**ADVISORSHARES NORTH SQUARE MCKEE CORE RESERVES ETF**  
NYSE Arca Ticker: HOLD

**FUND SUMMARY**

**INVESTMENT OBJECTIVE**

The AdvisorShares North Square McKee Core Reserves ETF (the “Fund”) seeks to preserve capital while maximizing income.

**FUND FEES AND EXPENSES**

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table below.**

<b>SHAREHOLDER FEES</b> <i>(fees paid directly from your investment)</i>	None
<b>ANNUAL FUND OPERATING EXPENSES</b> <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	
MANAGEMENT FEES	0.30%
DISTRIBUTION (12b-1) FEES	0.00%
OTHER EXPENSES	0.35%
<b>TOTAL ANNUAL OPERATING EXPENSES</b>	0.65%
FEE WAIVER/EXPENSE REIMBURSEMENT*	-0.30%
<b>TOTAL ANNUAL OPERATING EXPENSES AFTER WAIVER/REIMBURSEMENT</b>	0.35%

\* *AdvisorShares Investments, LLC (the “Advisor”) has contractually agreed to waive its fees and/or reimburse expenses to keep net expenses (excluding amounts payable pursuant to any plan adopted in accordance with Rule 12b-1, interest expense, taxes, brokerage commissions, acquired fund fees and expenses, other expenditures which are capitalized in accordance with generally accepted accounting principles, and extraordinary expenses) from exceeding 0.35% of the Fund’s average daily net assets for at least one year from the date of this Prospectus. The expense limitation agreement may be terminated without payment of any penalty (i) by the Trust for any reason and at any time and (ii) by the Advisor, for any reason, upon ninety (90) days’ prior written notice to the Trust, such termination to be effective as of the close of business on the last day of the then-current one-year period. If it becomes unnecessary for the Advisor to waive fees or reimburse expenses, the Trust’s Board of Trustees (the “Board”) may permit the Advisor to retain the difference between the Fund’s total annual operating expenses and the expense limitation currently in effect, or, if lower, the expense limitation that was in effect at the time of the waiver and/or reimbursement, to recapture all or a portion of its prior fee waivers or expense reimbursements within three years of the date they were waived or reimbursed.*

**EXAMPLE**

This Example is intended to help you compare the cost of investing in the shares of the Fund with the cost of investing in other funds. This Example does not take into account brokerage commissions and other fees to financial intermediaries that you may pay when purchasing or selling shares of the Fund. If these fees were included, your costs would be higher.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 YEAR	3 YEARS	5 YEARS	10 YEARS
<b>AdvisorShares North Square McKee Core Reserves ETF</b>	\$36	\$178	\$332	\$782

## **PORTFOLIO TURNOVER**

---

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Total Annual Operating Expenses or in the Example, affect the Fund’s performance. This rate excludes the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s shares. During the most recent fiscal year, the Fund’s portfolio turnover rate was 99% of the average value of its portfolio.

## **PRINCIPAL INVESTMENT STRATEGIES**

---

The Fund is an actively managed exchange-traded fund (“ETF”). CSM Advisors, LLC (the “Sub-Advisor”) seeks to achieve the Fund’s investment objective by investing in a variety of fixed income securities, including bonds and mortgage-backed and asset-backed securities, issued by U.S. and, to a lesser extent, foreign issuers. The securities primarily will be U.S. dollar-denominated. The Fund will primarily invest in investment grade debt securities rated Baa- or higher by Moody’s Investors Service, Inc., or equivalently rated by Standard & Poor’s Ratings Services or Fitch, Inc., or, if unrated, determined by the Sub-Advisor to be of comparable quality using certain metrics as measures of comparison.

Mortgage-backed securities represent interests in pools of residential mortgage loans purchased from individual lenders by a federal agency or originated and issued by private lenders. Asset-backed securities represent interests in pools of underlying assets such as motor vehicle installment sales or installment loan contracts, leases of various types of real and personal property, and receivables from credit card agreements.

The average duration of the Fund will vary based on the Sub-Advisor’s forecast for interest rates and will generally not exceed one year. Duration is a measure used to determine the sensitivity of a security’s price to changes in interest rates. The longer a security’s duration, the more sensitive it will be to changes in interest rates. The dollar-weighted average portfolio maturity of the Fund is generally not expected to exceed three years.

In seeking to achieve its investment objective, the Fund also may invest in futures, swaps and forwards. On a day-to-day basis, the Fund may hold money market instruments, cash, other cash equivalents, and exchange traded products (“ETPs”) that invest in these and other highly liquid instruments to collateralize its derivative positions.

While investing in a particular market sector is not a strategy of the Fund, its portfolio may be significantly invested in one or more sectors as a result of the security selection decisions made pursuant to its strategy. As of June 30, 2022, a significant portion of the Fund’s portfolio was comprised of companies in the Financials Sector, although this may change from time to time.

## **PRINCIPAL RISKS OF INVESTING IN THE FUND**

---

The Fund is subject to a number of risks, described below, that may affect the value of its shares, including the possible loss of money. As with any fund, there is no guarantee that the Fund will achieve its investment objective.

**Counterparty Risk.** The Fund may invest in financial instruments involving counterparties that attempt to gain exposure to a particular group of securities, index or asset class without actually purchasing those securities or investments, or to hedge a position. The Fund’s use of such financial instruments, including swap agreements, exposes the Fund to risks that are different than those associated with direct investments in portfolio securities. For example, if a swap agreement counterparty defaults on its payment obligations to the Fund, this default will cause the value of your investment in the Fund to decrease.

**Credit Risk.** The Fund could lose money if the issuer or guarantor of a debt instrument in which the Fund invests becomes unwilling or unable to make timely principal and/or interest payments, or to otherwise meet its obligations.

**Derivatives Risk.** Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic or market conditions than other types of investments and could result in losses that significantly exceed the Fund's original investment. A derivative is a financial contract the value of which depends on, or is derived from, the value of a financial asset (such as stock, bond or currency), a physical asset (such as gold) or a market index (such as the S&P 500 Index). Many derivatives create leverage thereby causing the Fund to be more volatile than it would be if it had not invested in derivatives. Derivatives also expose the Fund to counterparty risk (the risk that the derivative counterparty will not fulfill its contractual obligations) and to credit risk (the risk that a counterparty is or is perceived to be unwilling or unable to make timely payments or otherwise meet its contractual obligations).

**Forward Contracts Risk.** The Fund may purchase a forward contract, or a "forward," which involves a negotiated obligation to purchase or sell a specific security or currency at a future date (with or without delivery required), which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. Forward contracts are not traded on exchanges; rather, a bank or dealer will act as agent or as principal in order to make or take future delivery of a specified lot of a particular security or currency for the Fund's account. Risks associated with forwards may include: (i) an imperfect correlation between the movement in prices of forward contracts and the securities or currencies underlying them; (ii) an illiquid market for forwards; (iii) difficulty in obtaining an accurate value for the forwards; and (iv) the risk that the counterparty to the forward contract will default or otherwise fail to honor its obligation. Because forwards require only a small initial investment in the form of a deposit or margin, they involve a high degree of leverage. Forwards are also subject to credit risk, liquidity risk and leverage risk.

**Futures Contracts Risk.** Futures contracts may experience dramatic price changes (losses) and imperfect correlations between the price of the contract and the foreign currency, which will increase the volatility of the Fund and may involve a small investment of cash (the amount of initial and variation margin) relative to the magnitude of the risk assumed (the potential increase or decrease in the price of the futures contract). There may not be a liquid secondary market for a futures contract. When the Fund purchases or sells a futures contract, it is subject to daily variation margin calls that could be substantial. If the Fund has insufficient cash to meet daily variation margin requirements, it might need to sell securities at a time when such sales are disadvantageous.

