT, an investment in the REIT would become subject to double taxation, meaning the taxable income of the REIT would be subject to federal income tax at regular corporate rates without any deduction for dividends paid to shareholders and the dividends would be taxable to shareholders as ordinary income (or possibly as

qualified dividend income) to the extent of the REIT's current and accumulated earnings and profits.

REITs in which the Fund invests often do not provide complete and final tax information to the Fund until after the time that the Fund issue a tax reporting statement. As a result, the Fund may at times find it necessary to reclassify the amount and character of its distributions to you after it issues your tax reporting statement. When such reclassification is necessary, the Fund (or its administrative agent) will send you a corrected, final Form 1099-DIV to reflect the reclassified information. If you receive a corrected Form 1099-DIV, use the information on this corrected form, and not the information on the previously issued tax reporting statement, in completing your tax returns.

The Fund may invest in REITs directly or indirectly. The Tax Act treats "qualified REIT dividends" (*i.e.*, ordinary REIT dividends other than capital gain dividends and portions of REIT dividends designated as qualified dividend income eligible for capital gain tax rates) as eligible for a 20% deduction by non-corporate taxpayers. This deduction, if allowed in full, equates to a maximum effective tax rate of 29.6% (37% top rate applied to income after 20% deduction). The Tax Act does not contain a provision permitting RICs, such as the Fund, to pass the special character of this income through to their shareholders. Currently, direct investors in REITs will enjoy the lower rate, but investors in RICs that invest in such REITs, will not. It is uncertain whether future technical corrections or administrative guidance will address this issue to enable RICs to pass through the special character of "qualified REIT dividends" to shareholders.

Back-Up Withholding

The Fund (or financial intermediaries, such as brokers, through which shareholders own Fund shares) generally is required to withhold and to remit to the U.S. Treasury a percentage of the taxable distributions and the sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify that he, she or it is not subject to such withholding.

Foreign Shareholders

Any non-U.S. investors in the Fund may be subject to U.S. withholding and estate tax and are encouraged to consult their tax advisors prior to investing in the Fund. Foreign shareholders (*i.e.*, nonresident alien individuals and foreign corporations, partnerships, trusts and estates) are generally subject to U.S. withholding tax at the rate of 30% (or a lower tax treaty rate) on distributions derived from taxable ordinary income. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Short-term capital gain dividends received by a nonresident alien individual who is present in the U.S. for a period or periods aggregating 183 days or more during the taxable year are not exempt from this 30% withholding tax. Gains realized by foreign shareholders from the sale or other disposition of shares of the Fund generally are not subject to U.S. taxation, unless the recipient is an individual who is physically present in the U.S. for 183 days or more per year. Foreign shareholders who fail to provide an applicable Internal Revenue Service ("IRS") form may be subject to backup withholding on certain payments from the Fund. Backup withholding will not be applied to payments that are subject to the 30% (or lower applicable treaty rate) withholding tax described in this paragraph. Different tax consequences may result if the foreign shareholder is engaged in a trade or business within the United States. In addition, the tax consequences to a foreign shareholder entitled to claim the benefits of a tax treaty may be different than those described above.

Unless certain non-U.S. entities that hold Fund shares comply with IRS requirements that generally require them to report information regarding U.S. persons investing in, or holding accounts with, such entities, a

30% withholding tax may apply to Fund distributions payable to such entities and may apply to redemptions and certain capital gain dividends payable to such entities after December 31, 2018. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the U.S. and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of the agreement.

A beneficial holder of shares who is a foreign person may be subject to foreign, state and local tax and to the U.S. federal estate tax in addition to the federal income tax consequences referred to above. If a shareholder is eligible for the benefits of a tax treaty, any effectively connected income or gain will generally be subject to U.S. federal income tax on a net basis only if it is also attributable to a permanent establishment or fixed base maintained by the shareholder in the United States.

