How did the Fund perform last year?

The AdvisorShares MSOS 2X Daily ETF (ticker: MSOX) aims to offer daily leveraged exposure to the AdvisorShares Pure US Cannabis ETF (MSOS) in a single trade, catering to sophisticated investors seeking amplified exposure to the U.S. cannabis sector. Over the 12 months ended June 30, 2024, MSOX experienced increasingly negative returns.

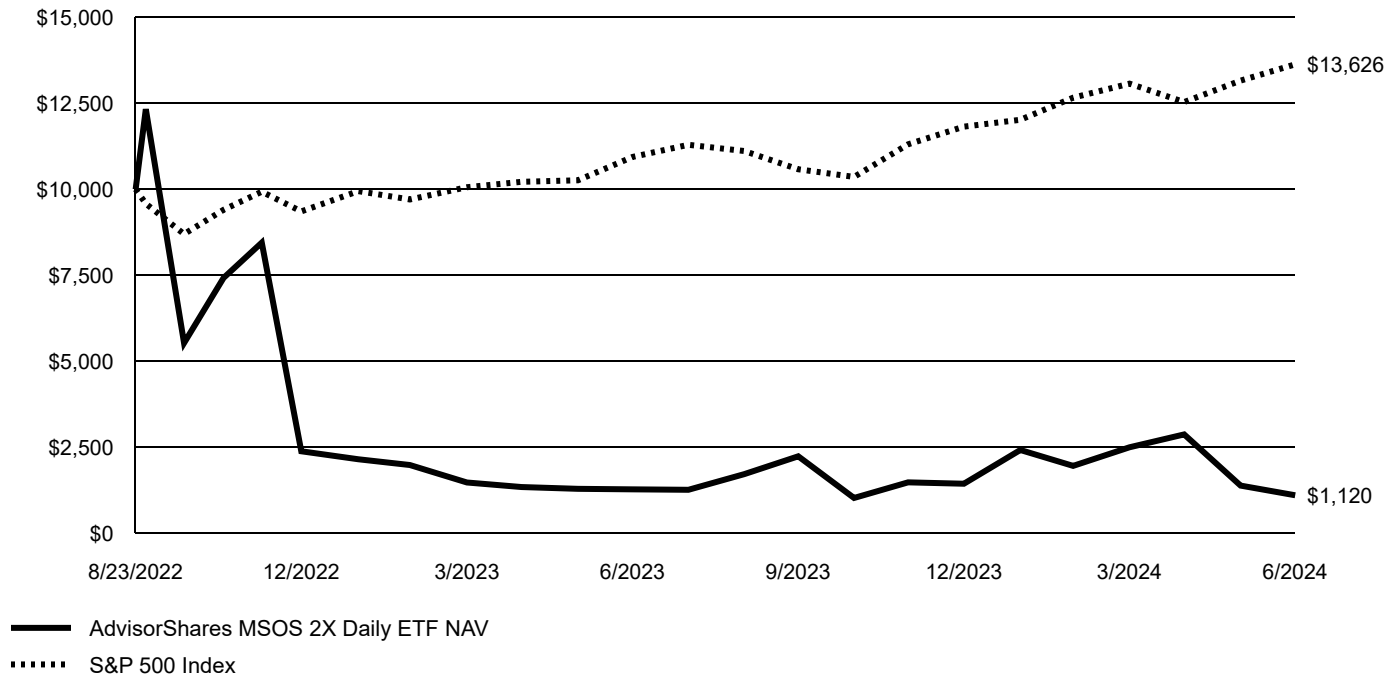

Due to its leveraged strategy and exclusive focus on the U.S. cannabis industry, MSOX is particularly sensitive to volatility from changes in U.S. cannabis legislation. The Fund's future performance is expected to be influenced by the evolving regulatory environment, including the expansion of state-by-state cannabis sales and potential Federal reforms.

Despite current price levels, we maintain a strong optimistic outlook on the U.S. cannabis market and anticipate favorable changes in U.S. cannabis regulations.

The Fund's past performance is not a good predictor of how the Fund will perform in the future. The graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or redemption of Fund shares.

Performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. Fund NAV returns are calculated using the Fund's daily 4:00 p.m. NAV. Returns shown include the reinvestment of all dividends and other distributions. Index returns do not include expenses. Returns less than one year are not annualized. The performance table and graph do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. For the Fund's most recent month end performance, please call 1-877-843-3831.

* The price used to calculate market return ("Market Price") is determined by using the closing price listed on the exchange included at the beginning of this shareholder report and does not represent returns an investor would receive if shares were traded at other times. Total returns are calculated using the daily 4:00pm midpoint between the bid and offer. Shares are bought and sold at market price, not NAV, and are not individually redeemed from the Fund.

The S&P 500 Index is a broad-based, unmanaged measurement of changes in stock market conditions based on the average of 500 widely held common stocks.

Investments involve risk. Principal loss is possible. Redemptions are limited and often commissions are charged on each trade. The Fund may be non-diversified and may be more sensitive to economic, business, political or other changes affecting individual issuers or investments than a diversified fund, which may result in greater fluctuation in the value of the Fund's shares and greater risk of loss. Unlike mutual funds, ETFs may trade at a premium or discount to their net asset value.