**Swap Agreements Risk.** Swap agreements are contracts among the Fund and a counterparty to exchange the return of the pre-determined underlying investment (such as the rate of return of the underlying index). Swap agreements may be negotiated bilaterally and traded OTC between two parties or, for certain standardized swaps, must be exchange-traded through a futures commission merchant and/or cleared through a clearinghouse that serves as a central counterparty. Risks associated with the use of swap agreements are different from those associated with ordinary portfolio securities transactions, due in part to the fact they could be considered illiquid and many swaps trade on the OTC market. Swaps are particularly subject to counterparty credit, correlation, valuation, liquidity and leveraging risks. While exchange trading and central clearing are intended to reduce counterparty credit risk and increase liquidity, they do not make swap transactions risk-free. Additionally, applicable regulators have adopted rules imposing certain margin requirements, including minimums, on OTC swaps, which may result in the Fund and its counterparties posting higher margin amounts for OTC swaps, which could increase the cost of swap transactions to the Fund and impose added operational complexity.

**ETF Market Risk.** In stressed market conditions, the market for certain ETF shares may become less liquid in response to deteriorating liquidity in the markets for the ETF's underlying portfolio holdings. This adverse effect on liquidity for the ETF's shares in turn can lead to differences between the market price of the ETF's shares and the underlying value of those shares. In addition, there are a limited number of institutions that act as authorized participants. If these institutions exit the business or are, for any reason, unable to process creation and/or redemption orders with respect to the Fund, or purchase and sell securities in connection with creation and/or redemption orders, as applicable, and no other authorized participant steps forward to create or redeem, or purchase or sell securities, as applicable, Fund shares may trade at a premium or discount to their net asset value ("NAV") and possibly face operational issues such as trading halts and/or delisting. The absence of an active market in the Fund's shares could lead to a heightened risk of differences between the market price of the Fund's shares and the underlying value of those shares.

**Financials Sector Risk.** Financial services companies are subject to extensive governmental regulation which may limit both the amounts and types of loans and other financial commitments they can make, the interest rates and fees they can charge, the scope of their activities, the prices they can charge and the amount of capital they must maintain. Profitability is largely dependent on the availability and cost of capital funds and can fluctuate significantly when interest rates change or due to increased competition. In addition, deterioration of the credit markets generally may cause an adverse impact in a broad range of markets, including U.S. and international credit and interbank money markets generally, thereby affecting a wide range of financial institutions and markets. Certain events in the Financials Sector may cause an unusually high degree of volatility in the financial markets, both domestic and foreign, and cause certain financial services companies to incur large losses.

**Fixed Income Securities Risk.** The market value of fixed income investments in which the Fund may invest may change in response to interest rate changes and other factors. During periods of falling interest rates, the value of outstanding fixed income securities generally rise. Conversely, during periods of rising interest rates, the value of fixed income securities generally decline.

**Foreign Currency Risk.** The Fund's exposure to foreign currencies subjects the Fund to the risk that those currencies will decline in value relative to the U.S. dollar.

**Foreign Investment Risk.** The Fund's investments in securities of non-U.S. issuers may involve certain risks that are greater than those associated with investments in securities of U.S. issuers. These include risks of adverse changes in foreign economic, political, regulatory and other conditions; changes in currency exchange rates or exchange control regulations (including limitations on currency movements and exchanges); differing accounting, auditing, financial reporting, investor protection, and legal standards and practices; differing securities market structures; and higher transaction costs. In addition, the securities of some foreign companies may be less liquid and, at times, more volatile than securities of comparable U.S. companies.

**Illiquid Investments Risk.** This risk exists when particular Fund investments are difficult to purchase or sell, which can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.

**Issuer Risk.** The value of a debt security may decline for a number of reasons directly related to the issuer of such security, such as management performance, financial leverage and reduced demand for the issuer's goods or services.

**Management Risk.** The Sub-Advisor continuously evaluates the Fund's holdings, purchases and sales with a view to achieving the Fund's investment objective. However, achievement of the stated investment objective cannot be guaranteed. The Sub-Advisor's judgment about the markets, the economy, or companies may not anticipate actual market movements, economic conditions or company performance, and these factors may affect the return on your investment.

**Market Risk.** Due to market conditions, the value of the Fund's investments may fluctuate significantly from day to day. Price fluctuations may be temporary or may last for extended periods. This volatility may cause the value of your investment in the Fund to decrease. Local, regional, or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, recessions, uncertainties regarding interest rates, rising inflation, or other events could have a significant impact on the market generally and on specific securities. The market value of a security may also decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. Because of its link to the markets, an investment in the Fund may be more suitable for long-term investors who can bear the risk of short-term principal fluctuations, which at times may be significant.

**Mortgage-Backed and Asset-Backed Securities Risk.** The impairment of the value of collateral underlying a mortgage-backed or asset-backed security (for example, due to non-payment of loans) may result in a reduction in the value of such security. In addition, early payoffs in the loans may result in the Fund receiving less income than originally anticipated.

**Portfolio Turnover Risk.** The Fund may experience relatively high portfolio turnover, which may result in increased transaction costs and Fund performance that is lower than expected.

**Trading Risk.** Shares of the Fund may trade above or below their NAV. The trading price of the Fund’s shares may deviate significantly from their NAV during periods of market volatility and, in such instances, you may pay significantly more or receive significantly less than the underlying value of the Fund’s shares. There can be no assurance that an active trading market for the Fund’s shares will develop or be maintained. In addition, trading in shares of the Fund may be halted because of market conditions or for reasons that, in the view of the NYSE Arca, Inc. (the “Exchange”), make trading in shares inadvisable.

**FUND PERFORMANCE**

The bar chart and table that follow show how the Fund has performed on a calendar year basis and provide an indication of the risks of investing in the Fund. The table also shows how the Fund’s performance compares to the Bloomberg 1–3 Month U.S. Treasury Bill Index, which is an unmanaged index considered representative of the performance of the U.S. Treasury Bill issued by the U.S. Government. Both the bar chart and the table assume the reinvestment of all dividends and distributions. Past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future.

Updated performance information is available on the Fund’s website at [www.advisorshares.com](http://www.advisorshares.com).

**Calendar Year Total Returns**

The Fund’s year-to-date total return as of September 30, 2022 was -0.48%.

**Best and Worst Quarter Returns (for the period reflected in the bar chart above)**

	Return	Quarter/Year
Highest Return	2.76%	2Q/2020
Lowest Return	-3.15%	1Q/2020

**AVERAGE ANNUAL TOTAL RETURNS FOR THE PERIODS ENDED DECEMBER 31, 2021**

<b>AdvisorShares North Square McKee Core Reserves ETF</b>	<b>1 Year</b>	<b>5 Years</b>	<b>Since Inception (1/14/2014)</b>
Return Before Taxes Based on NAV	0.16%	1.33%	1.01%
Return After Taxes on Distributions	-0.10%	0.71%	0.50%
Return After Taxes on Distributions and Sale of Fund Shares	0.08%	0.75%	0.55%
Bloomberg 1–3 Month U.S. Treasury Bill Index (reflects no deduction for fees, expenses, or taxes)	0.04%	1.08%	0.72%

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts. In some cases, the return after taxes on distributions and sale of fund shares may exceed other average annual total returns due to an assumed tax benefit from any losses on a sale of shares at the end of the measurement period.