Taxes on Creation and Redemptions of Creation Units

A person who purchases a Creation Unit by exchanging securities in-kind generally will recognize a gain or loss equal to the difference between (a) the sum of the market value of the Creation Units at the time and any net cash received, and (b) the sum of the purchaser's aggregate basis in the securities surrendered and any net cash paid for the Creation Units. A person who redeems Creation Units and receives securities in-kind from the Fund will generally recognize a gain or loss equal to the difference between (x) the sum of the redeemer's basis in the Creation Units, and (y) the sum of the aggregate market value of the securities received and any net cash received. The IRS, however, may assert that a loss realized upon an exchange of securities for Creation Units may not be deducted currently under the rules governing "wash sales" by an Authorized Participant that does not mark-to-market its holdings, or on the basis that there has been no significant change in economic position.

Any capital gain or loss realized upon the creation of Creation Units will generally be treated as long-term capital gain or loss if the securities exchanged for such Creation Units have been held for more than one year. Any capital gain or loss realized upon the redemption of Creation Units will generally be treated as long-term capital gain or loss if the shares comprising the Creation Units have been held for more than one year. Otherwise, such capital gains or losses will be treated as short-term capital gains or losses. Any loss upon a redemption of Creation Units held for six months or less should be treated as long-term capital loss to the extent of any amounts treated as distributions to the person redeeming the Creation Units of long-term capital gain with respect to the Creation Units (including any amounts credited to that person as undistributed capital gains). In some circumstances, a redemption of Creation Units may be treated as resulting in a distribution to which section 301 of the Internal Revenue Code applies, potentially causing amounts received by the shareholder in the redemption to be treated as dividend income rather than as a payment in exchange for Creation Units. The rules for determining when a redemption will be treated as giving rise to a distribution under section 301 of the Internal Revenue Code and the tax consequences of Internal Revenue Code section 301 distributions are complex. Persons purchasing or redeeming Creation Units should consult their own tax advisors with respect to the tax treatment of any creation or redemption transaction.

The Fund has the right to reject an order for Creation Units if the purchaser (or a group of purchasers) would, upon obtaining the shares so ordered, own 80% or more of the outstanding shares of the Fund and if, pursuant to section 351 of the Internal Revenue Code, the Fund would have a basis in the deposit securities different from the market value of such securities on the date of deposit. The Fund also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determination. If the Fund does issue Creation Units to a purchaser (or a group of purchasers) that would, upon obtaining the Creation Units so ordered, own 80% or more of the outstanding shares of the Fund, the purchaser (or a group of purchasers) will not recognize gain or loss upon the exchange of securities for Creation Units.

The Fund may include cash when paying the redemption price for Creation Units in addition to, or in place of, the delivery of a basket of securities. The Fund may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment than if the in-kind redemption process was used.

Other Tax Considerations

Certain tax-exempt shareholders, including qualified pension plans, individual retirement accounts, salary deferral arrangements, 401(k) plans, and other tax-exempt entities, generally are exempt from federal income taxation except with respect to their unrelated business taxable income (“UBTI”). Under the Tax Act, tax-exempt entities are not permitted to offset losses from one trade or business against the income or gain of another trade or business. Certain net losses incurred prior to January 1, 2018 are permitted to offset gain and income created by an unrelated trade or business, if otherwise available. Under current law, a RIC generally serves to block UBTI from being realized by its tax-exempt shareholders. However, notwithstanding the foregoing, tax-exempt shareholders could realize UBTI by virtue of an investment in the Fund where, for example, (i) the Fund invests in REITs that hold residual interests in real estate mortgage investment conduits (“REMICs”) (ii) the Fund invests in a REIT that: (a) is a taxable mortgage pool (“TMP”), (b) has a TMP subsidiary, or (c) invests in a residual interest of a REMIC, or (iii) shares in the Fund constitute debt-financed property in the hands of the tax-exempt shareholder within the meaning of section 514(b) of the Internal Revenue Code. Charitable remainder trusts are subject to special rules and should consult their tax advisors. The IRS has issued guidance with respect to these issues and prospective shareholders, especially charitable remainder trusts, are strongly encouraged to consult with their tax advisors regarding these issues.