**MANAGEMENT**

<b>Name</b>	<b>Title</b>
AdvisorShares Investments, LLC	Advisor
CSM Advisors, LLC	Sub-Advisor

**PORTFOLIO MANAGERS**

<b>Name and Title</b>	<b>Length of Service with Sub-Advisor</b>
<b>Brian Allen</b> , <i>Senior Vice President</i>	since March 2020
<b>Bryan Johanson</b> , <i>Senior Vice President</i>	since March 2020
<b>Jack White</b> , <i>Senior Vice President</i>	since March 2020
<b>Andrew Faderewski</b> , <i>Vice President</i>	since March 2020

**PURCHASE AND SALE OF FUND SHARES**

The Fund issues and redeems shares on a continuous basis at NAV only in a large specified number of shares called a “Creation Unit.” Only institutional investors that are acting as the Fund’s authorized participants (typically broker-dealers) may purchase or redeem Creation Units. A Creation Unit transaction generally is conducted in exchange for a deposit of cash totaling the NAV of the Creation Units.

Individual Fund shares may only be purchased and sold in secondary market transactions through brokers. The shares of the Fund are listed on the Exchange and, because shares trade at market price rather than at NAV, shares may trade at a value greater than (premium) or less than (discount) NAV. When buying or selling shares in the secondary market, you may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask) (the “bid-ask spread”). Recent information regarding the Fund’s NAV, market price, premiums and discounts, and bid-ask spreads will be available on the Fund’s website at [www.advisorshares.com](http://www.advisorshares.com).

**TAX INFORMATION**

---

The Fund intends to make distributions that may be taxed as ordinary income or capital gains (or a combination thereof), unless you are investing through a tax-advantaged arrangement such as a 401(k) plan or an individual retirement account (“IRA”), which may be taxed upon withdrawal.

**PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES**

---

Investors purchasing shares in the secondary market through a brokerage account or with the assistance of a broker may be subject to brokerage commissions and charges. If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Advisor or Sub-Advisor may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing broker-dealers or other intermediaries and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

## **MORE INFORMATION ABOUT THE TRUST AND THE FUND**

---

AdvisorShares Trust (the “Trust”) is a Delaware statutory trust offering a number of professionally managed investment portfolios or funds.

Section 12(d)(1) of the Investment Company Act of 1940 (the “1940 Act”) restricts investments by investment companies in the securities of other investment companies, including shares of the Fund or another ETF. However, under certain circumstances and subject to certain terms and conditions, a registered investment company may invest in other investment companies (“underlying investment companies”) beyond the limits set forth in Section 12(d)(1). In particular, if an underlying investment company is relying on Rule 12d1-4, the Fund may enter into an agreement with the underlying investment company pursuant to which the Fund may invest in the underlying investment company beyond the Section 12(d)(1) limits subject to the terms and conditions of Rule 12d1-4. The Fund also may enter into such agreements with certain other ETFs to permit the Fund to invest in the ETFs to an unlimited extent.

Creation Units of the Fund are issued and redeemed principally in exchange for a deposit of cash totaling the NAV of the Creation Units.

**EXCEPT WHEN AGGREGATED IN CREATION UNITS, SHARES OF THE FUND ARE NOT REDEEMABLE SECURITIES.**

## **MORE INFORMATION ABOUT THE FUND’S INVESTMENT OBJECTIVE**

---

The Fund seeks to preserve capital while maximizing income. The Fund’s investment objective is non-fundamental and may be changed by the Board without a shareholder vote.

## **MORE INFORMATION ABOUT THE FUND’S PRINCIPAL INVESTMENT STRATEGIES**

---

The Fund is an actively managed ETF and, thus, does not seek to replicate the performance of a specified passive index of securities. Instead, it uses an active investment strategy in seeking to meet its investment objective. The Sub-Advisor, subject to the oversight of the Advisor and the Board, has discretion on a daily basis to manage the Fund’s portfolio in accordance with the Fund’s investment objective and investment policies.

## **MORE INFORMATION ABOUT THE PRINCIPAL RISKS OF INVESTING IN THE FUND**

---

The Fund is subject to a number of risks that may affect the value of its shares. This section provides additional information about the Fund’s principal risks. The degree to which a risk applies to the Fund varies according to its investment allocation. Each investor should review the complete description of the principal risks before investing in the Fund. An investment in the Fund may not be appropriate for certain investors. As with investing in other securities whose prices increase and decrease in market value, you may lose money by investing in the Fund.

**Counterparty Risk.** The Fund may invest in financial instruments involving counterparties for the purpose of attempting to gain exposure to a particular group of securities, index or asset class without actually purchasing those securities or investments, or to hedge a position. Such financial instruments may include, among others, total return, index, interest rate, and credit default swap agreements. The use of swap agreements and similar instruments exposes the Fund to risks that are different than those associated with ordinary portfolio securities transactions. For example, the Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. If a counterparty defaults on its payment obligations to the Fund, this default will cause the value of your investment in the Fund to decrease. In addition, the Fund may enter into swap agreements with a limited number of counterparties, which may increase the Fund’s exposure to counterparty credit risk. Similarly, if the credit quality of an issuer or guarantor of a debt instrument improves, this change may adversely affect the value of the Fund’s investment.

**Credit Risk.** Credit risk is the risk that the Fund could lose money if an issuer or guarantor of a debt instrument becomes unwilling or unable to make timely principal and/or interest payments, or to otherwise meet its obligations. The Fund is also subject to the risk that its investment in a debt instrument could decline because of concerns about the issuer's credit quality or perceived financial condition. Fixed income securities are subject to varying degrees of credit risk, which are sometimes reflected in credit ratings.

**Derivatives Risk.** The Fund may invest in derivatives to gain market exposure, enhance returns or hedge against market declines. Examples of derivatives are options, futures, options on futures and swaps. The Fund's use of derivative instruments involves risks different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) the risk that the counterparty to a derivative transaction may not fulfill its contractual obligations; (ii) the risk of mispricing or improper valuation; (iii) the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index; and (iv) the credit risk of the underlying asset, rate or index. These risks could cause the Fund to lose more than the principal amount invested. In addition, investments in derivatives may involve leverage, which means a small percentage of assets invested in derivatives can have a disproportionately larger impact on the Fund.

**Forward Contracts Risk.** The Fund may purchase a forward contract, or a "forward," which involves a negotiated obligation to purchase or sell a specific security or currency at a future date (with or without delivery required), which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. Forward contracts are not traded on exchanges; rather, a bank or dealer will act as agent or as principal in order to make or take future delivery of a specified lot of a particular security or currency for the Fund's account. Risks associated with forwards may include: (i) an imperfect correlation between the movement in prices of forward contracts and the securities or currencies underlying them; (ii) an illiquid market for forwards; (iii) difficulty in obtaining an accurate value for the forwards; and (iv) the risk that the counterparty to the forward contract will default or otherwise fail to honor its obligation. Because forwards require only a small initial investment in the form of a deposit or margin, they involve a high degree of leverage.

Forwards are also subject to credit risk, liquidity risk and leverage risk. Credit risk is the risk that the Fund could lose money if a counterparty to a derivative contract fails to make timely payment or otherwise honor its obligations. Liquidity risk exists when particular investments are difficult to purchase or sell. The market for certain investments may become illiquid due to specific adverse changes in the conditions of a particular issuer or under adverse market or economic conditions independent of the issuer. The Fund's investments in illiquid securities may reduce the returns of the Fund because it may be unable to sell the illiquid securities at an advantageous time or price. Further, transactions in illiquid securities may entail transaction costs that are higher than those for transactions in liquid securities. The use of leverage can amplify the effects of market volatility on the Fund's share prices and make the Fund's returns more volatile. This is because leverage tends to exaggerate the effect of any increase or decrease in the value of the Fund's portfolio securities. The use of leverage may also cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy their obligations.

**Futures Contracts Risk.** Futures contracts are a type of derivative investment. Futures contracts may experience dramatic price changes (losses) and imperfect correlations between the price of the contract and the foreign currency, which will increase the volatility of the Fund and may involve a small investment of cash (the amount of initial and variation margin) relative to the magnitude of the risk assumed (the potential increase or decrease in the price of the futures contract). There may not be a liquid secondary market for a futures contract. When the Fund purchases or sells a futures contract, it is subject to daily variation margin calls that could be substantial. If the Fund has insufficient cash to meet daily variation margin requirements, it might need to sell securities at a time when such sales are disadvantageous.

**Swap Agreements Risk.** Swap agreements are contracts among the Fund and a counterparty to exchange the return of the pre-determined underlying investment (such as the rate of return of the underlying index). Swap agreements may be negotiated bilaterally and traded OTC between two parties or, for certain standardized swaps, must be exchange-traded through a futures commission merchant and/or cleared through a clearinghouse that serves as a central counterparty. Risks associated with the use of swap agreements are different from those associated with ordinary portfolio securities transactions, due in part to the fact they could be considered illiquid and many swaps trade on the OTC market. Swaps are particularly subject to counterparty credit, correlation, valuation, liquidity and leveraging risks. While exchange trading and central clearing are intended to reduce counterparty credit risk and increase liquidity, they do not make swap transactions risk-free. Additionally, applicable regulators have adopted rules imposing certain margin requirements, including minimums, on OTC swaps, which may result in the Fund and its counterparties posting higher margin amounts for OTC swaps, which could increase the cost of swap transactions to the Fund and impose added operational complexity.

**ETF Market Risk.** In stressed market conditions, the market for certain ETF shares may become less liquid in response to deteriorating liquidity in the markets for the ETF's underlying portfolio holdings. This adverse effect on liquidity for the ETF's shares in turn can lead to a difference between the market price of the ETF's shares and the underlying value of those shares. This difference can be reflected as a spread between the bid and ask prices quoted during the day or a premium or discount in the closing price from the Fund's NAV.

Because the Fund's shares trade in the secondary market, a broker may charge a commission to execute a transaction in shares and an investor may incur the cost of the spread between the price at which a dealer will buy shares (bid) and the somewhat higher price at which a dealer will sell shares (ask). In addition, not only are there a limited number of institutions that act as authorized participants, direct trading by authorized participants is critical to ensuring that the Fund's shares trade at or close to NAV. However, market makers are not obligated to make a market in the Fund's shares nor are authorized participants obligated to execute purchase or redemption orders for Creation Units and, in times of market stress, circumstances could develop that could cause them to refrain from these activities or reduce their role. The absence of an active market could lead to a heightened risk of differences between the market price of the Fund's shares and the underlying value of those shares.

**Financials Sector Risk.** Financial services companies are subject to extensive governmental regulation which may limit both the amounts and types of loans and other financial commitments they can make, the interest rates and fees they can charge, the scope of their activities, the prices they can charge and the amount of capital they must maintain. Profitability is largely dependent on the availability and cost of capital funds and can fluctuate significantly when interest rates change or due to increased competition. In addition, deterioration of the credit markets generally may cause an adverse impact in a broad range of markets, including U.S. and international credit and interbank money markets generally, thereby affecting a wide range of financial institutions and markets. Certain events in the Financials Sector may cause an unusually high degree of volatility in the financial markets, both domestic and foreign, and cause certain financial services companies to incur large losses. Securities of financial services companies may experience a dramatic decline in value when such companies experience substantial declines in the valuations of their assets, take action to raise capital (such as the issuance of debt or equity securities), or cease operations. Credit losses resulting from financial difficulties of borrowers and financial losses associated with investment activities can negatively impact the sector. Insurance companies may be subject to severe price competition. Adverse economic, business or political developments could adversely affect financial institutions engaged in mortgage finance or other lending or investing activities directly or indirectly connected to the value of real estate.

**Fixed Income Securities Risk.** Fixed income securities are debt obligations issued by corporations, municipalities and other borrowers. Coupons may be fixed or adjustable, based on a pre-set formula. The market value of fixed income investments may change in response to interest rate changes and other factors. During periods of falling interest rates, the value of outstanding fixed income securities generally rise. Conversely, during periods of rising interest rates, the value of such securities generally decline. The prices of high-yield bonds, unlike those of investment grade bonds, may fluctuate unpredictably and not necessarily inversely with changes in interest rates. Moreover, while securities with longer maturities tend to produce higher yields, the prices of longer maturity securities are also subject to greater market fluctuations as a result of changes in interest rates. Changes by recognized agencies in the rating of any fixed income security and in the ability of an issuer to make payments of interest and principal will also affect the value of these investments. Changes in the value of portfolio securities will not affect cash income derived from these securities but will affect a fund's net asset value.

**Foreign Currency Risk.** The Fund may invest in foreign currencies or securities denominated in a foreign currency. The value of such currencies or securities denominated such currencies can change when foreign currencies strengthen or weaken relative to the U.S. dollar. These currency movements may negatively affect the value of the Fund's investment in a foreign currency even when there is no change in the value of the security in the issuer's home country. Under normal circumstances, the Fund does not intend to hedge against the risk of currency exchange rate fluctuations, but reserves the right to do so if there is extreme volatility in currency exchange rates.

**Foreign Investment Risk.** The Fund may have significant exposure to securities or obligations of foreign companies through its investments in financial instruments, which are indirectly linked to the performance of foreign issuers. Investing in financial instruments that are indirectly linked to the performance of non-U.S. issuers may involve risks not typically associated with investing in U.S. issuers. Foreign markets can be more volatile than the U.S. market due to increased risks of adverse issuer, political, regulatory, market, or economic developments and can perform differently from the U.S. market. The value of financial instruments denominated in foreign currencies, and of distributions from such financial instruments, can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar. Foreign markets generally have less trading volume and less liquidity than U.S. markets, and prices in some foreign markets may fluctuate more than those of financial instruments traded on U.S. markets. Non-U.S. issuers may be subject to different accounting, auditing, financial reporting and investor protection standards than U.S. issuers, and it may be more difficult to obtain reliable information regarding a non-U.S. issuer's financial condition and operations. There is the possibility of government intervention and expropriation or nationalization of assets in certain countries. In addition, in certain countries, legal remedies available to investors may be more limited than those available with respect to investments in the United States. Transaction costs and costs associated with custody services are generally higher for foreign securities than they are for U.S. securities. Some foreign governments levy withholding taxes against dividend and interest income. Although in some countries portions of these taxes are recoverable, the non-recovered portion will reduce the income received by the Fund.

**Illiquid Investments Risk.** In certain circumstances, it may be difficult for the Fund to purchase and sell particular portfolio investments due to infrequent trading in such investments. The prices of such securities may experience significant volatility, make it more difficult for the Fund to transact significant amounts of such securities without an unfavorable impact on prevailing market prices, or make it difficult for the Sub-Advisor to dispose of such securities at a fair price at the time the Sub-Advisor believes it is desirable to do so. In addition, the Fund's investments in certain ETPs, if any, may be subject to restrictions on the amount and timing of any redemptions. The Fund's investments in such securities may restrict the Fund's ability to take advantage of other market opportunities and adversely affect the value of the Fund's portfolio holdings. Such investments also may be subject to trading halts caused by extraordinary market volatility pursuant to "circuit breaker" rules.

**Issuer Risk.** Changes in the financial condition of an issuer of or counterparty to a debt security, changes in specific economic or political conditions that affect a particular type of debt security or issuer, and changes in general economic or political conditions can increase the risk of default by an issuer or counterparty, which can affect a security's or instrument's credit quality or value. Entities providing credit support or a maturity-shortening structure also can be affected by these types of changes. If the structure of a security fails to function as intended, the security could decline in value. Lower-quality debt securities (those of less than investment-grade quality) tend to be particularly sensitive to these changes and involve greater risk of default or price changes in the credit quality of the issuer.