Under U.S. Treasury regulations, if a shareholder recognizes a loss of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder in any single taxable year (or certain greater amounts over a combination of years), the shareholder must file with the IRS a disclosure statement on IRS Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC such as the Fund are not excepted. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer’s treatment of the loss is proper. Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

The Fund may be subject to tax or taxes in certain states where the Fund does business. Furthermore, in those states which have income tax laws, the tax treatment of the Fund and of Fund shareholders with respect to distributions by the Fund may differ from federal tax treatment.

The Fund’s shares held in a tax qualified retirement account will generally not be subject to federal taxation on income and capital gains distributions from the Fund until a shareholder begins receiving payments from their retirement account. Shareholders are urged to consult their own tax advisors regarding the particular tax consequences to them of an investment in the Fund and regarding specific questions as to foreign, federal, state, or local taxes.

OTHER INFORMATION

Portfolio Holdings

The Board has approved portfolio holdings disclosure policies that govern the timing and circumstances of disclosure to shareholders and third parties of information regarding the portfolio investments held by the

Fund. These policies and procedures, as described below, are designed to ensure that disclosure of portfolio holdings is in the best interests of Fund shareholders, and address conflicts of interest between the interests of Fund shareholders and those of the Advisor, Sub-Advisor, Distributor, or any affiliated person of the Fund, the Advisor, Sub-Advisor, or Distributor.

Each Business Day, Fund portfolio holdings information will be provided to the Distributor or other agent for dissemination through the facilities of the NSCC and/or other fee-based subscription services to NSCC members and/or subscribers to those other fee-based subscription services, including Authorized Participants, and to entities that publish and/or analyze such information in connection with the process of purchasing or redeeming Creation Units or trading shares of the Fund in the secondary market. This information typically reflects the Fund's anticipated holdings on the following Business Day. Daily access to information concerning the Fund's portfolio holdings also is permitted (i) to certain personnel of those service providers who are involved in portfolio management and providing administrative, operational, risk management, or other support to portfolio management, including affiliated broker-dealers and/or Authorized Participants and (ii) to other personnel of the Advisor, Sub-Advisor, and other service providers, such as the Administrator, and fund accountant, who deal directly with, or assist in, functions related to investment management, administration, custody and fund accounting, as may be necessary to conduct business in the ordinary course in a manner consistent with agreements with the Fund and/or the terms of the Fund's current registration statement.

From time to time, information concerning Fund portfolio holdings, other than portfolio holdings information made available in connection with the creation/redemption process, as discussed above, may also be provided to other entities that provide additional services to the Fund, including, among others, rating or ranking organizations, in the ordinary course of business, no earlier than one Business Day following the date of the information. Portfolio holdings information made available in connection with the creation/redemption process may be provided to other entities that provide additional services to the Fund in the ordinary course of business after it has been disseminated to the NSCC.

The Fund's Chief Compliance Officer, or a compliance manager designated by the Chief Compliance Officer, may also grant exceptions to permit additional disclosure of Fund portfolio holdings information at differing times and with different lag times (the period from the date of the information to the date the information is made available), if any, in instances where the Fund has legitimate business purposes for doing so, it is in the best interests of shareholders, and the recipients are subject to a duty of confidentiality, including a duty not to trade on the nonpublic information and are required to execute an agreement to that effect. The Board will be informed of any such disclosures at its next regularly scheduled meeting or as soon as is reasonably practicable thereafter. In no event shall the Fund, the Advisor, the Sub-Advisor, or any other party receive any direct or indirect compensation in connection with the disclosure of information about Fund portfolio holdings.