**Management Risk.** The Sub-Advisor continuously evaluates the Fund's holdings, purchases and sales with a view to achieving the Fund's investment objective. However, achievement of the stated investment objective cannot be guaranteed. The Sub-Advisor's judgment about the markets, the economy, or companies may not anticipate actual market movements, economic conditions or company performance, and these factors may affect the return on your investment. In fact, no matter how good a job the Sub-Advisor does, you could lose money on your investment in the Fund, just as you could with other investments. If the Sub-Advisor is incorrect in its assessment of the income, growth or price realization potential of the Fund's holdings or incorrect in its assessment of general market or economic conditions, then the value of the Fund's shares may decline.

**Market Risk.** Investments in securities, in general, are subject to market risks that may cause their prices to fluctuate over time. The Fund's investments may decline in value due to factors affecting securities markets generally, such as real or perceived adverse economic conditions or changes in interest or currency rates, or particular countries, segments, economic sectors, industries or companies within those markets. Local, regional, or global events such as war, acts of terrorism, the spread of infectious illness, such as the COVID-19 pandemic, or other public health issues, recessions, uncertainties regarding interest rates, rising inflation, or other events could have a significant impact on the market generally and on specific securities. U.S. and international markets have experienced significant periods of volatility in recent years due to a number of these factors. Changes in market conditions and interest rates generally do not have the same impact on all types of securities and instruments. Fluctuations in the value of securities and financial instruments in which the Fund invests will cause the NAV of the Fund to fluctuate. Historically, the markets have moved in cycles, and the value of the Fund's securities or reference asset may fluctuate drastically from day to day. Because of its link to the markets, an investment in the Fund may be more suitable for long-term investors who can bear the risk of short-term principal fluctuations, which at times may be significant.

Russia's military invasion of Ukraine in February 2022, the resulting responses by the United States and other countries, and the potential for wider conflict could increase volatility and uncertainty in the financial markets and adversely affect regional and global economies. The United States and other countries have imposed broad-ranging economic sanctions on Russia, certain Russian individuals, banking entities and corporations, and Belarus as a response to Russia's invasion of Ukraine, and may impose sanctions on other countries that provide military or economic support to Russia. The extent and duration of Russia's military actions and the repercussions of such actions (including any retaliatory actions or countermeasures that may be taken by those subject to sanctions, including cyber attacks) are impossible to predict, but could result in significant market disruptions, including in certain industries or sectors, such as the oil and natural gas markets, and may negatively affect global supply chains, inflation and global growth. These and any related events could significantly impact the Fund's performance and the value of an investment in the Fund, even if the Fund does not have direct exposure to Russian issuers or issuers in other countries affected by the invasion.

**Mortgage-Backed and Asset-Backed Securities Risk.** The impairment of the value of collateral underlying a mortgage-backed or asset-backed security (for example, due to non-payment of loans) may result in a reduction in the value of such security. Early payoffs in the loans underlying such securities may result in the Fund receiving less income than originally anticipated. The variability in prepayments will tend to limit price gains when interest rates drop and exaggerate price declines when interest rates rise. In the event of high prepayments, the Fund may be required to invest proceeds at lower interest rates, causing the Fund to earn less than if the prepayments had not occurred. Conversely, rising interest rates may cause prepayments to occur at a slower than expected rate, which may effectively change a security that was considered short- or intermediate-term into a long-term security. Long-term securities tend to fluctuate in value more widely in response to changes in interest rates than shorter-term securities.

**Portfolio Turnover Risk.** The Fund's strategy may frequently involve buying and selling securities, which may lead to relatively high portfolio turnover. Higher portfolio turnover may result in the Fund paying increased transaction costs and generating greater tax liabilities for shareholders. Portfolio turnover also may cause the Fund's performance to be lower than expected.

**Trading Risk.** Shares of the Fund may trade above or below their NAV. The NAV of shares will fluctuate with changes in the market value of the Fund's holdings. The trading prices of shares will fluctuate in accordance with changes in NAV, as well as market supply and demand. When the market price of the Fund's shares deviates significantly from NAV, you may pay significantly more or receive significantly less than the underlying value of the Fund's shares. However, given that shares can be created and redeemed only in Creation Units at NAV, the Advisor and Sub-Advisor do not believe that large discounts or premiums to NAV will exist for extended periods of time. Although the Fund's shares are currently listed on the Exchange, there can be no assurance that an active trading market for shares will develop or be maintained. In addition, trading in shares of the Fund may be halted because of market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable.

## **OTHER INVESTMENT PRACTICES AND STRATEGIES**

---

**Temporary Defensive Positions.** To respond to adverse market, economic, political or other conditions, the Fund may invest up to 100% of its total assets, without limitation, in high-quality debt securities and money market instruments. The Fund may be invested in this manner for extended periods, depending on the Sub-Advisor's assessment of market conditions. Debt securities and money market instruments include shares of other mutual funds, commercial paper, certificates of deposit, bankers' acceptances, U.S. government securities, repurchase agreements and bonds that are rated BBB or higher. While the Fund is in a defensive position, the Fund may not achieve its investment objective. Furthermore, to the extent that the Fund invests in money market funds, the Fund would bear its pro rata portion of each such money market fund's advisory fees and operational expenses.

**Lending of Portfolio Securities.** The Fund may lend portfolio securities to brokers, dealers and other financial organizations that meet capital and other credit requirements or other criteria established by the Board. These loans, if and when made, may not exceed 33<sup>1</sup>/<sub>3</sub>% of the total asset value of the Fund (including the loan collateral). Such loans may be terminated at any time. Any such loans must be continuously secured by collateral maintained on a current basis in an amount at least equal to the market value of the securities loaned by the Fund. In a loan transaction, as compensation for lending its securities, the Fund will receive a portion of the dividends or interest accrued on the securities held as collateral or, in the case of cash collateral, a portion of the income from the investment of such cash. In addition, the Fund will receive the amount of all dividends, interest and other distributions on the loaned securities. However, the borrower has the right to vote the loaned securities. The Fund will call loans to vote proxies if a material issue affecting the investment is to be voted upon. Loans are made only to borrowers that are deemed by the securities lending agent to be of good financial standing. Should the borrower of the securities fail financially, the Fund may experience delays in recovering the securities or exercising its rights in the collateral. In a loan transaction, the Fund will also bear the risk of any decline in value of securities acquired with cash collateral. The Fund will attempt to minimize this risk by limiting the investment of cash collateral to high quality instruments of short maturity.

Please see the Fund's Statement of Additional Information (the "SAI") for a more complete list of portfolio investment strategies, permitted investments and related risks.

## **PORTFOLIO HOLDINGS**

---

A description of the Fund's policies and procedures with respect to the disclosure of Fund portfolio securities is available (i) in the SAI and (ii) on the Trust's website at [www.advisorshares.com](http://www.advisorshares.com). The Fund's daily portfolio holdings information also is available on the Trust's website.

## **MANAGEMENT OF THE FUND**

---

### **INVESTMENT ADVISOR**

AdvisorShares Investments, LLC, located at 4800 Montgomery Lane, Suite 150, Bethesda, Maryland 20814, serves as investment adviser of the Fund. As of September 30, 2022, the Advisor had approximately \$1.3 billion in assets under management.

The Advisor continuously reviews, supervises, and administers the Fund's investment program. In particular, the Advisor provides investment and operational oversight of the Sub-Advisor. The Board supervises the Advisor and establishes policies that the Advisor must follow in its day-to-day management activities. Pursuant to an investment advisory agreement between the Trust and the Advisor, the Advisor is entitled to receive an annual advisory fee of 0.30% based on the average daily net assets of the Fund. The Advisor pays the Sub-Advisor out of the advisory fee it receives from the Fund. For the most recent fiscal year, the Fund paid the Advisor 0% after waiver/reimbursement based on its average daily net assets.

The Advisor bears all of its own costs associated with providing these advisory services and the expenses of the members of the Board who are affiliated with the Advisor. The Advisor may make payments from its own resources to broker-dealers and other financial institutions in connection with the sale of Fund shares.

The Advisor has contractually agreed to waive its fees and/or reimburse expenses in order to keep net expenses (excluding amounts payable pursuant to any plan adopted in accordance with Rule 12b-1, interest expense, taxes, brokerage commissions, acquired fund fees and expenses, other expenditures which are capitalized in accordance with generally accepted accounting principles, and extraordinary expenses) from exceeding 0.35% of the Fund's average daily net assets for at least one year from the date of this Prospectus. The expense limitation agreement may be terminated without payment of any penalty (i) by the Trust, for any reason and at any time, and (ii) by the Advisor, for any reason, upon ninety (90) days' prior written notice to the Trust, such termination to be effective as of the close of business on the last day of the then-current one-year period. If at any point it becomes unnecessary for the Advisor to waive fees or reimburse expenses, the Board may permit the Advisor to retain the difference between the Fund's total annual operating expenses and the expense limitation currently in effect, or, if lower, the expense limitation that was in effect at the time of the waiver and/or reimbursement, to recapture all or a portion of its prior fee waivers or expense reimbursements within three years of the date they were waived or reimbursed.

Pursuant to an exemptive order from the U.S. Securities and Exchange Commission (the "SEC"), the Advisor, subject to certain conditions, has the right, without shareholder approval, to hire a new unaffiliated sub-advisor or materially amend the terms of a sub-advisory agreement with an unaffiliated sub-advisor when the Board and the Advisor believe that a change would benefit the Fund. The Prospectus will be supplemented when there is a significant change in the Fund's sub-advisory arrangement.

A discussion regarding the basis for the Board's most recent approval of the Fund's investment advisory agreement is available in the Trust's Annual Report to Shareholders dated June 30, 2022.

#### **INVESTMENT SUB-ADVISOR**

CSM Advisors, LLC, located at 420 Fort Duquesne Boulevard, Pittsburgh, Pennsylvania 15222, manages pension funds, profit-sharing plans, reserve funds, endowments and other financial assets for public sector, unions, corporations, foundations, hospitals, schools, religious organizations, and other institutions. The Sub-Advisor was established in 2020 as a result of the acquisition by North Square Investments of substantially all of the assets of C.S. McKee, L.P., which was founded in 1931. The Sub-Advisor does business as C.S. McKee. As of September 30, 2022, the Sub-Advisor had approximately \$7.6 billion in assets under management.

The Sub-Advisor is responsible for selecting the Fund's investments in accordance with the Fund's investment objective, policies and restrictions.

A discussion regarding the basis for the Board's approval of the Fund's investment sub-advisory agreement is available in the Trust's Semi-Annual Report to Shareholders dated December 31, 2021.

#### **PORTFOLIO MANAGERS**

The following portfolio managers are primarily responsible for the day-to-day portfolio management of the Fund.

##### **Brian Allen, *Senior Vice President***

Mr. Allen joined C.S. McKee in 1999 as a fixed income portfolio manager and has continued to hold that position with the Sub-Advisor since its formation in 2020. He is primarily responsible for investment decisions related to the mortgage-backed and asset-backed sectors. He also provides input to the sector-allocation, duration and yield-curve decisions. Prior to joining C.S. McKee, Mr. Allen managed fixed income funds for institutional clients at Patterson Capital Corporation in Los Angeles from 1993 until 1998. Prior to that Mr. Allen worked as an equity and fixed income manager for C&S/Sovran Trust Company from 1987 to 1991. A Chartered Financial Analyst and Chartered Market Technician, Mr. Allen holds an MBA degree in Finance from the Wharton School and a Bachelor's degree in Business Administration from James Madison University.

**Bryan Johanson, Senior Vice President**

Mr. Johanson joined C.S. McKee in 1994 as a fixed income portfolio manager and has continued to hold that position with the Sub-Advisor since its formation in 2020. His primary responsibility is security selection within the corporate sector. He also provides input to the sector-allocation, duration and yield-curve decisions. Prior to joining C.S. McKee, Mr. Johanson was a manager of mortgage-backed and asset backed securities for the Indiana Corporate Federal Credit Union. Prior to that time, Mr. Johanson worked as an analyst for National City Bank from 1988 to 1992. A Chartered Financial Analyst, Mr. Johanson holds an MBA degree in Finance from Indiana University and a Bachelor's degree in Accounting from Bowling Green University.

**Jack White, Senior Vice President**

Mr. White joined C.S. McKee in 1997 as a fixed income analyst, was promoted to portfolio manager in 1999 and has continued to hold that position with the Sub-Advisor since the combination of the businesses in 2020. His primary responsibility is to make investment decisions related to the government and structured securities sectors. He also provides input into the sector allocation, duration and yield-curve decisions. A Chartered Financial Analyst, Mr. White holds an MBA degree in Finance and a Bachelor's degree in Finance, summa cum laude from Youngstown State University.

**Andrew Faderewski, Vice President**

Mr. Faderewski joined C.S. McKee in 2007 as a portfolio accountant, was promoted to portfolio manager in 2018 and has continued to hold that position with the Sub-Advisor since its formation in 2020. He is currently responsible for macroeconomic and quantitative research, corporate sector trading, and TIPS analysis. He also shares the responsibility of authoring the firm's periodic outlooks. Mr. Faderewski holds the Chartered Financial Analyst designation as well as a Bachelor's degree in business administration, magna cum laude, from Duquesne University.

Additional information about each portfolio managers' compensation, other accounts managed by the portfolio managers, and the portfolio managers' ownership of securities in the Fund is available in the SAI.

**OTHER SERVICE PROVIDERS**

Foreside Fund Services, LLC (the "Distributor") is the principal underwriter and distributor of the Fund's shares. The Distributor's principal address is Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor will not distribute shares in less than whole Creation Units, and it does not maintain a secondary market in the shares. The Distributor is a broker-dealer registered under the Securities Exchange Act of 1934 and a member of the Financial Industry Regulatory Authority, Inc. The Distributor is not affiliated with the Advisor, Sub-Advisor, The Bank of New York Mellon or any of their respective affiliates.

The Bank of New York Mellon, located at 240 Greenwich Street, New York, New York 10286, serves as the administrator, custodian, transfer agent and fund accounting agent for the Fund.

Morgan, Lewis & Bockius LLP, located at 1111 Pennsylvania Avenue, N.W., Washington, D.C. 20004, serves as legal counsel to the Trust.

Tait, Weller & Baker LLP, located at Two Liberty Place, 50 South 16<sup>th</sup> Street, Suite 2900, Philadelphia, Pennsylvania 19102, serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

**SHAREHOLDER INFORMATION**

---

**CALCULATING NET ASSET VALUE**

The Fund calculates NAV by (i) taking the current market value of its total assets, (ii) subtracting any liabilities, and (iii) dividing that amount by the total number of shares owned by shareholders.

The Fund calculates NAV once each business day as of the regularly scheduled close of normal trading on the New York Stock Exchange, LLC (the "NYSE") (normally 4:00 p.m. Eastern Time). The NYSE is typically closed on weekends and most national holidays.

In calculating NAV, the Fund generally values its portfolio investments at their current market value as reflected by readily available market quotations. When market quotations are not readily available, the Advisor will determine their fair value as described below and such fair valuations will be used in calculating the Fund's NAV.