The Board exercises continuing oversight of the disclosure of the Fund's portfolio holdings by (1) overseeing the implementation and enforcement of portfolio holdings disclosure policies and procedures, the Codes of Ethics, and protection of non-public information policies and procedures (collectively, the "Portfolio Holdings Governing Policies") by the Fund's Chief Compliance Officer and the Fund, (2) considering reports and recommendations by the Chief Compliance Officer concerning any material compliance matters (as defined in Rule 38a-1 under the 1940 Act and Rule 206(4)-7 under the Advisers Act) that may arise in connection with any Portfolio Holdings Governing Policies, and (3) considering whether to approve or ratify any amendment to any Portfolio Holdings Governing Policies. The Board and the Fund reserve the right to amend the Portfolio Holdings Governing Policies at any time and from time to time without prior notice in their sole discretion. For purposes of the Portfolio Holdings Governing Policies, the term "portfolio holdings" means the equity and debt securities (e.g., stocks and bonds) held by the Fund and does not mean the cash investments, derivatives, and other investment positions (collectively, other investment positions) held by the Fund, which are not disclosed.

In addition to the permitted disclosures described above, the Fund must disclose its complete holdings quarterly within 60 days of the end of each fiscal quarter in the Annual Report and Semi-Annual Report to Fund shareholders and in the quarterly holdings report on Form N-Q. These reports are available, free of charge, on the EDGAR database on the SEC's website at www.sec.gov.

Voting Rights

Each share has one vote with respect to matters upon which a shareholder vote is required consistent with the requirements of the 1940 Act and the rules promulgated thereunder. Shareholders receive one vote for every full Fund share owned. The Fund will vote separately on matters relating solely to the Fund. All shares of the Fund are freely transferable.

As a Delaware statutory trust, the Trust is not required to hold annual shareholder meetings unless otherwise required by the 1940 Act. However, a meeting may be called by the Board on the written request of shareholders owning at least 10% of the outstanding shares of the Trust entitled to vote. If a meeting is requested by shareholders, the Trust will provide appropriate assistance and information to the shareholders who requested the meeting. Shareholder inquiries can be made by calling 877.843.3831 or by writing to the Trust at 4800 Montgomery Lane, Suite 150, Bethesda, Maryland 20814.

Shareholder Inquiries

Shareholders may visit the Trust's website at www.advisorshares.com or call 877.843.3831 to obtain information on account statements, procedures, and other related information.

COUNSEL

Morgan, Lewis & Bockius LLP, located at 1111 Pennsylvania Avenue, N.W., Washington, D.C. 20004, serves as counsel to the Trust.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Tait, Weller & Baker LLP, located at 1818 Market Street, Philadelphia, Pennsylvania 19103, serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

CUSTODIAN

The Bank of New York Mellon, located at 240 Greenwich Street, New York, New York 10286, serves as custodian for the Trust and the Fund under a custody agreement between the Trust and the Custodian. Pursuant to the agreement, the Bank of New York Mellon holds the portfolio securities of the Fund and maintains all necessary related accounts and records.

FINANCIAL STATEMENTS

As of the date of this SAI, the Fund has not yet commenced operations and therefore, it does not have any financial statements. The Fund's financial statements will be available after the Fund has completed its first fiscal year of operations.

APPENDIX A

Bond Ratings

Below is a description of Standard & Poor's Ratings Group ("Standard & Poor's") and Moody's Investors Service, Inc. ("Moody's") bond rating categories.

Standard & Poor's Ratings Group Corporate Bond Ratings

AAA - This is the highest rating assigned by Standard & Poor's to a debt obligation and indicates an extremely strong capacity to pay principal and interest.

AA - Bonds rated "AA" also qualify as high-quality debt obligations. Capacity to pay principal and interest is very strong, and in the majority of instances they differ from "AAA" issues only in small degree.

A - Bonds rated "A" have a strong capacity to pay principal and interest, although they are somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than bonds in higher rated categories.

BBB - Bonds rated "BBB" are regarded as having an adequate capability to pay principal and interest. Whereas they normally exhibit adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay principal and interest for bonds in this category than for bonds in higher rated categories.