**FAIR VALUE PRICING**

The Board has adopted valuation policies and procedures pursuant to which it has designated the Advisor to determine the fair value of the Fund's investments, subject to the Board's oversight, when market prices for those investments are not readily available, including when they are determined by the Advisor to be unreliable. Such circumstances may arise when: (i) a security has been de-listed or its trading is halted or suspended; (ii) a security's primary pricing source is unable or unwilling to provide a price; (iii) a security's primary trading market is closed during regular market hours; or (iv) a security's value has been materially affected by events occurring after the close of the security's primary trading market and before the Fund calculates its NAV. Generally, when determining the fair value of the Fund investment, the Advisor will take into account all reasonably available information that may be relevant to a particular valuation including, but not limited to, fundamental analytical data regarding the issuer, information relating to the issuer's business, recent trades or offers of the security, general and/or specific market conditions and the specific facts giving rise to the need to fair value the security. Fair value determinations are made in good faith and in accordance with the fair value methodologies established by the Advisor. Due to the subjective and variable nature of determining the fair value of a security or other investment, there can be no assurance that the Advisor's determined fair value will match or closely correlate to any market quotation that subsequently becomes available or the price quoted or published by other sources. In addition, the Fund may not be able to obtain the fair value assigned to an investment if the Fund were to sell such investment at or near the time its fair value is determined.

**PREMIUM/DISCOUNT AND BID-ASK SPREAD INFORMATION**

The price of the Fund's shares is based on market price, which may differ from the Fund's daily NAV per share and can be affected by market forces of supply and demand, economic conditions and other factors. Information showing the number of days that the market price of the Fund's shares was greater than the Fund's NAV per share (*i.e.*, at a premium) and the number of days it was less than the Fund's NAV per share (*i.e.*, at a discount) for various time periods is available by visiting the Fund's website at [www.advisorshares.com](http://www.advisorshares.com). Also available on the Fund's website is information about bid-ask spreads.

**DIVIDENDS AND DISTRIBUTIONS**

The Fund pays out dividends, if any, to shareholders at least monthly. The Fund distributes its net capital gains, if any, to shareholders at least annually.

**ACTIVE INVESTORS AND MARKET TIMING**

Shares of the Fund are listed for trading on the Exchange, which allows retail investors to purchase and sell individual shares at market prices throughout the trading day similar to other publicly traded securities. Because these secondary market trades do not involve the Fund directly, it is unlikely that secondary market trading would cause any harmful effects of market timing, such as dilution, disruption of portfolio management, increases in the Fund's trading costs or realization of capital gains. The Board has determined not to adopt policies and procedures designed to prevent or monitor for frequent purchases and redemptions of the Fund's shares because the Fund sells and redeems its shares at NAV only in Creation Units pursuant to the terms of a participant agreement between the Distributor and an authorized participant, principally in exchange for a specified amount of cash totaling the NAV of the Creation Unit(s). The Fund also imposes transaction fees on such Creation Unit transactions that are designed to offset the Fund's transfer and other transaction costs associated with the issuance and redemption of the Creation Unit shares.

**BOOK-ENTRY**

Shares of the Fund are held in book-entry form, which means that no stock certificates are issued. Depository Trust Company ("DTC"), or its nominee, is the record owner of all outstanding shares of the Fund and is recognized as the owner of all shares.

Investors owning shares of the Fund are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of shares, you are not entitled to receive physical delivery of stock certificates or to have shares registered in your name, and you are not considered a registered owner of shares. Therefore, to exercise any right as an owner of shares, you must rely upon the procedures of DTC and its participants (*e.g.*, broker-dealers, banks, trust companies, or clearing companies). These procedures are the same as those that apply to any stocks that you hold in book entry or "street name" through your brokerage account.

**INVESTING IN THE FUND**

For more information on how to buy and sell shares of the Fund, call the Trust at 877.843.3831 or visit the Fund's website at [www.advisorshares.com](http://www.advisorshares.com).

## **DISTRIBUTION PLAN**

---

The Fund has adopted a Distribution Plan pursuant to Rule 12b-1 under the 1940 Act that allows the Fund to pay distribution fees to the Distributor and other firms that provide distribution services. The Fund will pay distribution fees to the Distributor at an annual rate not to exceed 0.25% of its average daily net assets. If a service provider provides distribution services, the Distributor will pay the service provider out of its distribution fees.

No distribution fees are currently charged to the Fund; there are no plans to impose distribution fees, and no distribution fees will be charged for at least one year from the date of this Prospectus. However, to the extent distribution fees are charged in the future, because the Fund would pay these fees out of assets on an ongoing basis, over time these fees may cost you more than other types of sales charges and would increase the cost of your investment. At such time as distribution fees are charged, the Fund will notify investors by adding disclosure to the Fund's website and in the Fund's Prospectus. Any distribution fees will be approved by the Board.

## **ADDITIONAL TAX INFORMATION**

---

The following is a summary of some important tax issues that affect the Fund and its shareholders. The summary is based on current tax law, which may be changed by legislative, judicial or administrative action. The summary is very general, and does not address investors subject to special rules, such as investors who hold shares through an IRA, 401(k) or other tax-advantaged accounts. More information about taxes is located in the SAI.

*You are urged to consult your tax advisor regarding specific questions as to U.S. federal, state and local income taxes.*

### **Tax Status of the Fund**

The Fund has elected and intends to qualify each year for the special tax treatment afforded to a regulated investment company ("RIC") under the Internal Revenue Code of 1986 (the "Internal Revenue Code"). As long as the Fund qualifies for treatment as a RIC, it pays no federal income tax on the earnings it timely distributes to shareholders. However, the Fund's failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

Unless you are a tax-exempt entity or your investment in Fund shares is made through a tax-deferred retirement account, such as an IRA, you need to be aware of the possible tax consequences when:

- the Fund makes distributions;
- you sell Fund shares; and
- you purchase or redeem Creation Units (authorized participants only).

### **Tax Status of Distributions**

The Fund intends to distribute, at least annually, substantially all of its net investment income and net capital gains income.

The Fund's distributions from income and net short-term capital gains will generally be taxed to you as ordinary income. For non-corporate shareholders, dividends reported by the Fund as qualified dividend income are generally eligible for reduced tax rates applicable to long-term capital gains, provided holding period and other requirements are met. Qualified dividend income generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends that the Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. For such dividends to be taxed as qualified dividend income to a non-corporate shareholder, the Fund must satisfy certain holding period requirements with respect to the underlying stock and the non-corporate shareholder must satisfy holding period requirements with respect to his or her ownership of the Fund's shares. Holding periods may be suspended for these purposes for stock that is hedged. The Fund's investment strategies will significantly limit its ability to distribute dividends eligible for treatment as qualified dividend income.

Corporate shareholders may be entitled to a dividends received deduction for the portion of dividends they receive that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations. The Fund's investment strategies will significantly limit its ability to distribute dividends eligible for the dividends received deduction for corporate shareholders.

Taxes on distributions of capital gains (if any) are determined by how long the Fund owned the investments that generated them, rather than how long a shareholder has owned their shares. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses. Distributions from the Fund's short-term capital gains are generally taxable as ordinary income. Any distributions of net capital gain (the excess of the Fund's net long-term capital gains over its net short-term capital losses) that you receive from the Fund generally are taxable as long-term capital gains regardless of how long you have owned your shares. Long-term capital gains are taxed to non-corporate shareholders at reduced tax rates.

Although the Fund may invest in municipal bonds (the interest upon which would be exempt from U.S. federal income tax if received by shareholders directly), Fund distributions attributable to that interest are not expected to be exempt from U.S. federal income tax.

Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional shares.

In general, your distributions are subject to federal income tax for the year in which they are paid. However, distributions paid in January but declared by the Fund in October, November or December of the previous year may be taxable to you in the previous year.