BB - Bonds rated "BB" have less near-term vulnerability to default than other speculative issues. However, they face major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to inadequate capacity to meet timely interest and principal payments.

B - Bonds rated "B" have a greater vulnerability to default but currently have the capacity to meet interest payments and principal repayments. Adverse business, financial, or economic conditions will likely impair capacity or willingness to pay interest and repay principal.

CCC - Bonds rated "CCC" have a currently identifiable vulnerability to default and are dependent upon favorable business, financial, and economic conditions to meet timely payment of interest and repayment of principal. In the event of adverse business, financial, or economic conditions, they are not likely to have the capacity to pay interest and repay principal.

Moody's Investors Service, Inc. Corporate Bond Ratings

Aaa - Bonds rated "Aaa" are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to a "gilt-edged." Interest payments are protected by a large or by an exceptionally stable margin, and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa - Bonds rated "Aa" are judged to be of high quality by all standards. Together with the Aaa group, they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protections may not be as large as in "Aaa" securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long term risk appear somewhat larger than in "Aaa" securities.

A - Bonds rated "A" possess many favorable investment attributes, and are to be considered as upper medium grade obligations. Factors giving security principal and interest are considered adequate but elements may be present which suggest a susceptibility to impairment sometime in the future.

Baa - Bonds rated "Baa" are considered as medium grade obligations (*i.e.*, they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Ba - Bonds rated "Ba" are judged to have speculative elements. Their future cannot be considered as well assured. Often the protection of interest and principal payments may be very moderate and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.

APPENDIX B

Treesdale Partners, LLC

PROXY VOTING POLICIES AND PROCEDURES

The Securities and Exchange Commission has adopted Rule 206(4)-6 under the Investment Advisers Act. Under this rule, registered investment advisers that exercise voting authority over securities held in client portfolios are required to implement proxy voting policies and describe those policies to their clients.

The portfolio managers are responsible for making all proxy voting decisions in accordance with these proxy voting policy and procedures (the “*Policies*”). The portfolio manager is responsible for the actual voting of all proxies in a timely manner, while the Compliance Officer is responsible for monitoring the effectiveness of the Policies. (See Section IV, “Procedures for Proxies.”)

The Firm may, from time to time, determine that it is in the best interests of its clients to depart from specific policies described herein. The rationale for any such departure will be memorialized in writing by the Compliance Officer or another appropriate employee of the Firm.

I. General Policy

The general policy is to vote proxy proposals, amendments, consents or resolutions relating to client securities, including interests in private investment funds, if any (collectively, “*proxies*”), in a manner that serves the best interests of the Funds managed by the Firm, as determined by the Firm in its discretion, and taking into account relevant factors, including, but not limited to:

- the impact on the value of the securities;
- the anticipated costs and benefits associated with the proposal;
- the effect on liquidity; and
- customary industry and business practices.

The Firm believes that voting proxies in accordance with the following guidelines is generally in the best interests of its clients.

- Generally, the Firm will vote in favor of routine corporate housekeeping proposals, including election of directors (where no corporate governance issues are implicated and selection of auditors).
- Generally, the Firm will vote against proposals that make it more difficult to replace members of the issuer’s board of directors, including proposals to stagger the board, cause management to be overrepresented on the board, introduce cumulative voting, introduce unequal voting rights, and create supermajority voting.

All other decisions regarding proxies will be determined on a case-by-case basis taking into account the general policy, as set forth above.

All proxies received by the Firm will be sent to the Compliance Officer. The

Compliance Officer will:

- Keep a record of each proxy received;
- Forward the proxy to the appropriate portfolio manager who makes the voting decision in the Firm;
- Determine which accounts managed by the Firm hold the security to which the proxy relates;
- Provide the portfolio manager with a list of accounts that hold the security, together with the number of votes each account controls (reconciling any duplications), and the date by which the Firm must vote the proxy in order to allow enough time for the completed proxy to be returned to the issuer prior to the vote taking place.
- Absent material conflicts, the portfolio manager will determine how the Firm should vote the proxy. The portfolio manager will send its decision on how the Firm will vote a proxy to the Compliance Officer, who will be responsible for completing the proxy and mailing it in a timely and appropriate manner.
- The Adviser may retain a third party to assist it in coordinating and voting proxies with respect to client securities. If so, the Compliance Officer will monitor the third party to assure that all proxies are being properly voted and appropriate records are being retained.

II. Abstaining from Voting or Affirmatively Not Voting

The Firm will abstain from voting (which generally requires submission of a proxy voting card) or affirmatively decide not to vote if the Firm determines that abstaining or not voting is in the best interests of the Fund or account. In making such a determination, the Firm will consider various factors, including, but not limited to: (i) the costs associated with exercising the proxy (*e.g.*, translation or travel costs); (ii) any legal restrictions on trading resulting from the exercise of a proxy; and (iii) whether the Firm has sold the underlying securities since the record date for the proxy. The Firm will not abstain from voting or affirmatively decide not to vote merely to avoid a conflict of interest.

III. Conflicts of Interest

At times, conflicts may arise between the interests of the investing Funds or accounts, on the one hand, and the interests of the Firm or its affiliates, on the other hand. If the Firm determines that it has, or may be perceived to have, a conflict of interest when voting a proxy, the Firm will address matters involving such conflicts of interest as follows:

A. If a proposal is addressed by any specific policies provided herein, the Firm will vote in accordance with such policies;

B. If the Firm believes it is in the best interest of the investing Funds or accounts to depart from any specific policies provided for herein, the Firm will be subject to the requirements of C or D below, as applicable;

C. If the proxy proposal is (1) not addressed by any specific policies or (2) requires a case-by-case determination by the Firm, the Firm may vote such proxy as it determines to be in the best interest of the investing Funds or accounts, without taking any action described in Part IV.D below, provided that such vote would be against the Firm's own interest in the matter (*i.e.*, against the perceived or actual conflict). The Firm will memorialize the rationale of such vote in writing; and

D. If the proxy proposal is (1) not addressed by any specific policies or (2) requires a case-by-case determination by the Firm, and the Firm believes it should vote in a way that may also benefit, or be perceived to benefit, its own interest, then the Firm must take one of the following actions in voting such proxy: (a) delegate the voting decision for such proxy proposal to an independent third party; (b) delegate the voting decision to an independent committee of members, directors or other representatives of the Funds or accounts, as applicable; (c) inform the investors in the investing Funds or the owners of the investing accounts of the conflict of interest and obtain consent to (majority consent in the case of a Fund) vote the proxy as recommended by the Firm; or (d) obtain approval of the decision from the Firm's Compliance Officer and third party legal advisors.

IV. Disclosure

The Firm will disclose in its Form ADV Part II that clients may contact the Compliance Officer to obtain information regarding how the Firm voted such client's proxies, and to request a copy of these policies and procedures. If a client requests this information, the Compliance Officer will prepare a written response to the client that lists, with respect to each voted proxy about which the client has inquired, (a) the name of the issuer; (b) the proposal voted upon, and (c) how the Firm voted the client's proxy.

V. Record of Proxy Voting

The Compliance Officer will maintain, or have available, written or electronic copies of each proxy statement received and of each executed proxy.

The Compliance Officer will also maintain records relating to each proxy, including (i) the voting decision with regard to each proxy; and (ii) any documents created by the portfolio manager, or others, that were material to making the voting decision.

The Firm will maintain a record of each written request from an investor in a Fund for proxy voting information and the Firm's written response to any such request (oral or written) for proxy voting information.

The Compliance Officer will maintain such records in its offices for two years from the end of the fiscal year during which the record was created, and for an additional three years in an easily accessible place.