Under recently issued final Treasury Regulations, a RIC that receives business interest income may pass through its net business interest income for purposes of the tax rules applicable to the interest expense limitations under Section 163(j) of the Internal Revenue Code. A RIC's total "Section 163(j) Interest Dividend" for a tax year is limited to the excess of the RIC's business interest income over the sum of its business interest expense and its other deductions properly allocable to its business interest income. A RIC may, in its discretion, designate all or a portion of ordinary dividends as Section 163(j) Interest Dividends, which would allow the recipient shareholder to treat the designated portion of such dividends as interest income for purposes of determining such shareholder's interest expense deduction limitation under Section 163(j). This can potentially increase the amount of a shareholder's interest expense deductible under Section 163(j). In general, to be eligible to treat a Section 163(j) Interest Dividend as interest income, you must have held your shares in the Fund for more than 180 days during the 361-day period beginning on the date that is 180 days before the date on which the share becomes ex-dividend with respect to such dividend. Section 163(j) Interest Dividends, if so designated by the Fund, will be reported to your financial intermediary or otherwise in accordance with the requirements specified by the Internal Revenue Service ("IRS").

Shortly after the close of each calendar year, the Fund (or your broker) will inform you of the amount of your ordinary income dividends, foreign tax credits, if any, and net capital gain distributions received from the Fund.

You may wish to avoid investing in the Fund shortly before a dividend or other distribution, because such a distribution will generally be taxable even though it may economically represent a return of a portion of your investment.

#### **Taxes on Exchange-Listed Share Sales**

Any capital gain or loss realized upon a sale of shares held by a shareholder as a capital asset is generally treated as long-term capital gain or loss if the shares have been held for more than one year and as short-term capital gain or loss if the shares have been held for one year or less, except that any capital loss on the sale of shares held for six months or less is treated as long-term capital loss to the extent of amounts treated as distributions of long-term capital gains to the shareholder with respect to such shares. Any loss realized on a sale will be disallowed to the extent shares of the Fund are acquired, including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the disposition of Fund shares. The ability to deduct capital losses may be limited.

**Derivatives and Complex Securities**

The Fund may invest in derivatives and complex securities. These investments may be subject to numerous special and complex tax rules. These rules could affect the Fund's ability to qualify as a RIC, affect whether gains and losses recognized by the Fund are treated as ordinary income or loss or capital gain or loss, accelerate the recognition of income to the Fund, cause income or gain to be recognized even though corresponding cash is not received by the Fund and/or defer the Fund's ability to recognize losses. In turn, those rules may affect the amount, timing or character of the income distributed by the Fund. Additional information regarding the Fund's investments in complex securities can be found in the Fund's SAI.

**Net Investment Income Tax**

U.S. individuals with income exceeding certain thresholds are subject to a 3.8% tax on all or a portion of their "net investment income," including interest, dividends, and certain capital gains (generally including capital gain distributions and capital gains realized on the sale or exchange of shares). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

**Non-U.S. Investors**

If you are not a citizen or permanent resident of the United States, the Fund's ordinary income dividends will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies or unless such income is effectively connected with a U.S. trade or business. The 30% withholding tax generally will not apply to distributions of net capital gain. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Short-term capital gain dividends received by a nonresident alien individual who is present in the U.S. for a period or periods aggregating 183 days or more during the taxable year are not exempt from this 30% withholding tax. Different tax consequences may result if you are a foreign shareholder engaged in a trade or business within the United States or if you are a foreign shareholder entitled to claim the benefits of a tax treaty.

**Foreign Taxes**

Dividends, interest, and other income received by the Fund with respect to foreign securities may give rise to withholding and other taxes imposed by foreign countries. Tax conventions between certain countries and the United States may reduce or eliminate such taxes. The Fund may need to file special claims for refunds to secure the benefits of a reduced rate.

**Backup Withholding**

The Fund (or financial intermediaries, such as brokers, through which shareholders own Fund shares) will be required in certain cases to withhold (as "backup withholding") on amounts payable to any shareholder who (1) has provided the Fund either an incorrect tax identification number or no number at all, (2) is subject to backup withholding by the IRS for failure to properly report payments of interest or dividends, (3) has failed to certify to the Fund that such shareholder is not subject to backup withholding, or (4) has not certified that such shareholder is a U.S. person (including a U.S. resident alien). The backup withholding rate is 24%. Backup withholding will not, however, be applied to payments that have been subject to the 30% withholding tax applicable to shareholders who are neither citizens nor residents of the United States.

**Taxes on Creation and Redemption of Creation Units**

An authorized participant who purchases a Creation Unit by exchanging securities in-kind generally will recognize a gain or loss equal to the difference between (a) the sum of the market value of the Creation Units at the time and any net cash received, and (b) the sum of the purchaser's aggregate basis in the securities surrendered and any net cash paid for the Creation Units. An authorized participant who redeems Creation Units will generally recognize a gain or loss equal to the difference between (x) the sum of the redeemer's basis in the Creation Units and any net cash paid, and (y) the sum of the aggregate market value of the securities received and any net cash received. The IRS, however, may assert that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing "wash sales" by an authorized participant that does not mark-to-market its holdings, or on the basis that there has been no significant change in economic position. Authorized participants should consult their own tax advisor with respect to whether wash sales rules apply and when a loss might be deductible.

The Fund has the right to reject an order for Creation Units if the purchaser (or a group of purchasers) would, upon obtaining the shares so ordered, own 80% or more of the outstanding shares of the Fund and if, pursuant to section 351 of the Internal Revenue Code, the Fund would have a basis in the deposit securities different from the market value of such securities on the date of deposit. The Fund also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determination. If the Fund does issue Creation Units to a purchaser (or a group of purchasers) that would, upon obtaining the Creation Units so ordered, own 80% or more of the outstanding shares of the Fund, the purchaser (or a group of purchasers) will not recognize gain or loss upon the exchange of securities for Creation Units.

The Fund may include cash when paying the redemption price for Creation Units in addition to, or in place of, the delivery of a basket of securities. The Fund may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment than if the in-kind redemption process was used.

Persons exchanging securities or non-U.S. currency for Creation Units should consult their own tax advisors with respect to the tax treatment of any creation or redemption transaction. If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many Fund shares you purchased or redeemed and at what price.

The foregoing discussion summarizes some of the consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. Consult your personal tax advisor about the potential tax consequences to you of an investment in the Fund under all tax laws applicable to you.

**More information about taxes is in the SAI.**

#### **FINANCIAL HIGHLIGHTS**

---

The financial highlights table is intended to help you understand the Fund's financial performance for the past five years. The financial highlights for the periods through June 30, 2021 represent the periods during which the Fund was named AdvisorShares Sage Core Reserves ETF and sub-advised by Sage Advisory Services Ltd. Co. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned or lost, on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been derived from the financial statements audited by Tait, Weller & Baker LLP, an independent registered public accounting firm, whose report, along with the Fund's financial statements, are included in the Fund's Annual Report, which is available upon request.

(1) Based on average shares outstanding.

(2) The amount shown for a share distribution throughout the period may not correlate with the Statement of Operations for the period due to the timing of sales and repurchases of Fund Shares in relation to income earned and/or fluctuating fair value of the investments of the Fund.

(3) Net asset value total investment return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions on ex-date, if any, at net asset value during the period, and redemption on the last day of the period. Periods less than one year are not annualized. Market value total return is calculated assuming an initial investment made at the market value at the beginning of the period, reinvestment of all dividends and distributions at market value during the period on pay date, and sale at the market value on the last day of the period.

(4) Ratios of periods of less than one year have been annualized. Excludes expenses incurred by the underlying investments in other funds.

(5) Portfolio turnover rate is not annualized and excludes the value of portfolio securities received or delivered as in-kind creations or redemptions of the Fund's capital shares.

(6) Formerly known as AdvisorShares Sage Core Reserves ETF.
